

Study plan

Name of study plan: Electrical Engineering, Power Engineering and Management - Electrical Power Engineering

Faculty/Institute/Others: Faculty of Electrical Engineering

Department: Department of Electrical Power Engineering

Branch of study guaranteed by the department: Electrical Power Engineering

Garantor of the study branch: prof. Ing. Josef Tlustý, CSc.

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master combined

Required credits: 110

Elective courses credits: 10

Sum of credits in the plan: 120

Note on the plan:

Name of the block: Compulsory courses in the program

Minimal number of credits of the block: 87

The role of the block: P

Code of the group: 2015_MEEMDIP-K

Name of the group: Diploma Thesis

Requirement credits in the group: In this group you have to gain 25 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 25

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
BDIP25	Diploma Thesis	Z	25	22s	L	P

Characteristics of the courses of this group of Study Plan: Code=2015_MEEMDIP-K Name=Diploma Thesis

BDIP25	Diploma Thesis	Z	25	Independent final comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or her branch of study, which will be specified by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the comprehensive final examination.		
--------	----------------	---	----	---	--	--

Code of the group: 2015_MEEMP1-K

Name of the group: Compulsory subjects of the programme

Requirement credits in the group: In this group you have to gain 62 credits

Requirement courses in the group: In this group you have to complete 12 courses

Credits in the group: 62

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
BD1M13ASS	Solar Systems Applications <i>Vít zslav Benda, Pavel Hrzina Vít zslav Benda (Gar.)</i>	Z,ZK	5	14KP+6KL	Z	P
BD1M13EMP	Ecology of materials and processes	Z,ZK	5	14KP+6KC	L	P

BD1M15IAP	Engineering Applications <i>Jan Kyncl</i>	Z,ZK	5	14KP+6KC	Z	P

BD1M13JAS	Quality and Reliability	Z,ZK	6	14KP+6KC	Z	P
BD1M15PRE	Transmission and Distribution of Electricity <i>Zden k Müller Zden k Müller (Gar.)</i>	Z,ZK	6	14KP+6KS	Z	P
BD1M14SSE	Machinery and Structures of Power Plants <i>Petr Ko árnik Petr Ko árnik Petr Ko árnik (Gar.)</i>	Z,ZK	5	14KP+6KC	Z	P
BD1M15TVN	High Voltage Engineering	Z,ZK	5	14KP+6KL	L	P
BD1M14TVM	Theory and Application of Power Converters <i>Jan Bauer</i>	Z,ZK	5	14KP+6KL	L	P

Characteristics of the courses of this group of Study Plan: Code=2015_MEEMP1-K Name=Compulsory subjects of the programme

BD1M13ASS	Solar Systems Applications	Z,ZK	5	The aim of the course is to deepen the knowledge of the properties of semiconductor materials and structures that are important for a deeper understanding of the semiconductor components technology .		
BD1M13EMP	Ecology of materials and processes	Z,ZK	5	Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspects of protective systems used in electronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult operating environment. Disposal of electrical waste.		
BD1M16EKE	Economy of Power Industry	KZ	4	Fundamentals of financing of power companies. Cost structure of power generation and distribution. Prices and tariff systems for power, heat and gas production and distribution. Examples of economic evaluation and investment appraisal of the typical project in power sector. Renewable energy sources, externalities. Energy policy and energy law in CR. Liberalization and power market development.		
BD1M14EPT	Electric Drives and Traction	Z,ZK	6	The course focuses on the principles of designing electric drives with AC motors in different ways and different types of load, reliability, design for explosive environments and for special purposes and the necessary technical documentation. Students learn the basics of electric traction drives for trams in public transport systems, electric locomotives, as well as the systems of hybrid cars and electric vehicles.		
BD1M14ESP	Electric Machinery and Apparatus	Z,ZK	5	The course is focused on contact and solid-state switching devices in LV networks. Basic topologies AC switches and stress of their components, systems with modern semiconductor devices and their protection circuits, testing electrical devices. The course also deals with the general theory of electrical machines. Magnetic field. Fundamentals of commutation. The transformer efficiency, voltage drop. Transients - switch to the network, a short circuit. Mathematical model of synchronous and asynchronous machines. A rotating magnetic field. Induction machine, starting and speed control. Influence of harmonic magnetic field. Single-phase induction motor. Work synchronous machine on a network. Torque, stability, overload capacity.		
BD1M15ENY	Power Plants	Z,ZK	5			
BD1M15IAP	Engineering Applications	Z,ZK	5			
BD1M13JAS	Quality and Reliability	Z,ZK	6	Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability as a part of quality. Basic definitions from the area of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types of warm and cold standbys. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical methods and tools joined with quality control, managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits. Statistical inspection.		
BD1M15PRE	Transmission and Distribution of Electricity	Z,ZK	6			
BD1M14SSE	Machinery and Structures of Power Plants	Z,ZK	5	The aim of the course is to acquaint students with forms of energy transformation in power plants, describing the function of power facilities, their structure, properties and characteristics.		
BD1M15TVN	High Voltage Engineering	Z,ZK	5			
BD1M14TVM	Theory and Application of Power Converters	Z,ZK	5	The course focuses on typical applications of power semiconductor converters on their sizing, switching and protection of power semiconductor converters. It also summarizes the basics of modulation and control strategies of power semiconductor converters and modern trends in their application in electric drives and other applications.		

Name of the block: Compulsory courses of the specialization

Minimal number of credits of the block: 19

The role of the block: PO

Code of the group: 2015_MEEMPO3-K

Name of the group: Compulsory subjects of the branch

Requirement credits in the group: In this group you have to gain 19 credits

Requirement courses in the group: In this group you have to complete 4 courses

Credits in the group: 19

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
BD1M15DEE	Distribution of Electrical Energy <i>Zden k Müller</i>	Z,ZK	5	14KP+6KS	Z	PO
BD1M15ELS	Electrical Light	Z,ZK	5	14KP+6KL	L	PO
BD1M15ETT	Electrical Heat <i>Jan Kyncl Jan Kyncl (Gar.)</i>	Z,ZK	5	14KP+6KS	Z	PO
BD1M15IND	Master Project <i>Zden k Müller, Stanislav Bou ek</i>	Z	4	0+4s	Z	PO

Characteristics of the courses of this group of Study Plan: Code=2015_MEEMPO3-K Name=Compulsory subjects of the branch

Characteristics of the courses of this group of Study Plan: Code=2015_MEEMH-K Name=Humanities subjects

BD0M16ET1	Ethic 1	KZ	4
Aim of this subject is to provide the students an orientation not only in general problems of ethics but above all to offer instructions for solving various situations of human life. Essential parts of the subject are discussions in which students can react to lectures but also to actual questions coming with news and look for the communal answers.			
BD0M16F11	Philosophy 1	KZ	4
We deal with the most important persons, schools and ideas of ancient philosophy. We are concerned especially on transdisciplinary nature of philosophy and connection of old philosophical thoughts with recent problems of science, technology, economics and politics.			
BD0M16F12	Philosophy 2	Z,ZK	4
The course is oriented on the transdisciplinary aspects of philosophy, informatics, physics, mathematics and biology.			
BD0M16HI1	History 1	KZ	4
The main purpose of this subject is to provide a historical overview and explanation of rises and developments of mass movements and totalitarian states in 20th century. The course is based on political and econom-social history with attention to philosophic and psychologic connections.			
BD0M16HTE	History of technology and economic	ZK	2
The course introduces the scientific branch of the history of technology as the economic and social context of the Czech lands and Czechoslovakia in comparison with the development of the European region 19th to 21st century.			
BD0M16HT1	History of science and technology 1	KZ	4
This subject provides basic information on the development of science and technology in the world and at home from the earliest times to the present. The course is aimed primarily at explaining the significance of key levels of technology development, industrial revolutions and their impact on society.			
BD0M16HT2	History of science and technology 2	Z,ZK	4
This subject traces historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate students' interest in the history and traditions of the subject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life and the influence of technical engineers			
BD0M16HSD	History of economy and social studies	Z,ZK	4
This subject deals with the history of the Czech society in the 19th - 21th centuries. It follows the forming of the Czech political representation, its aims and achieved results as well as the social and cultural development and coexistence of the various ethnical groups in the Czech countries.			
BD0M16MPS	Psychology	Z,ZK	4
BD0M16MPL	Psychology for Managers	ZK	2
Psychology of personality. Industrial and organizational psychology. Psychology in human resources management. Workgroups and teams, roles and competencies. Psychology in sales, consumer behavior analysis, psychology in marketing. Personality of a manager and leader. Time management, planning, delegation. Corporate culture.			

BD0M16TE1	Theology	Z,ZK	4
This subject provides to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture the basic theologic disciplines are gone through. The subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who want to get know Christianity - religion from which grows our civilization up.

List of courses of this pass:

Code	Name of the course	Completion	Credits
A003TV	Physical Education	Z	2
BD0M16ET1	Ethic 1 Aim of this subject is to provide the students an orientation not only in general problems of ethics but above all to offer instructions for solving various situations of human life. Essential parts of the subject are discussions in which students can react to lectures but also to actual questions coming with news and look for the communal answers.	KZ	4
BD0M16FI1	Philosophy 1 We deal with the most important persons, schools and ideas of ancient philosophy. We are concerned especially on transdisciplinary nature of philosophy and connection of old philosophical thoughts with recent problems of science, technology, economics and politics.	KZ	4
BD0M16FI2	Philosophy 2 The course is oriented on the transdisciplinary aspects of philosophy, informatics, physics, mathematics and biology.	Z,ZK	4
BD0M16HI1	History 1 The main purpose of this subject is to provide a historical overview and explanation of rises and developments of mass movements and totalitarian states in 20th century. The course is based on political and econom-social history with attention to philosophic and psychologic connections.	KZ	4
BD0M16HSD	History of economy and social studies This subject deals with the history of the Czech society in the 19th - 21th centuries. It follows the forming of the Czech political representation, its aims and achieved results as well as the social and cultural development and coexistence of the various ethnical groups in the Czech countries.	Z,ZK	4

BD0M16HT1	History of science and technology 1	KZ	4
This subject provides basic information on the development of science and technology in the world and at home from the earliest times to the present. The course is aimed primarily at explaining the significance of key levels of technology development, industrial revolutions and their impact on society.			
BD0M16HT2	History of science and technology 2	Z,ZK	4
This subject traces historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate students' interest in the history and traditions of the subject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life and the influence of technical engineers			
BD0M16HTE	History of technology and economic	ZK	2
The course introduces the scientific branch of the history of technology as the economic and social context of the Czech lands and Czechoslovakia in comparison with the development of the European region 19th to 21st century.			
BD0M16MPL	Psychology for Managers	ZK	2
Psychology of personality. Industrial and organizational psychology. Psychology in human resources management. Workgroups and teams, roles and competencies. Psychology in sales, consumer behavior analysis, psychology in marketing. Personality of a manager and leader. Time management, planning, delegation. Corporate culture.			
BD0M16MPS	Psychology	Z,ZK	4
BD0M16TE1	Theology	Z,ZK	4
This subject provides to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture the basic theologic disciplines are gone through. The subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who want to get know Christianity - religion from which grows our civilization up.			
BD1M13ASS	Solar Systems Applications	Z,ZK	5
The aim of the course is to deepen the knowledge of the properties of semiconductor materials and structures that are important for a deeper understanding of the semiconductor components technology .			
BD1M13EMP	Ecology of materials and processes	Z,ZK	5
Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspects of protective systems used in electronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult operating environment. Disposal of electrical waste.			
BD1M13JAS	Quality and Reliability	Z,ZK	6
Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability as a part of quality. Basic definitions from the area of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types of warm and cold standbys. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical methods and tools joined with quality control, managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits. Statistical inspection.			
BD1M14EPT	Electric Drives and Traction	Z,ZK	6
The course focuses on the principles of designing electric drives with AC motors in different ways and different types of load, reliability, design for explosive environments and for special purposes and the necessary technical documentation. Students learn the basics of electric traction drives for trams in public transport systems, electric locomotives, as well as the systems of hybrid cars and electric vehicles.			
BD1M14ESP	Electric Machinery and Apparatus	Z,ZK	5
The course is focused on contact and solid-state switching devices in LV networks. Basic topologies AC switches and stress of their components, systems with modern semiconductor devices and their protection circuits, testing electrical devices. The course also deals with the general theory of electrical machines. Magnetic field. Fundamentals of commutation. The transformer efficiency, voltage drop. Transients - switch to the network, a short circuit. Mathematical model of synchronous and asynchronous machines. A rotating magnetic field. Induction machine, starting and speed control. Influence of harmonic magnetic field. Single-phase induction motor. Work synchronous machine on a network. Torque, stability, overload capacity.			
BD1M14SSE	Machinery and Structures of Power Plants	Z,ZK	5
The aim of the course is to acquaint students with forms of energy transformation in power plants, describing the function of power facilities, their structure, properties and characteristics.			
BD1M14TVM	Theory and Application of Power Converters	Z,ZK	5
The course focuses on typical applications of power semiconductor converters on their sizing, switching and protection of power semiconductor converters. It also summarizes the basics of modulation and control strategies of power semiconductor converters and modern trends in their application in electric drives and other applications.			
BD1M15DEE	Distribution of Electrical Energy	Z,ZK	5
