

Study plan

Name of study plan: IS nav.prez.11/12

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Intelligent Transport Systems

Garantor of the study branch: doc. Ing. Pavel Hruběš, Ph.D.

Program of study: Technology in Transportation and Telecommunications

Type of study: Follow-up master full-time

Required credits: 120

Elective courses credits: 0

Sum of credits in the plan: 120

Note on the plan:

Name of the block: Semestrální projekt

Minimal number of credits of the block: 8

The role of the block: ZP

Code of the group: XN3 IS 12/13

Name of the group: Projekt IS 3.sem 12/13

Requirement credits in the group: In this group you have to gain 4 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 4

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

Name of the block: Compulsory courses

Minimal number of credits of the block: 84

The role of the block: Z

Code of the group: 3.S.NPIS-V1-12/13

Name of the group: 3.sem.IS 1.výběr předmětů od 12/13

Requirement credits in the group: In this group you have to gain 2 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 2

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
16VS	Vehicle Control Systems Dmitry Rozhdestvenskiy, Petr Bouchner Petr Bouchner (Gar.)	Z,ZK	2	1P+1C	Z	z
20PTA	Advanced Telematic Applications Jiří Růžička, Jakub Rajnoch Jakub Rajnoch (Gar.)	Z,ZK	2	1P+1C	Z	z
20ZZZ	Railway Interlocking Systems Martin Leso, Dušan Kamenický	Z,ZK	2	1P+1C	Z	z

Characteristics of the courses of this group of Study Plan: Code=3.S.NPIS-V1-12/13 Name=3.sem.IS 1.výběr předmětů od 12/13

16VS	Vehicle Control Systems	Z,ZK	2
Basic features of regulatory technology and theory of control. Elementary regulators (PID), dynamic properties of a vehicle and driver as a regulator. Combustion engine control, static engine optimization, control unit requirements. Electric driver and its components. DC devices, asynchronous engines, synchronous engines - principles, construction, elementary features and operation. Hybrid drive control to obtain the optimal efficiency. Car communication bus (CAN, LIN, FlexRay, ISObus, KWP2000 protocole etc). Control, safety, communication and comfort electronic systems in a car. The practice is performed with real and simulated systems, car system communication, laboratory experiments and control on selected electric devices.			
20PTA	Advanced Telematic Applications	Z,ZK	2
The course presents basic knowledge and description of ITS systems and services for public transport, e.g. for public transport companies, for users of public transport, for public transport integrators, etc. and or freight transport, e.g. dangerous goods transport, transport of animals, etc.			

20ZZZ	Railway Interlocking Systems	Z,ZK	2
This course reassume on the course "Railway interlocking plants". With basic knowledge about parts Railway interlocking plants, this course describes function and koncept railway interlocking systems. The main aim is observe on modern electronic systems and other systems with high level of railway control automation. Deal of this course will be focused on interoperability of control and command in railway.			

Code of the group: 3.S.NPIS-V2-12/13

Name of the group: 3.sem.IS 2.výběr předmětů od 12/13

Requirement credits in the group: In this group you have to gain 2 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 2

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
14BKA	Safety Critical Applications in ITS Tomáš Brandejský Tomáš Brandejský Tomáš Brandejský (Gar.)	KZ	2	2P+0C	Z	z
18STC	Special Materials and Technology Jaroslav Valach	KZ	2	2P+0C	Z	z

Characteristics of the courses of this group of Study Plan: Code=3.S.NPIS-V2-12/13 Name=3.sem.IS 2.výběr předmětů od 12/13

14BKA	Safety Critical Applications in ITS The need of system solution of HW and SW safety, partial specifics of safety, methods of safe systems development and safety proving. Introduction into legislative framework.	KZ	2
18STC	Special Materials and Technology Basic Classification of Materials. Semiconductors. Ceramic materials. Polymers. Special kinds of Steels. Properties of Composite Materials.	KZ	2

Code of the group: 2.S.NPIS 11/12

Name of the group: 2.sem.nav.prez.IS od 11/12

Requirement credits in the group: In this group you have to gain 28 credits

Requirement courses in the group: In this group you have to complete 11 courses

Credits in the group: 28

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
22APN	Analysis and Prevention of Traffic Accidents Michal Frydrýn, Zdeněk Svatý	Z	2	1P+1C	L	z
20ARR	Risk Analysis and Management Vladimír Faltus	Z,ZK	2	1P+1C	L	z
14DMS	Traffic Modelling and Simulation Filip Müller, Jan Krčál	Z	4	1P+3C	L	z
20EMI	Economy and Management of ITS Projects Jiří Růžička, Jakub Rajnoch, František Kopecký	KZ	3	2P+1C	L	z
20IDFS	Identification Systems Petr Bureš Petr Bureš	Z	2	2P+0C	L	z
16IV	Intelligent Vehicle and Safety	Z,ZK	2	1+1	L	z
23IV	Intelligent Vehicle and Safety Václav Jirovský Václav Jirovský	Z,ZK	2	1P+1C	L	z
11RZ1	Pattern Recognition 1 Michal Haindl Michal Haindl Michal Haindl (Gar.)	Z,ZK	3	2P+1C	L	z
16TAJ	Technological Aspects of Quality Přemysl Toman, Jaroslav Machan	Z	2	2P+0C	L	z
14TITS	Telecommunications in ITS Tomáš Zelinka, Martin Šrotýř, Zdeněk Lokaj	Z,ZK	3	2P+1C	L	z
14UES	Artificial Intelligence and Expert Systems in Transport Tomáš Brandejský	ZK	2	2P+0C	L	z
11ZDA	Data Processing Michal Matowicki, Ondřej Příbyl Ondřej Příbyl Ondřej Příbyl (Gar.)	Z,ZK	3	2P+1C	L	z

Characteristics of the courses of this group of Study Plan: Code=2.S.NPIS 11/12 Name=2.sem.nav.prez.IS od 11/12

22APN	Analysis and Prevention of Traffic Accidents Basic definitions, types of source materials, methods of analysis, influence of road, factors of accidents, vehicle faults etc.	Z	2
20ARR	Risk Analysis and Management The main focus of the course is to acquaint with the analysis, evaluation and control of risks in road transport, especially in relation to the tunnels. They are presented probabilistic and deterministic methods for risk assessment, human behavior in crisis situations and factors that influence it. Students are more familiar with tunnel technology and repeats the basic concepts of the theory of traffic flow.	Z,ZK	2
14DMS	Traffic Modelling and Simulation Introduction to the tools for traffic simulation. Parameter modification and tuning, application in praxis.	Z	4

20EMI	Economy and Management of ITS Projects	KZ	3
The course presents basic theoretical knowledge for ITS effectiveness assesment in a lot of typical projects. The course covers methodology to obtain economy and financial models and their mutual synthesis to provide basis for feasibility studies for ITS implementation. It includes basic methods of project management with respect to the organizational and legislative aspects of ITS projects.			
20IDFS	Identification Systems	Z	2
Basic identification systems, its technologies (barcodes, RFID, biometrics), their features, usage, security and standards. Applications of identification systems, e. g. identifcaiton of vehicles, cargo, devices and processes. Identifier as foundation of traffic telematics standardization.			
16IV	Intelligent Vehicle and Safety	Z,ZK	2
Content of the subject are basic terms, types of traffic injuries, restraint systems, injury biomechanics, active and passive safety.			
23IV	Intelligent Vehicle and Safety	Z,ZK	2
Content of the subject are basic terms, types of traffic injuries, restraint systems, injury biomechanics, active and passive safety.			
11RZ1	Pattern Recognition 1	Z,ZK	3
Elements of pattern recognition. Basic PR concepts. Bayesian decision theory. Learning theory. Parametric classifiers. Context classifiers. Classification quality estimation. Vector support machines. Non-parametric classifiers. Feature selection. Cluster analysis.			
16TAJ	Technological Aspects of Quality	Z	2
Certification and accreditation, quality management, standards of quality management and its application, quality system creation, tools and methods of quality improvement, conformity assurance, environmental certification, workplace certification, QMS integration, classification, certification of products and producers.			
14TITS	Telecommunications in ITS	Z,ZK	3
Specific legislative conditions for telecommunications solutions designed for ITS systems, quantification of telecommunications system parameters, relation between telematic (ITS) and telecommunications performance indicators, available tools for management of required telecommunications performance indicators limits namely within the data IP based networks, Typical data telecommunications solutions (backbone and access) applied within ITS.			
14UES	Artificial Intelligence and Expert Systems in Transport	ZK	2
Introduction to artificial intelligence, work in unified state space and with related techniques.			
11ZDA	Data Processing	Z,ZK	3
Specific problems of the field of processing of traffic data. Data preprocessing and analysis for use in additional applications.			

Code of the group: 3.S.NPIS 12/13

Name of the group: 3.sem.nav.prez.IS od 12/13

Requirement credits in the group: In this group you have to gain 22 credits

Requirement courses in the group: In this group you have to complete 7 courses

Credits in the group: 22

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
12BA	Road Safety Audit <i>Josef Kocourek, Tomáš Padělek, Karel Kocián</i>	KZ	2	2P+0C	Z	z
12DZP	Transport and Environment <i>Kristýna Neubergová</i>	Z	2	2P+0C	Z	z
20GIL	Geographical, Information, Localization and Navigation systems <i>Pavel Hrubeš, Zuzana Purkrábková, František Kekula</i>	Z,ZK	6	2P+2C	Z	z
20HITS	ITS Effectiveness Assessment <i>Jakub Rajnoch, František Kopecký</i>	KZ	2	2P+0C	Z	z
11MMJ	Mathematical Models and their Applications <i>Ivan Nagy</i>	Z,ZK	4	2P+2C	Z	z
16MRJ	Modelling of "Human - Machine" Interface <i>Petr Bouchner, Alina Mashko</i>	Z	3	2P+1C	Z	z
14SYN	System Engineering	Z,ZK	3	2+1	Z	z

Characteristics of the courses of this group of Study Plan: Code=3.S.NPIS 12/13 Name=3.sem.nav.prez.IS od 12/13

12BA	Road Safety Audit	KZ	2
Schedules of applications of safety assessments during the process of preparations, and of the particular realization of the road network that should minimize traffic accident risks for all those who take part in road traffic. Road safety survey. Application of European Directive 2008/96/EC on road safety infrastructure management.			
12DZP	Transport and Environment	Z	2
This course aims the impact of transport on environment. The accent is put mainly on noise and vibration, emission, barrier effect and energy demands. The noise measury is part and parcel of this course.			
20GIL	Geographical, Information, Localization and Navigation systems	Z,ZK	6
Introduction to GIS, model of real world, data structure for spatial data, methods if data input, digitalisation, geographics coordination systems, map projection, vector data form, raster data form, spatial relationships and algorithms, general GIS tasks, transportation domain, GIS applications. Main principles of localization, satellite localization, performance parameters, processing of positioning data, digital carthographic data for navigation, navigation systems, dynamical navigation systems, applications of navigation systems.			
20HITS	ITS Effectiveness Assessment	KZ	2
The course presents the knowledge of stragegical plans, feasibility studies of ITS systems implementation based on available information together with the assessment of different phases of ITS project.			
11MMJ	Mathematical Models and their Applications	Z,ZK	4
This subject gives a preparation for introduction of the notions of stochastic model, its estimation and its use for prediction and control. It involves the basic elements from the theory of regression and state space modelling and the basic tasks connected with them. They are e.g. the state obseravation task and the pole assignment task. In the end, several specific examples, using the models introduced, will be listed. The applications will aim at the transportation area.			
16MRJ	Modelling of "Human - Machine" Interface	Z	3
Aspects of human -machine interaction. Summary of areas where HMI takes an important place in particular in transportation. Examples of vehicle simulators.

11MAI	ITS Mathematical Tools <i>Jan Píkrýl</i>	Z,ZK	4	2P+2C	Z	P
20SK	Signals and Codes <i>Jan Píkrýl, Jindřich Sadil</i>	Z,ZK	4	2P+1C	Z	P
20TSJ	Telematic systems and their design <i>Martin Langr, Petr Bureš, Ondřej Příbyl, Pavel Hrubeš Petr Bureš (Gar.)</i>	Z,ZK	6	3P+2C	Z	P
11TEF	Theoretical Physics at Transportation <i>David Matejov, Zuzana Malá Zuzana Malá Zuzana Malá (Gar.)</i>	Z,ZK	3	2P+1C	Z	P
12TDP	Traffic Flow Theory <i>Vladimír Faltus</i>	Z,ZK	3	2P+1C	Z	P
20TRAS	Control and Reliability Theory in Transportation <i>Vladimír Faltus, Tomáš Tichý</i>	ZK	4	4P+0C	Z	P

Characteristics of the courses of this group of Study Plan: Code=1.S.NPIS 11/12 Name=1.sem.nav.prez.IS od 11/12

16EAP	Energy Analysis of Land Carriage	KZ	2
Dynamics and driving resistance of the vehicle. Types of energy - kinetic, static, thermic, chemical etc. Means of energy transformation into kinetic. Combustion engine, electric engine, steam engine, air engine. Energy accumulation means, flywheel, fuel cell. Energy recuperation. WTW energetic analysis.			
23IB	Information Security	KZ	2
Essentials of the security, definitions, approach. Security in networked branches, systems and networks - security point of view, Risks and their assesment, effect of security on the system design.			

11MAI	ITS Mathematical Tools	Z,ZK	4
Series, Fourier Series. Discrete Fourier Transform. Segmentation of signals, windows, localization. Short-term Fourier Transform. From Fourier Analysis to PDE. Fundamentals of Numerical Mathematics. Numerical solutions to ODEs and PDEs. Continuous traffic flow models described by PDE. Car-following models as ODEs.			
20SK	Signals and Codes	Z,ZK	4
Time and frequency representation of signals. Discretization of signals, sampling, quantization and coding. Signal transmission, modulation and coding. Coding theory, information theory. Checksums and selfcorrecting codes. Cryptography protocols. MATLAB exercises. Practical applications of coding and modulation.			
20TSJ	Telematic systems and their design	Z,ZK	6
Gradual detailed analysis of individual existing telematics systems in modes of transport, such as toll systems, vehicle weighing, fleet management, traffic management, etc.			
11TEF	Theoretical Physics at Transportation	Z,ZK	3
Generalized coordinates, Lagrange's equations of the first and the second kind, Hamilton's canonical equations, Canonical transformations, ergodic system, Weekly nonintegrable Hamilton's systém, Chaos, Potencial flow, Circumfluence of cylinder, conformal transformation, and method of singularity, Laminar flow, Turbulent flow.			
12TDP	Traffic Flow Theory	Z,ZK	3
Mobility and associated human problems. Basic traffic parameters and their measurement. Estimation of quality of services. Theoretical fundamentals and applications of mathematical models. Macroscopic, statistical and microscopic models. Theory of shock waves, queuing theory and special theory of traffic phenomena. Relation between traffic models and traffic flow management.			
20TRAS	Control and Reliability Theory in Transportation	ZK	4
Advanced methods of automatic control. Methods of state space control, nonlinear control, adaptive control, fuzzy control and stochastic control. Application of these methods on vehicular control and the control of traffic flows. Predicative diagnostics, safety in the traffic vehicles, safety infrastructure, human in the transportation and traffic systems and application of safety systems in transportation.			

List of courses of this pass:

Code	Name of the course	Completion	Credits
11MAI	ITS Mathematical Tools	Z,ZK	4
Series, Fourier Series. Discrete Fourier Transform. Segmentation of signals, windows, localization. Short-term Fourier Transform. From Fourier Analysis to PDE. Fundamentals of Numerical Mathematics. Numerical solutions to ODEs and PDEs. Continuous traffic flow models described by PDE. Car-following models as ODEs.			
11MMJ	Mathematical Models and their Applications	Z,ZK	4
This subject gives a preparation for introduction of the notions of stochastic model, its estimation and its use for prediction and control. It involves the basic elements from the theory of regression and state space modelling and the basic tasks connected with them. They are e.g. the state observation task and the pole assignment task. In the end, several specific examples, using the models introduced, will be listed. The applications will aim at the transportation area.			
11RZ1	Pattern Recognition 1	Z,ZK	3
Elements of pattern recognition. Basic PR concepts. Bayesian decision theory. Learning theory. Parametric classifiers. Context classifiers. Classification quality estimation. Vector support machines. Non-parametric classifiers. Feature selection. Cluster analysis.			
11TEF	Theoretical Physics at Transportation	Z,ZK	3
Generalized coordinates, Lagrange's equations of the first and the second kind, Hamilton's canonical equations, Canonical transformations, ergodic system, Weekly nonintegrable Hamilton's systém, Chaos, Potencial flow, Circumfluence of cylinder, conformal transformation, and method of singularity, Laminar flow, Turbulent flow.			
11X13	Master Project 3	Z	4
11XIDP	Diploma Thesis (for the Field IS)	KZ	22
11XN1	Master Project 1	Z	2
11XN2	Master Project 2	Z	2
11XN4	Master Project 4	Z	8
11ZDA	Data Processing	Z,ZK	3
Specific problems of the field of processing of traffic data. Data preprocessing and analysis for use in additional applications.			
12BA	Road Safety Audit	KZ	2
Schedules of applications of safety assessments during the process of preparations, and of the particular realization of the road network that should minimize traffic accident risks for all those who take part in road traffic. Road safety survey. Application of European Directive 2008/96/EC on road safety infrastructure management.			
12DZP	Transport and Environment	Z	2
This course aims the impact of transport on environment. The accent is put mainly on noise and vibration, emission, barrier effect and energy demands. The noise measury is part and parcel of this course.			
12TDP	Traffic Flow Theory	Z,ZK	3
Mobility and associated human problems. Basic traffic parameters and their measurement. Estimation of quality of services. Theoretical fundamentals and applications of mathematical models. Macroscopic, statistical and microscopic models. Theory of shock waves, queuing theory and special theory of traffic phenomena. Relation between traffic models and traffic flow management.			
12X13	Master Project 3	Z	4
12XIDP	Diploma Thesis (for the Field IS)	KZ	22
12XN1	Master Project 1	Z	2
12XN2	Master Project 2	Z	2
12XN4	Master Project 4	Z	8
13X13	Master Project 3	Z	4
13XIDP	Diploma Thesis (for the Field IS)	KZ	22
13XN1	Master Project 1	Z	2
13XN2	Master Project 2	Z	2
13XN4	Master Project 4	Z	8

14BKA	Safety Critical Applications in ITS The need of system solution of HW and SW safety, partial specifics of safety, methods of safe systems development and safety proving. Introduction into legislative framework.	KZ	2
14DMS	Traffic Modelling and Simulation Introduction to the tools for traffic simulation. Parameter modification and tuning, application in praxis.	Z	4
14SYN	System Engineering Standard analysis methods and synthesis (projecting) of objects with system identification from the methodology standpoint.	Z,ZK	3
14TITS	Telecommunications in ITS Specific legislative conditions for telecommunications solutions designed for ITS systems, quantification of telecommunications system parameters, relation between telematic (ITS) and telecommunications performance indicators, available tools for management of required telecommunications performance indicators limits namely within the data IP based networks, Typical data telecommunications solutions (backbone and access) applied within ITS.	Z,ZK	3
14UES	Artificial Intelligence and Expert Systems in Transport Introduction to artificial intelligence, work in unified state space and with related techniques.	ZK	2
14X13	Master Project 3	Z	4
14XIDP	Diploma Thesis (for the Field IS)	KZ	22
14XN1	Master Project 1	Z	2
14XN2	Master Project 2	Z	2
14XN4	Master Project 4	Z	8
15X13	Master Project 3	Z	4
15XIDP	Diploma Thesis (for the Field IS)	KZ	22
15XN1	Master Project 1	Z	2
15XN2	Master Project 2	Z	2
15XN4	Master Project 4	Z	8
16EAP	Energy Analysis of Land Carriage Dynamics and driving resistance of the vehicle. Types of energy - kinetic, static, thermic, chemical etc. Means of energy transformation into kinetic. Combustion engine, electric engine, steam engine, air engine. Energy accumulation means, flywheel, fuel cell. Energy recuperation. WTW energetic analysis.	KZ	2
16IV	Intelligent Vehicle and Safety Content of the subject are basic terms, types of traffic injuries, restraint systems, injury biomechanics, active and passive safety.	Z,ZK	2
16MRJ	Modelling of "Human - Machine" Interface Aspects of human -machine interaction. Summary of areas where HMI takes an important place in particular in transportation. Examples of vehicle simulators.	Z	3
16TAJ	Technological Aspects of Quality Certification and accreditation, quality management, standards of quality management and its application, quality system creation, tools and methods of quality improvement, conformity assurance, environmental certification, workplace certification, QMS integration, classification, certification of products and producers.	Z	2
16VS	Vehicle Control Systems Basic features of regulatory technology and theory of control. Elementary regulators (PID), dynamic properties of a vehicle and driver as a regulator. Combustion engine control, static engine optimization, control unit requirements. Electric driver and its components. DC devices, asynchronous engines, synchronous engines - principles, construction, elementary features and operation. Hybrid drive control to obtain the optimal efficiency. Car communication bus (CAN, LIN, FlexRay, ISObus, KWP2000 protocole etc). Control, safety, communication and comfort electronic systems in a car. The practice is performed with real and simulated systems, car system communication, laboratory experiments and control on selected electric devices.	Z,ZK	2
16X13	Master Project 3	Z	4
16XIDP	Diploma Thesis (for the Field IS)	KZ	22
16XN1	Master Project 1	Z	2
16XN2	Master Project 2	Z	2
16XN4	Master Project 4	Z	8
17X13	Master Project 3	Z	4
17XIDP	Diploma Thesis (for the Field IS)	KZ	22
17XN1	Master Project 1	Z	2
17XN2	Master Project 2	Z	2
17XN4	Master Project 4	Z	8
18STC	Special Materials and Technology Basic Classification of Materials. Semiconductors. Ceramic materials. Polymers. Special kinds of Steels. Properties of Composite Materials.	KZ	2
18X13	Master Project 3	Z	4
18XIDP	Diploma Thesis (for the Field IS)	KZ	22
18XN1	Master Project 1	Z	2
18XN2	Master Project 2	Z	2
18XN4	Master Project 4	Z	8
20ARR	Risk Analysis and Management The main focus of the course is to acquaint with the analysis, evaluation and control of risks in road transport, especially in relation to the tunnels. They are presented probabilistic and deterministic methods for risk assessment, human behavior in crisis situations and factors that influence it. Students are more familiar with tunnel technology and repeats the basic concepts of the theory of traffic flow.	Z,ZK	2
20EMI	Economy and Management of ITS Projects The course presents basic theoretical knowledge for ITS effectiveness assesment in a lot of typical projects. The course covers methodology to obtain economy and financial models and their mutual synthesis to provide basis for feasibility studies for ITS implementation. It includes basic methods of project management with respect to the organizational and legislative aspects of ITS projects.	KZ	3
20GIL	Geographical, Information, Localization and Navigation systems Introduction to GIS, model of real world, data structure for spatial data, methods if data input, digitalisation, geographics coordination systems, map projection, vector data form, raster data form, spatial relationships and algorithms, general GIS tasks, transportation domain, GIS applications. Main principles of localization, satellite localization, performance parameters, processing of positioning data, digital cartographic data for navigation, navigation systems, dynamical navigation systems, applications of navigation systems.	Z,ZK	6

20HITS	ITS Effectiveness Assessment	KZ	2
The course presents the knowledge of strategical plans, feasibility studies of ITS systems implementation based on available information together with the assessment of different phases of ITS project.			
20IDFS	Identification Systems	Z	2
Basic identification systems, its technologies (barcodes, RFID, biometrics), their features, usage, security and standards. Applications of identification systems, e. g. identification of vehicles, cargo, devices and processes. Identifier as foundation of traffic telematics standardization.			
20PTA	Advanced Telematic Applications	Z,ZK	2
The course presents basic knowledge and description of ITS systems and services for public transport, e.g. for public transport companies, for users of public transport, for public transport integrators, etc. and or freight transport, e.g. dangerous goods transport, transport of animals, etc.			
20SK	Signals and Codes	Z,ZK	4
Time and frequency representation of signals. Discretization of signals, sampling, quantization and coding. Signal transmission, modulation and coding. Coding theory, information theory. Checksums and selfcorrecting codes. Cryptography protocols. MATLAB excercises. Practical applications of coding and modulation.			
20TRAS	Control and Reliability Theory in Transportation	ZK	4
Advanced methods of automatic control. Methods of state space control, nonlinear control, adaptive control, fuzzy control and stochastic control. Application of these methods on vehicular control and the control of traffic flows. Predictive diagnostics, safety in the traffic vehicles, safety infrastructure, human in the transportation and traffic systems and application of safety systems in transportation.			
20TSJ	Telematic systems and their design	Z,ZK	6
Gradual detailed analysis of individual existing telematics systems in modes of transport, such as toll systems, vehicle weighing, fleet management, traffic management, etc.			
20X13	Master Project 3	Z	4
20XIDP	Diploma Thesis (for the Field IS)	KZ	22
20XN1	Master Project 1	Z	2
20XN2	Master Project 2	Z	2
20XN4	Master Project 4	Z	8
20ZZZ	Railway Interlocking Systems	Z,ZK	2
This course reassume on the course "Railway interlocking plants". With basic knowledge about parts Railway interlocking plants, this course describes function and koncept railway interlocking systems. The main aim is observe on modern electronic systems and other systems with high level of railway control automation. Deal of this course will be focused on interoperability of control and command in railway.			
21X13	Master Project 3	Z	4
21XIDP	Diploma Thesis (for the Field IS)	KZ	22
21XN1	Master Project 1	Z	2
21XN2	Master Project 2	Z	2
21XN4	Master Project 4	Z	8
22APN	Analysis and Prevention of Traffic Accidents	Z	2
Basic definitions, types of source materials, methods of analysis, influence of road, factors of accidents, vehicle faults etc.			
22X13	Master Project 3	Z	4
22XIDP	Diploma Thesis (for the Field IS)	KZ	22
22XN1	Master Project 1	Z	2
22XN2	Master Project 2	Z	2
22XN4	Master Project 4	Z	8
23IB	Information Security	KZ	2
Essentials of the security, definitions, approach. Security in networked branches, systems and networks - security point of view, Riscs and their assesment, effect of security on the system design.			
23IV	Intelligent Vehicle and Safety	Z,ZK	2
Content of the subject are basic terms, types of traffic injuries, restraint systems, injury biomechanics, active and passive safety.			
23X13	Master Project 3	Z	4
23XIDP	Diploma Thesis (for the Field IS)	KZ	22
23XN1	Master Project 1	Z	2
23XN2	Master Project 2	Z	2
23XN4	Master Project 4	Z	8
