SSI System Engineering

Z.ZK

5

System conception, Clasification of systems. Open systems, closed systems, deterministic systems, stochastic systems, hard and soft systems. Optimization methods for systems, methods of graph theory, optimization of continuous systems, branch and bound methodology, Bellman's princip of optimization. Optimization and simulation of stochastic systems. Graphic descriptions of systems, hierarchical diagram, ER diagram, structure chart. Soft systems methodology.

16ZP Elements of Law

Z.ZK

The purpose of education is to give students a basic understanding of legal issues that will be useful to them in an elementary way to understand the extent legal reasoning, the principles of creation, interpretation and application of the law and the relation of the public authority. Students also gain basic knowledge of selected fields of law in force, partially differentiated according to their specialization. On the basis of that knowledge should be able to graduate to know clearly contrary to fundamental legal principles and to communicate adequately with qualified attorneys.

04JA2 English Language 2 Z 2

The course aims at business and managerial language, as used in company management. The student's skills in foreign language speaking and writing are to be developed in the area of management (work and motivation, company structure, managing across cultures, recruitment). The students are also acquinted with the most up-to-date professional jargon dealing with project management and project planning. Further training in the proper use of grammar structures is provided simultaneously with vocabulary extension.

6CRP Enterprise and Project Management Control

Z,ZK

5

The course is focusing on introducing the controlling (management control) as an integrated approach to enterprise management and project management. The course focuses on presentation of the key linkages among single functional areas, key processes and activities and other entities in the enterprise management system and in project management, as its important part. The methods and other managerial tools are discussed. The recommendations, how to apply them to keep the system highly performed and integrated, are explained and trained. The solved cases and models are used to demonstrate major principles, rules and procedures. The performance management and its key measures are strongly stressed.

16IS Statistics Z,ZK 4

This subject acquaints students with basic statistical methods. Basic statistical methods treat of description one-dimensional statistical population and of regression and correlation analysis. A student arrives at probability distributions as models and at tests of histograms. Then the capitols of mathematic statistic follow - random sampling and sampling distributions, statistical estimate (interval and point), statistical tests and analysis of variance. In the end of this course student acquaints with economic statistics - index numbers, time series.

16MPR Marketing and Public Relations

7

4

Introduction to the marketing concepts and adoption of marketing categories. Understanding elements of marketing planning and management using marketing tools in practice with the emphasis on the ability to apply marketing principles in a different fields of enterprise.

6PRI Project Management Innovation

7.7K

5

Introduction to the various aspects of effectiveness escalation in project management. Kaizen methodology, Reingeneering, Just in time, Balanced Scorecard, Value Analyse etc. Tuition suitably links sequence of managerial and technical subject categories and simultaneously reacts to topical business and graduation theses requirements. The course is designed to provide engineers with the basic information and skills necessary to manage innovational projects of the enterprise. Teaching methods will include lectures, group presentations and discussions of cases as well as other exercises.

16RP

Project Management

Z,ZK

5

The subject defines a project and a lifecycle of the projects. The organization of a project team and relations to organizations will be explained. Other subjects are planning, resource management, using software for the project management, the process of a feasibility study development. Students will practice the methods for decision making applicable to projects as the decision trees development and the problem analysis.

16SR

Strategic Management

Z,ZK

5

The aim of the course is to win necessary knowledge for strategy formulation, implementation and evaluation. Further aim for students is to master general knowledge in management of economical subjects and public administration institutions and understanding of basic models and instruments which are used in managerial practice. On the grounds of gained competences the students are able to process basic procedures of strategic management. Chosen business strategy is a foundation for the construction of the strategic plan.

16RP **Project Management** Z,ZK 5 The subject defines a project and a lifecycle of the projects. The organization of a project team and relations to organizations will be explained. Other subjects are planning, resource management, using software for the project management, the process of a feasibility study development. Students will practice the methods for decision making applicable to projects as the decision trees development and the problem analysis. **16SI** System Engineering Z,ZK 5 System conception, Clasification of systems. Open systems, closed systems, deterministic systems, stochastic systems, hard and soft systems. Optimization methods for systems, methods of graph theory, optimization of continuous systems, branch and bound methodology, Bellman's princip of optimization. Optimization and simulation of stochastic systems. Graphic descriptions of systems, hierarchical diagram, ER diagram, structure chart. Soft systems methodology. 16SK Social Competencies in Project Management The social aim of the course "Social competencies in project management" is to improve students' skills in social competencies in project management with a focus on the competence of project manager and team members in relation to the specifics of teamwork and IPMA. The course is devoted to areas such as teamwork, leadership styles, team coaching, delegation of authority, motivation, basic types of social action, conflict resolution in teams, communication - brainstorming, moderation, conducting meetings, the discussion). Strategic Management The aim of the course is to win necessary knowledge for strategy formulation, implementation and evaluation. Further aim for students is to master general knowledge in management of economical subjects and public administration institutions and understanding of basic models and instruments which are used in managerial practice. On the grounds of gained competences the students are able to process basic procedures of strategic management. Chosen business strategy is a foundation for the construction of the strategic plan. Accounting Z,ZK The objective of the subject is to become acquainted with the significance of accounting for enterprise management, with the content and formal structure and realization of the stages and changes of the economic results during the accounting period; further with accounting as a system needful for tax declaration and not least as a resource to financial analysis. 16XBS **Balanced Scorecard** The aim of the course is to gain necessary knowledge for the right strategy implementation in an enterprise and by use of it to evaluate performance parameters. These performance parameters used by planning of firm's development and by results evaluation are followed in complex approach. Further the student is able to master performance parameters in business decision making processes and formulate tasks for teams which procure business internal processes. Gain knowledge are applicable for making business projects. Competitive Intelligence 16XCI Z.ZK The course is designed as an elective for master degree students in the field of Applied Informatics and Informatics in Business. Includes issues defining the specific information needs for support Strategic Planning of the organization, namely to find relevant information sources, including external ones, analyzing and the subsequent creation of Knowledge Base. Relevant is also effective communication of these findings to senior management of an organization. 16XDB **Description in Business** Z,ZK Development of language knowledge and skills focusing on special purposes of the study programme with the main aim to adequately use the language in both speaking and writing. Second Foreign Language The subject focuses on everyday communication in a foreign language other than English on the A1? A2 level, on expressing opinions, and understanding of working and language customs of other cultures. The seminar emphasizes the importance of comprehensibility and correct understanding in a foreign language culture, the ability to manage everyday study and working tasks, including written communication, understanding of cultural differences influencing communication and adaptation to an intercultural environment. Outline of the subject: Introductions, welcoming, small talk Agreement, disagreement, questions Expressing present, past, and future Travelling Eating habits Education Intercultural context and its influence on interaction and communication The most common mistakes as a cause of misunderstanding Specificities and different accents of individual foreign languages Language practice and activities on individual topics CEFR? A1-2 16XDO Z,ZK Presentation Skills in English 5 Development of language knowledge and skills focusing on better comprehension and comprehensibility of speaking and presenting opinions, services, study programmes and products. European Social Fund 5 16XFF Z.ZK European social fund and its position among other implemets of regional development and reaching of economic and social cohesion of EU and the Czech republic. Experiences gained during the realization of operational programmes financed by ESF and Initiative Association EQUAL financed by ESF in programming period 2000 ? 2006 and their transmission to the new programming period. Implementation of programmes financed by European social fund in Czech republic. Horizontal topics of European social fund and practical examples of their accomplishment in the proces of program and ESF project management. 16XENU Sustainable Development: Economics and Policy 5 16XFU Structures and Legislation of the European Union Z,ZK Content of the subject: Brief historical development of ideas concerning unification of Europe and forming of European Union. Contemporary external and internal environment of EU in globalised world. Institutions and other bodies of EU? their characteristics, function and interrelationships between them. Basics and principles of EU legislation, the process of creating and approving and EU constitution. Unified european market and its strengths and weaknesses, economic competition, currency union, defence and development policy and implements for their realisation (particulary for structural policy). Concept of welfare state and accomplishment of it in member states of EU. Process of the EU enlargement and its orientation and employment in globalized world. Visions, goals and priorities of EU and expected development within new programming period 2007 ? 2013. Philosophical, Psychological, and Pedagogical Basics of Personality Development To introduce problems of development and creation of cretivity based on philosophy, psychology and pedagogy. The subject is focused on creativity and age, theory of creativity, process of creativity, barriers of creativity, dvelopment of creativity. Inter-cultural Psychology 16XIP Z.ZK The subject "Inter-cultural psychology" concentrates on gaining knowledge and skills for working in international teams, primarily of European Union environment, but students will have a chance to learn about other important world cultures as well - like leading American or Asian cultures. The content of this subject includes different aspects of intercultural interactions and understanding cultural differences - as language, habits, values or prejudices. Important parts of this subject are practical examples and intercultural communication exercises. 16XM Managing Company Development The lectures are aimed to familiarize students with the legislative conditions of the entrepreneurship, essential theoretical conceptions in the companies' management, company's managerial activities, and relation between management and marketing, strategic management and marketing of company. Within the subject there will be clarified the concept of entrepreneurship and company in the context of the valid legislation focused on the Commercial Code, the Trades Licensing Act, and other legislation, further there will be described goals and functions of company, essential methods, techniques, and activities of company managers. 16XMA Mathematics for Applications in Management Introduction to the issue of mathematic applications in macroeconomics and microeconomics. Applications of mathematics: local and absolute extremes of function of one and several variables, classification of quadratic forms, Lagrange's multipliers, bound extremes, linear differential equations. Applications of theory of probability, operation research, decision analysis: models of linear programming, models of queuing, models of fronts, models of repair and maintenance, models of structural analysis, models of simulations. 16XMK Developing Intercultural Communicative Competence Z.ZK The seminar will focus on the importance of accuracy and comprehension in communication in a foreign language, and highlight cultural differences influencing communication, and examine the role of language means in intercultural negotiations. Outline of the subject: . Approaches to culture . Cultural and language context in communication . Intercultural theories and their influence on behaviour and language expression. International English as lingua franca. The most common mistakes as a cause of misunderstanding. Language practice and activities. Case studies on individual topics Language level: CEFR B2

The purpose of education is to give students a basic understanding of legal issues that will be useful to them in an elementary way to understand the extent legal reasoning, the principles of creation, interpretation and application of the law and the relation of the public authority. Students also gain basic knowledge of selected fields of law in force, partially differentiated according to their specialization. On the basis of that knowledge should be able to graduate to know clearly contrary to fundamental legal principles and to communicate adequately with qualified attorneys.
