## Name of study plan: 04 109 NSTI DLTT 2012 zaměření MV

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Transportation, Aerospace and Handling Technology

Garantor of the study branch: prof. Ing. Jan Macek, DrSc.

Program of study: Mechanical Engineering

Type of study: Follow-up master

Required credits: 120

Elective courses credits: 4

Sum of credits in the plan: 124

Note on the plan:

Name of the block: Compulsory courses in the program

Minimal number of credits of the block: 113

The role of the block: P

Code of the group: 12NS\*1P-DLT-MV

Name of the group: 2012 NSTI 1.sem povinné DLTT - MV

Requirement credits in the group: In this group you have to gain 25 credits

Requirement courses in the group: In this group you have to complete 6 courses

Credits in the group: 25

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

2212041	Passive Safety of Vehicles Introduction and explanation of basic physics principles used in vehicle crash analysis - kinematics and dynamics of vehicle and occupant. Introduction to injury biomechanics, injury mechanisms and criteria. Overview of safety legislation. Overview and function of nowadays safety restraint system used.	KZ	2			
2383062	Budget and Project Economic Assessment The goal of the course is to improve the knowledge gained within the basic bachelor's degree course Management and Economics of the Enterprise. The course focuses primarily on deepening of basic knowledge and skills in the creation and evaluation of the operational budget, proper preparation and evaluation of costing model for manufactured products and the economic evaluation of an investment project, as it corresponds to contemporary knowledge and the development of management methods and techniques. Students specify a simple fictional industrial or engineering company or its sub-section (preferably inspired by their practical experience, internships or training program in real company). The first student's task is to prepare a detailed plan and budget of a project (e.g. new product development, product or process innovation, etc.) focused on improvement of profitability, competitiveness or effectiveness of the company. The second task is cost calculation for chosen calculation unit. Last task within this course is the evaluation of economical effectiveness of the project described within the first task. The dynamic methods like Net Present Value (NPV), Internal Rate of Return (IRR) or Discounted Payback Period (DPP) are used for this evaluation. The quality of realization and presentation of the task's outputs together with the results of the test decides on granting / denial of credit.	Z	2
