and evaluation of a business plan/project. Students are able to understand accesses used on tactical and operational managerial levels.		
16XSP Management of Construction and Developers´ Projects	Z,ZK	5
The course will acquaint the students with the preparation of developers' projects, urban planning and projects designed for building permits. Marketing supply and demand analysis and forms of sales are among the key issues the course will deal with. The other areas include: ?Acquisition of estates		- 1
area. ?Financining of developer's project ? financial analysis aimed at recoverability and the overall feasibility, financial resources, credits terms and	-	- 1
time planning, cash flow administration, accounting, requirements for mortgage refinancing. ?Risk management ? definition, evaluation, restrictions	· · · · · · · · · · · · · · · · · · ·	- 1
managegement, final evaluation ?Management of project implementation and its organisation, change management with clients and suppliers.		
16XMS Modernisation of Public Administration	Z,ZK	5
This course focuses on initial conditions and prerequisites for changes in public administration and management of public administration, on different and private sectors. It also deals with the potentials to apply management tools to individual areas of Public Administration Management which includes		
and private sectors. It also deals with the potentials to apply management tools to individual areas of Public Administration Management which inclu administration, strategic development documents for territorial units on various levels of administration, human resources management, principles	_	
management methods (models CAF, EFQM, BSC, benchmarking); public relations, local citizens' participation in public administration, the role of a cit	_	
of individual areas of administration.		
16XOP Valuation of Firm and Projects	Z,ZK	5
The aim of the course is to acquaint students with the measurement and management of enterprise value so that they are able to make qualified es depending on the stage of its life cycle, expected development and current financial condition. Students will learn about options of approaching the		
gain skills in the application of basic methods. Practical skills will be acquired through case studies.	and onou	J 2 0 0 10

Presentation and Communication Skills By practicing and exercising, the students learn how to communicate successfully and how to prepare and provide speeches adequate for different situations. They will understand principals of verbal and nonverbal communication, structure and different drafts of informative and persuasive speeches, they will go through creative writing and some basic vocal training. They will learn how to use different methods of argumentation, how to deal with questions and to use visual aids. 16XDO Presentation Skills in English Development of language knowledge and skills focusing on better comprehension and comprehensibility of speaking and presenting opinions, services, study programmes and products. 16XRM Restoration and Urban Development The course provides an insight into the issue of city restoration, its types and tools, deals with sustainable development, urban restoration and sites conservation. The UNESCO heritage sites, European cultural cities, development strategy for regional systems and settlements, as well as restoration of small settlements development belong to the essential parts of the course. 16XR Reconditioning and Rural Development Obecným cílem p edm tu je p edstavit spole enský a hospodá ský význam venkova v souvislosti s využíváním p dy, správou p írodních zdroj a životního prost edí a s údržbou krajiny. Ke specifickým cíl m pat í získání základních znalostí a porozum ní problematice venkova a politik pro regeneraci a rozvoje venkova jak z národní, tak z EU úrovn . Pozornost je také v nována nástroj m pro udržitelný rozvoj venkova pomoci program , dotací, služeb a spolupráce. 16XRZ Administration of Municipalities and Regions Z.ZK The course deals with sustainable development, financial and information systems of municipalities and the strategies as worked out for the following areas: ?development of micro-regions ? development of big territorial units ?non-profit organisations ?implementation of changes in regions ?investments of municipalities ?choice of financial resources ?project assessments for credit financing of strategic projects ?PR strategy planning ?regional operational programs ?regional development agencies in the period of preparation, processing and implementation of strategies ?European Regional Planning Charter border and cross-border cooperation 16XV **English for Meetings and Negotiations** Z.ZK Consolidation and strengthening of the language skills needed for management purposes with the focus on improvement in practical communication 16XSC **Smart Cities and Smart Regions** Z,ZK 5 16XNSR Municipalities and Regions Development Strategy Z.ZK 5 The aim of the course is to understand the mission and the principles of regional/municipal development, the complexity of regional politics and the concepts such as sustainability, subsidiarity and partnership; to create a strategy of regional/municipal development, a plan of communication with stakeholders, institutions and general public; to discuss the challenge of public issues and public choice; to use the models and tools of practical strategic planning, modelling scenarios and making a choice of the most appropriate strategy.

16XEU Structures and Legislation of the European Union

Content of the subject: Brief historical development of ideas concerning unification of Europe and forming of European Union. Contemporary external and internal environment of EU in globalised world. Institutions and other bodies of EU? their characteristics, function and interrelationships between them. Basics and principles of EU legislation, the process of creating and approving and EU constitution. Unified european market and its strengths and weaknesses, economic competition, currency union, defence and development policy and implements for their realisation (particulary for structural policy). Concept of welfare state and accomplishment of it in member states of EU. Process of the EU enlargement and its orientation and employment in globalized world. Visions, goals and priorities of EU and expected development within new programming period 2007 ? 2013.

Urban Planning and Regional Development

Introduction to Urban Planning and Regional Development. System approach to settlements: components, features, infrastructure. Ecology and settlements. Fundamental environmental legislation. Culture and settlements. Regeneration of towns and conversation. Landscape and settlements. Countryside issues. Social and economic infrastructure of settlements. Humanization of housing estates. Problems of urban sprawls. Problems of brownfields. Policy of settlements and regions development. Fundamental urban planning legislation. Limits of land resources use. Perfect town.

dealing with proje	ject management and project planning. Further training in the proper use of grammar structures is provided simultaneously with vocabu	ılary extension. In	addition to
this, the aim	of the course is the acquisition of language skills, writing strategies and active vocabulary. The course focuses on practical application	of the given phen	omena.
Methodologically,	the course relies on formal language analysis, systematic development of specialised vocabulary, competent use of relevant grammar,	, systematic pract	ice of typica
	case-study situations, teamwork and giving feedback.

potential. Also time management and delegation, situational management, performance evaluation and training of leading an evaluation discussion. Last third of the subject covers succession planning, motivation, influencing company culture and crisis situation solving. 16PR Regional Policy Z.ZK 4 The provision of integral theoretical and practical knowledge of the regional policy in the European Union and in the Czech Republic with emphasis of the conception role of state, regional and local authorities related to effective and balanced development of all regions. Programming in the CR and in the EU Introduction to basic approaches of programming in the CR and in the EU. Getting an overview of the programs implemented in the Czech Republic within the economic and social cohesion and programs implemented by national funds. Emphasis on basic principles of project design, acquisition of the ability to create a project proposal to support development of the city or region. Regional Demography The main aim of this course is to acquaint the students in detail with the findings and methods of regional demography. To teach them to analyse given regions with the help of both demographic and statistical methods and to acquaint them with the demographic situation with regard to the regions of the Czech Republic and also with the demographic situation in the world with special focus on migration and its significance. 16RMF Regional and Local Economy 7.7K Regional and municipal economy deals with social? economic development of regions and towns. It is based on spatial application of common economic theory and regional economy. The main part of the subject is analysing the processes that lead to spatial organization of the society. Another important part is analysing the government sector of regions and towns and the possibilities of influencing by the authorities that have responsibility for development of regions and towns. The subject contains also key concepts and pieces of knowledge from the field of territorial finance, connection between territorial finance, state budget and extra-budgetary funds and then the basic structure of incomes and expenses of territorial budget with an emphasis on the budgets of municipalities and regions of Czech republic. Students will also learn the theoretical foundations of the subject, especially the localization 16RP Project Management The subject defines a project and a lifecycle of the projects. The organization of a project team and relations to organizations will be explained. Other subjects are planning, resource management, using software for the project management, the process of a feasibility study development. Students will practice the methods for decision making applicable to projects as the decision trees development and the problem analysis. System Engineering System conception, Clasification of systems. Open systems, closed systems, deterministic systems, stochastic systems, hard and soft systems. Optimization methods for systems, methods of graph theory, optimization of continuous systems, branch and bound methodology, Bellman's princip of optimization. Optimization and simulation of stochastic systems. Graphic descriptions of systems, hierarchical diagram, ER diagram, structure chart. Soft systems methodology. 16SR Strategic Management Z,ZK The aim of the course is to win necessary knowledge for strategy formulation, implementation and evaluation. Further aim for students is to master general knowledge in management of economical subjects and public administration institutions and understanding of basic models and instruments which are used in managerial practice. On the grounds of gained competences the students are able to process basic procedures of strategic management. Chosen business strategy is a foundation for the construction of the strategic plan. 16SRG Socio-economic Geography 5 The subject helps to understand the development, current situation and the main trends in economic distribution and other social? economic activities of man on different regional levels. Students should get basics of geographical thinking, they should understand problems in territorial context and the rules of development. Urban Planning and Regional Development 16UP 7.7K Introduction to Urban Planning and Regional Development. System approach to settlements: components, features, infrastructure. Ecology and settlements. Fundamental environmental legislation. Culture and settlements. Regeneration of towns and conversation. Landscape and settlements. Countryside issues. Social and economic infrastructure of settlements. Humanization of housing estates. Problems of urban sprawls. Problems of brownfields. Policy of settlements and regions development. Fundamental urban planning legislation. Limits of land resources use. Perfect town. 16XBS **Balanced Scorecard** Z.ZK The aim of the course is to gain necessary knowledge for the right strategy implementation in an enterprise and by use of it to evaluate performance parameters. These performance parameters used by planning of firm's development and by results evaluation are followed in complex approach. Further the student is able to master performance parameters in business decision making processes and formulate tasks for teams which procure business internal processes. Gain knowledge are applicable for making business projects. 16XCI Competitive Intelligence The course is designed as an elective for master degree students in the field of Applied Informatics and Informatics in Business. Includes issues defining the specific information needs for support Strategic Planning of the organization, namely to find relevant information sources, including external ones, analyzing and the subsequent creation of Knowledge Base. Relevant is also effective communication of these findings to senior management of an organization. **16XD** Transport Systems The course will acquaint the students with> ?basic features of individual kinds of transport (road, railway, air, water) ?relations between transport and territory. ?transport surveys: logistics in in large territorial units, regions, towns and villages. ?reciprocal relations between a transport route and territory. ?public, individual, cargo transport (freight)? prospective of further transport development in Europe (EU) and the Czech Republic (national transport network), the relation of urban and transport planning ?transport and environment, noise and vibration, exhaust fumes, accidents, land confiscation, energy consumption ?the impact of transport systems upon landscape and settlements ?transport and sustainability 16XDB **Description in Business** 5 Development of language knowledge and skills focusing on special purposes of the study programme with the main aim to adequately use the language in both speaking and writing. 16XDO Presentation Skills in English 5 Development of language knowledge and skills focusing on better comprehension and comprehensibility of speaking and presenting opinions, services, study programmes and products. 16XEF European Social Fund Z.ZK European social fund and its position among other implemets of regional development and reaching of economic and social cohesion of EU and the Czech republic. Experiences gained during the realization of operational programmes financed by ESF and Initiative Association EQUAL financed by ESF in programming period 2000 ? 2006 and their transmission to the new programming period. Implementation of programmes financed by European social fund in Czech republic. Horizontal topics of European social fund and practical examples of their accomplishment in the proces of program and ESF project management. 16XENU Z.ZK Sustainable Development: Economics and Policy 5 Z.ZK 16XFU Structures and Legislation of the European Union Content of the subject: Brief historical development of ideas concerning unification of Europe and forming of European Union. Contemporary external and internal environment of EU in globalised world. Institutions and other bodies of EU ? their characteristics, function and interrelationships between them. Basics and principles of EU legislation, the process of creating and approving and EU constitution. Unified european market and its strengths and weaknesses, economic competition, currency union, defence and development policy and implements for their realisation (particulary for structural policy). Concept of welfare state and accomplishment of it in member states of EU. Process of the EU enlargement and its orientation and employment in globalized world. Visions, goals and priorities of EU and expected development within new programming period 2007 ? 2013. Philosophical, Psychological, and Pedagogical Basics of Personality Development To introduce problems of development and creation of cretivity based on philosophy, psychology and pedagogy. The subject is focused on creativity and age, theory of creativity, process of creativity, barriers of creativity, dvelopment of creativity.

	16XV	English for Meetings and Negotiations	Z,ZK	5	
Consolidation and strengthening of the language skills needed for management purposes with the focus on improvement in practical co				ommunication.	
	16ZP	Elements of Law	Z.ZK	4	

The purpose of education is to give students a basic understanding of legal issues that will be useful to them in an elementary way to understand the extent legal reasoning, the principles of creation, interpretation and application of the law and the relation of the public authority. Students also gain basic knowledge of selected fields of law in force, partially differentiated according to their specialization. On the basis of that knowledge should be able to graduate to know clearly contrary to fundamental legal principles and to communicate adequately with qualified attorneys.
