

# Study plan

## Name of study plan: PL nav.komb.21/22

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Technology in Transportation and Telecommunications

Type of study: Follow-up master combined

Required credits: 90

Elective courses credits: 30

Sum of credits in the plan: 120

Note on the plan:

Name of the block: Compulsory courses

Minimal number of credits of the block: 78

The role of the block: Z

Code of the group: 1.S.NKPL 21/22

Name of the group: 1.sem.nav.komb.PL v 21/22

Requirement credits in the group: In this group you have to gain 30 credits

Requirement courses in the group: In this group you have to complete 7 courses

Credits in the group: 30

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
21BLED	<b>Aviation Safety</b> Andrej Lališ, Kateřina Grötschelová	Z,ZK	4	2P+2C+14B	Z	Z
21CNSY	<b>CNS Systems</b> Stanislav Pleninger, Jakub Steiner, Petr Lukeš, Jakub Kraus <b>Stanislav Pleninger</b>	Z,ZK	4	3P+1C+16B	Z	Z
21LKSK	<b>Aircraft Structures</b>	Z,ZK	6	16B	Z	Z
21PLDO	<b>Air Carrier Operation</b>	Z,ZK	5	3P+1C+14B	Z	Z
21POHK	<b>Aircraft Propulsion</b>	Z,ZK	7	16B	Z	Z
22SLN	<b>Air Traffic Accident Investigation</b> Karel Mündel, Michal Frydrýn	KZ	2	2P+0C+12B	Z	Z
15J2A1	<b>Language - English 1</b> Markéta Olehlová, Jitka He manová, Marie Michlová, Lenka Monková, Markéta Vojanová, Peter Morpuss, Jan Feit, Eva Rezlerová	Z	2	0P+2C+10B	Z	Z

### Characteristics of the courses of this group of Study Plan: Code=1.S.NKPL 21/22 Name=1.sem.nav.komb.PL v 21/22

21BLED	Aviation Safety	Z,ZK	4	Reliability and system lifecycle. Basics of reliability theory. Reliability mathematical tools. Reliability analysis. Maintenance system. Safety and quality theory. Basic concepts of safety. Managing of safety. Safety management. Safety management strategies. Hazard, risk. Risk management.
21CNSY	CNS Systems	Z,ZK	4	Subject provides full technical informations about CNS (communication, navigation, surveillance) systems used in aviation. Systems are presented in perspective of future development.
21LKSK	Aircraft Structures	Z,ZK	6	History and development of aeronautics. Classification of aircraft. Fundamental parts and systems. Safety, reliability and airworthiness. Limit states of aircraft structure and strength certification. Aviation regulations. Load factor. Manoeuvring loads. Manoeuvring envelope of load factor. Gust load. Gust load factor and envelope of gust load factor.
21PLDO	Air Carrier Operation	Z,ZK	5	Mission and importance of air transport. Legislation. Airlines - structure, strategy. Performances in air transport. Cost structure. Fuel management. Cargo. Aircraft maintenance (organization) and economics of aircraft operation. Ground handling and other services. Safety / Security / Quality and Compliance monitoring. Revenue management. Air transport and environment.
21POHK	Aircraft Propulsion	Z,ZK	7	Theoretical background. Earth atmosphere. Classification of aircraft engines, characteristics, domains of use, comparative parameters, characteristics and criteria. Energy transformation within aircraft propulsion systems, thermal cycles analysis, working substances, environmental constraints, efficiencies. Reciprocating and turbine engines, their construction and material characteristics and performance characteristics. Environmental impacts.
22SLN	Air Traffic Accident Investigation	KZ	2	Specification of forensic expertise. Regulations and establishments for exceptional events in air traffic. Analysis of air traffic accidents (cause investigation, time course, human factor). Air traffic accidents prevention. Exceptional aviation event report. Analysis of particular accidents in air traffic.

15J2A1	Language - English 1	Z	2
Grammatical Structures and Style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.			

Code of the group: 2.S.NKPL 15/16

Name of the group: 2.sem.nav.komb.PL (od) 15/16

Requirement credits in the group: In this group you have to gain 24 credits

Requirement courses in the group: In this group you have to complete 7 courses

Credits in the group: 24

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
16PDP	<b>Principles of Vehicle Design</b>	ZK	2	2P+0C+8B	L	Z
21KST	<b>Space Technology</b>	ZK	3	2P+0C+10B	L	Z
21NSR	<b>Navigation and Flight Management Systems</b>	Z,ZK	5	3P+2C+16B	L	Z
21SPOL	<b>Aircraft Technology Reliability</b>	Z,ZK	4	2P+1C+12B	L	Z
21AITM	<b>Air Traffic Management</b>	KZ	4	3P+2C+14B	L	Z
23SCT	<b>Airport Security</b>	KZ	4	2P+1C+12B	L	Z
15JBA2	<b>Language - English 2</b>	Z	2	0P+2C+10B	L	Z

**Characteristics of the courses of this group of Study Plan: Code=2.S.NKPL 15/16 Name=2.sem.nav.komb.PL (od) 15/16**

16PDP	Principles of Vehicle Design Design of transportation vehicle according to its usage and function. Marketing and user demands. Vehicle dynamics. Propulsion systems. Design process, functional design and vehicle structure. Evaluation of variant concepts. Design phases. Reliability, technological aspects etc.	ZK	2
21KST	Space Technology Universe and its basic characteristics. Fundamentals of astrophysics. Kepler's laws. Solar system. Earth's and its atmosphere and outer space. Space transport vehicles. Rockets and rocket engines and their structure and operational characteristics. Space crafts and satellites, space flight. Orbital mechanics. Application of space technologies for global navigation and communication. Space exploration and piloted space flights and missions.	ZK	3
21NSR	Navigation and Flight Management Systems Navigation. Radionavigation. Satellite navigation. Flight management system. Autopilot. FMC. Practical execution of flight.	Z,ZK	5
21SPOL	Aircraft Technology Reliability Subject deals with tuition of separate attributes of reliability (no failure, vitality, maintainability, and so on) and main criterions of safety of production and working of aerospace engineering. General legalities are in the framework of tuition demonstrated on the example of calculation of reliability of integral characteristics of materials and they are practical illustration of its security in The Czech Police Aviation Department.	Z,ZK	4
21AITM	Air Traffic Management Current ATM system and its functional blocks. View of ATM data (technical architecture and configuration, transmission systems and networks). Data exchange with neighboring ATM systems. Monitoring systems and technical supervision. ATM simulation. ATM conceptions and strategies for next years. EUROCONTROL - CFMU. FAB. ATS's - AOC's data applications.	KZ	4
23SCT	Airport Security Division of airport in terms of security, design, standards and conventions, forms of risk in general, the analysis and management of risk in the ground security, emergency plans, mode of airport security, identification and security systems, radar systems and their role in security operations, scanning systems, X-rays and microwave scanners, intelligence services and security services at the airport, the technology used to ensure the security.	KZ	4
15JBA2	Language - English 2 Grammatical structures and style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.	Z	2

Code of the group: 3.S.NKPL 19/20

Name of the group: 3.sem.nav.komb.PL (od) 19/20

Requirement credits in the group: In this group you have to gain 24 credits

Requirement courses in the group: In this group you have to complete 6 courses

Credits in the group: 24

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
11STS	<b>Stochastic Systems</b> <i>Pavla Pecherková, Evženie Uglickich, Michal Matowicki, Raissa Likhonina</i> <b>Evženie Uglickich</b> Evženie Uglickich (Gar.)	Z,ZK	4	2P+2C+14B	Z	Z
21ERGK	<b>Ergonomy in Aviation Technology</b> <i>Lenka Hanáková, Vladimír Socha</i> <b>Vladimír Socha</b>	Z,ZK	6	18B	Z	Z

21PSAP	<b>Aircraft and Spacecraft Instrumentation</b> <i>Pavel Hovorka Pavel Hovorka</i>	Z,ZK	4	2P+2C+14B	Z	Z
21ULET	<i>Kateřina Stuchlíková, Ondřej Vítovec Kateřina Stuchlíková</i>	Z,ZK	6	3P+1C+16B	Z	Z
21LEN1	<b>Aviation English 1</b> <i>Terézia Pilmannová Terézia Pilmannová</i>	Z	2	0P+2C+10B	Z	Z
15JBA3	<b>Language - English 3</b> <i>Markéta Olehlová, Jitka Heřmanová, Marie Michlová, Lenka Monková, Markéta Vojanová, Peter Mörpuss, Jan Feit, Eva Režlerová, Marek Törnek, .....</i>	Z	2	0P+2C+10B	Z	Z

**Characteristics of the courses of this group of Study Plan: Code=3.S.NKPL 19/20 Name=3.sem.nav.komb.PL (od) 19/20**

11STS	Stochastic Systems	Z,ZK	4			
The subject deals with the problems of mathematical modelling of dynamical systems, estimation of these models and their utilization for prediction. The results are illustrated on practical transportation tasks. Mathematical theory roots from probability and mathematical statistics and they use the methods of the Bayesian probabilistic approach.						
21ERGK	Ergonomics in Aviation Technology	Z,ZK	6			
Stages and processes of aviation technology lifecycle. Software and information systems. Related segments. Key information to each stage. Aviation technology development proposal. Technical requirements definition. Pricing and costs. Aviation technology production. Operation assurance. Modernization, obsolescence and decommission of aviation technology.						
21PSAP	Aircraft and Spacecraft Instrumentation	Z,ZK	4			
The course deals with a theory and description of basic functions, structures and principles of aircraft and spacecraft instrumentation working in a low-frequency band. Within the scope of this course it is possible to get knowledge about instrument boards, propulsion parameters measurements, aerometrical systems, and fuselage health monitoring systems. Furthermore, gyroscopic systems and systems for navigation are also covered.						
21ULET		Z,ZK	6			
21LEN1	Aviation English 1	Z	2			
Aircraft description. Airline business and marketing. Airports and handling services. Maintenance. Air traffic services. Aviation history. Accident investigation. Human factors. Aviation economics. Development of air services. Low cost airlines. Airline history. Market development. Company management. Airport design. Ecology.						
15JBA3	Language - English 3	Z	2			
Grammatical structures and style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.						

Name of the block: Compulsory elective courses

Minimal number of credits of the block: 12

The role of the block: PV

Code of the group: W2-NKPL 21/22

Name of the group: PVP nav.komb.PL 21/22

Requirement credits in the group: In this group you have to gain 12 credits

Requirement courses in the group: In this group you have to complete 4 courses

Credits in the group: 12

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
17W2AM	<b>Application of Marketing Tools in Transportation</b>	KZ	3	8B	L	PV

--------	-------------------------------------	----	---	----	---	----

**Characteristics of the courses of this group of Study Plan: Code=W2-NKPL 21/22 Name=PVP nav.komb.PL 21/22**

17W2AM	Application of Marketing Tools in Transportation	KZ	3
Application of marketing principles in transport issues, marketing tools suitable for transport, case studies of the use of marketing in the sphere of public passenger transport.			
21W2CR	CRM	KZ	3
Introduction to CRM. Analysis of air accidents. Human factor. Error. Historical development of CRM. Health and fitness. Stress and its effect on the human body. Fatigue Sleep & Vigilance. Information Processing. Situational Awareness. Workload Management. Decision Making. Communication. Leadership & Team Behaviour. Automation.			
17W2FM	Financing in Urban Mass Transportation	KZ	3
UMT history and development in Prague and other cities in the world. Building and operation of public tram, bus, and trolleybus networks. Underground building and operation. Other UMT types. UMT development in small towns. Particularities of investment and operation financing of individual UMT types. Historic and present models of UMT financing. Transport inspection and blind passengers. Tourism & UMT. UMT typology & choice of optimum financing.			
21W2FM	Aviation Company Financial Management	KZ	3
Theories of corporate finance - financial statements, budget, forecast. Financial policy of the company. Financial resources - long-term financial resources, depreciation, retained earnings, shares, bonds, loans, leasing, capital. Financial and economic analysis of the company - structure and content.			
15W2HS	Road Transport History	KZ	3
Roads and road traffic in the Ancient Age, corridors of main medieval pathways. Development of road traffic in the modern period, acceleration of road transport development during 1st part of 20th century. Development of road layout, geometric and construction layers. Beginning of modern road civil engineering. Development of road travelling in modern period. History of road interchanges, bridges and traffic control, development of road signs.			
14W2KI	Capital Investment in Transportation and Telecommunications	KZ	3
Financial market, investment decision making - long term goals and investment strategies, long term financing			
21W2LS	Air Traffic Services	KZ	3
Airspace structure in Czech Republic and other countries. Introduction and description of ATS units in Czech Republic. Practical examples of TWR, APP a ACC control. Procedural and radar control. Incidents caused or partially caused by ATS. History of ATS and Czech airspace.			
15W2MS	Sociology for Managers	KZ	3
Sociological approach to a corporation. Corporation and its organization. Corporation and its running - human role and communication. Corporation, its culture and social system. Human's work position in free market economy. Corporate directorship, work groups, adaptation, strife, different roles and positions in corporation.			
21W2MS	Aerospace Engineering Simulation and Modelling	KZ	3
The course is designed as a set of exemplary tasks and problems based on practical aviation issues. The university degree mathematic skills and software applications usage will be necessary for successful figuring out. Both simple tasks, where students create own model themselves (e.g. in Matlab), and more complicated problems where professional developed tools will be applied.			
21W2MC	CNS Systems Modelling	KZ	3
15W2OZ	Health Protection in Transportation and EU	KZ	3
Health protection in transportation in CR in the past and present. Conditions before 1989 and after, current legislature, future prospects. Harmonisation of legislation with other EU members. Fundamental principles of health protection and support in selected EU countries.			
15W2PT	Food in Transportation	KZ	3
The nutrition policy. Interaction transportation and foodstuffs. The health risks. Hygienic safeguard. The practical examples from the Czech Republic and from the world. The issues of dining cars, work trains and other railroad equipment. Legislation.			
21W2PP	Law and Operation in Air Transport	KZ	3
Development of aviation law. International conventions on civil aviation. International organisations and including of the Czech Republic in these organisations. EU legislation and civil aviation. Execution of state administration and state supervision in matters of civil aviation, in accordance with Act No. 49/1997 Col. Facilitation. Responsibilities of air carriers for passengers, luggage and cargo. The safe transport of dangerous goods.			
21W2PL	Operational Aspects of Aerodromes	KZ	3
Operational aspects of aerodromes. Location of aerodrome and orientation of runways. Requirements for apron. Capacity of airports runways and terminals. Operation under winter conditions. Firefighting units. Protection against unlawful interference. Local transport connection. Environmental protection.			
17W2RZ	Control of Transport Processes	KZ	3
Theoretical bases, transport system, decomposition, factors influencing control, quality diagnosis, methods of control, systems for decision making support, risk of decision making, telematics.			
15W2SR	Stylistics and Rhetorics	KZ	3
Basic skills of oral and written expression as a means of human communication. Basic information about speech, articulation, oral and written language. Teaching to speak well-vocal organs, voice training. Language semantics, language syntactic and the pragmatic aspect. Creative thought and its oral and written expression. Practice - cultivating the skills of speech.			
17W2SK	Urban and Regional Rail Transit Systems	KZ	3
Factors influencing transport demand, modal-split, traffic flows distribution on public transit network. Line network optimization and configuration. Timetable designing and evaluation according integrated periodic timetable. Rolling stock circulation, staff and crew services optimization and their order to rosters. Framework legislation, non-barrier effects and preference of public transport. Marketing.			
15W2TS	Technician and Contemporary Society	KZ	3
Why to take off a hat in a room and open a door for a lady, are there simple solutions, science vs belief, do we need to know or is it enough to turn on a PC, it must be true - it's on the Internet and in newspapers, what are the sights for, interest in public affairs - a hangover from the past?			

**List of courses of this pass:**

Code	Name of the course	Completion	Credits
11STS	Stochastic Systems	Z,ZK	4
The subject deals with the problems of mathematical modelling of dynamical systems, estimation of these models and their utilization for prediction. The results are illustrated on practical transportation tasks. Mathematical theory roots from probability and mathematical statistics and they use the methods of the Bayesian probabilistic approach.			

14W2KI	<b>Capital Investment in Transportation and Telecommunications</b> Financial market, investment decision making - long term goals and investment strategies, long term financing	KZ	3
15J2A1	<b>Language - English 1</b> Grammatical Structures and Style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.	Z	2
15JBA2	<b>Language - English 2</b> Grammatical structures and style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.	Z	2
15JBA3	<b>Language - English 3</b> Grammatical structures and style. Selection of conversation topics relating to transportation sciences. Developing perceptive and communicative skills, feedback skills, summarising technical text content, structuring presentations and meeting minutes, elementary rhetorics of English and practical application, formal and technical registers and their use, language of management.	Z	2
15W2HS	<b>Road Transport History</b> Roads and road traffic in the Ancient Age, corridors of main medieval pathways. Development of road traffic in the modern period, acceleration of road transport development during 1st part of 20th century. Development of road layout, geometric and construction layers. Beginning of modern road civil engineering. Development of road travelling in modern period. History of road intercections, bridges and traffic control, development of road signs.	KZ	3
15W2MS	<b>Sociology for Managers</b> Sociological approach to a corporation. Corporation and its organization. Corporation and its running - human role and communication. Corporation, its culture and social system. Human's work position in free market economy. Corporate directorship, work groups, adaptation, strife, different roles and positions in corporation.	KZ	3
15W2OZ	<b>Health Protection in Transportation and EU</b> Health protection in transportation in CR in the past and present. Conditions before 1989 and after, current legislature, future prospects. Harmonisation of legislation with other EU members. Fundamental principles of health protection and support in selected EU countries.	KZ	3
15W2PT	<b>Food in Transportation</b> The nutrition policy. Interaction transportation and foodstuffs. The health risks. Hygienic safeguard. The practical examples from the Czech Republic and from the world. The issues of dining cars, work trains and other railroad equipment. Legislation.	KZ	3
15W2SR	<b>Stylistics and Rhetorics</b> Basic skills of oral and written expression as a means of human communication. Basic information about speech, articulation, oral and written language. Teaching to speak well-vocal organs, voice training. Language semantics, language syntactic and the pragmatic aspect. Creative thought and its oral and written expression. Practice - cultivating the skills of speech.	KZ	3
15W2TS	<b>Technician and Contemporary Society</b> Why to take off a hat in a room and open a door for a lady, are there simple solutions, science vs belief, do we need to know or is it enough to turn on a PC, it must be true - it's on the Internet and in newspapers, what are the sights for, interest in public affairs - a hangover from the past?	KZ	3
16PDP	<b>Principles of Vehicle Design</b> Design of transportation vehicle according to its usage and function. Marketing and user demands. Vehicle dynamics. Propulsion systems. Design process, functional design and vehicle structure. Evaluation of variant concepts. Design phases. Reliability, technological aspects etc.	ZK	2
17W2AM	<b>Application of Marketing Tools in Transportation</b> Application of marketing principles in transport issues, marketing tools suitable for transport, case studies of the use of marketing in the sphere of public passenger transport.	KZ	3
17W2FM	<b>Financing in Urban Mass Transportation</b> UMT history and development in Prague and other cities in the world. Building and operation of public tram, bus, and trolleybus networks. Underground building and operation. Other UMT types. UMT development in small towns. Particularities of investment and operation financing of individual UMT types. Historic and present models of UMT financing. Transport inspection and blind passengers. Tourism & UMT. UMT typology & choice of optimum financing.	KZ	3
17W2RZ	<b>Control of Transport Processes</b> Theoretical bases, transport system, decomposition, factors influencing control, quality diagnosis, methods of control, systems for decision making support, risk of decision making, telematics.	KZ	3
17W2SK	<b>Urban and Regional Rail Transit Systems</b> Factors influencing transport demand, modal-split, traffic flows distribution on public transit network. Line network optimization and configuration. Timetable designing and evaluation accenting integrated periodic timetable. Rolling stock circulation, staff and crew services optimization and their order to rosters. Framework legislation, non-barrier effects and preference of public transport. Marketing.	KZ	3
21AITM	<b>Air Traffic Management</b> Current ATM system and its functional blocks. View of ATM data (technical architecture and configuration, transmission systems and networks). Data exchange with neighboring ATM systems. Monitoring systems and technical supervision. ATM simulation. ATM conceptions and strategies for next years. EUROCONTROL - CFMU. FAB. ATS's - AOC's data applications.	KZ	4
21BLED	<b>Aviation Safety</b> Reliability and system lifecycle. Basics of reliability theory. Reliability mathematical tools. Reliability analysis. Maintenance system. Safety and quality theory. Basic concepts of safety. Managing of safety. Safety management. Safety management strategies. Hazard, risk. Risk management.	Z,ZK	4
21CNSY	<b>CNS Systems</b> Subject provides full technical informations about CNS (communication, navigation, surveillance) systems used in aviation. Systems are presented in perspective of future development.	Z,ZK	4
21ER GK	<b>Ergonomy in Aviation Technology</b> Stages and processes of aviation technology lifecycle. Software and information systems. Related segments. Key information to each stage. Aviation technology development proposal. Technical requirements definition. Pricing and costs. Aviation technology production. Operation assurance. Modernization, obsolescence and decommission of aviation technology.	Z,ZK	6
21KST	<b>Space Technology</b> Universe and its basic characteristics. Fundamentals of astrophysics. Kepler's laws. Solar system. Earth's and its atmosphere and outer space. Space transport vehicles. Rockets and rocket engines and their structure and operational characteristics. Space crafts and satellites, space flight. Orbital mechanics. Application of space technologies for global navigation and communication. Space exploration and piloted space flights and missions.	ZK	3
21LEN1	<b>Aviation English 1</b> Aircraft description. Airline business and marketing. Airports and handling services. Maintenance. Air traffic services. Aviation history. Accident investigation. Human factors. Aviation economics. Development of air services. Low cost airlines. Airline history. Market development. Company management. Airport design. Ecology.	Z	2
21LKSK	<b>Aircraft Structures</b> History and development of aeronautics. Classification of aircraft. Fundamental parts and systems. Safety, reliability and airworthiness. Limit states of aircraft structure and strength certification. Aviation regulations. Load factor. Manoeuvring loads. Manoeuvring envelope of load factor. Gust load. Gust load factor and envelope of gust load factor.	Z,ZK	6

21NSR	<b>Navigation and Flight Management Systems</b> Navigation. Radionavigation. Satellite navigation. Flight management system. Autopilot. FMC. Practical execution of flight.	Z,ZK	5
21PLDO	<b>Air Carrier Operation</b> Mission and importance of air transport. Legislation. Airlines - structure, strategy. Performances in air transport. Cost structure. Fuel management. Cargo. Aircraft maintenance (organization) and economics of aircraft operation. Ground handling and other services. Safety / Security / Quality and Compliance monitoring. Revenue management. Air transport and environment.	Z,ZK	5
21POHK	<b>Aircraft Propulsion</b> Theoretical background. Earth atmosphere. Classification of aircraft engines, characteristics, domains of use, comparative parameters, characteristics and criteria. Energy transformation within aircraft propulsion systems, thermal cycles analysis, working substances, environmental constraints, efficiencies. Reciprocating and turbine engines, their construction and material characteristics and performance characteristics. Environmental impacts.	Z,ZK	7
21PSAP	<b>Aircraft and Spacecraft Instrumentation</b> The course deals with a theory and description of basic functions, structures and principles of aircraft and spacecraft instrumentation working in a low-frequency band. Within the scope of this course it is possible to get knowledge about instrument boards, propulsion parameters measurements, aerometrical systems, and fuselage health monitoring systems. Furthermore, gyroscopic systems and systems for navigation are also covered.	Z,ZK	4
21SPOL	<b>Aircraft Technology Reliability</b> Subject deals with tuition of separate attributes of reliability (no failure, vitality, maintainability, and so on) and main criterions of safety of production and working of aerospace engineering. General legalities are in the framework of tuition demonstrated on the example of calculation of reliability of integral characteristics of materials and they are practical illustration of its security in The Czech Police Aviation Department.	Z,ZK	4
21ULET		Z,ZK	6
21W2CR	<b>CRM</b> Introduction to CRM. Analysis of air accidents. Human factor. Error. Historical development of CRM. Health and fitness. Stress and its effect on the human body. Fatigue Sleep & Vigilance. Information Processing. Situational Awareness. Workload Management. Decision Making. Communication. Leadership & Team Behaviour. Automation.	KZ	3
21W2FM	<b>Aviation Company Financial Management</b> Theories of corporate finance - financial statements, budget, forecast. Financial policy of the company. Financial resources - long-term financial resources, depreciation, retained earnings, shares, bonds, loans, leasing, capital. Financial and economic analysis of the company - structure and content.	KZ	3
21W2LS	<b>Air Traffic Services</b> Airspace structure in Czech Republic and other countries. Introduction and description of ATS units in Czech Republic. Practical examples of TWR, APP a ACC control. Procedural and radar control. Incidents caused or partially caused by ATS. History of ATS and Czech airspace.	KZ	3
21W2MC	<b>CNS Systems Modelling</b>	KZ	3
21W2MS	<b>Aerospace Engineering Simulation and Modelling</b> The course is designed as a set of exemplary tasks and problems based on practical aviation issues. The university degree mathematic skills and software applications usage will be necessary for successful figuring out. Both simple tasks, where students create own model themselves (e.g. in Matlab), and more complicated problems where professional developed tools will be applied.	KZ	3
21W2PL	<b>Operational Aspects of Aerodromes</b> Operational aspects of aerodromes. Location of aerodrome and orientation of runways. Requirements for apron. Capacity of airports runways and terminals. Operation under winter conditions. Firefighting units. Protection against unlawful interference. Local transport connection. Environmental protection.	KZ	3
21W2PP	<b>Law and Operation in Air Transport</b> Development of aviation law. International conventions on civil aviation. International organisations and including of the Czech Republic in these organisations. EU legislation and civil aviation. Execution of state administration and state supervision in matters of civil aviation, in accordance with Act No. 49/1997 Col. Facilitation. Responsibilities of air carriers for passengers, luggage and cargo. The safe transport of dangerous goods.	KZ	3
22SLN	<b>Air Traffic Accident Investigation</b> Specification of forensic expertise. Regulations and establishments for exceptional events in air traffic. Analysis of air traffic accidents (cause investigation, time course, human factor). Air traffic accidents prevention. Exceptional aviation event report. Analysis of particular accidents in air traffic.	KZ	2
23SCT	<b>Airport Security</b> Division of airport in terms of security, design, standards and conventions, forms of risk in general, the analysis and management of risk in the ground security, emergency plans, mode of airport security, identification and security systems, radar systems and their role in security operations, scanning systems, X-rays and microwave scanners, intelligence services and security services at the airport, the technology used to ensure the security.	KZ	4
