Human communication represents an irreplaceable phenomenon in human activity, as it is present in practically all of his activities. The same applies (with specific modifications) to the activities of managers. So you can't not communicate - you can only communicate badly, well and excellently.

2371047	Automatic Control	Z,ZK	5
Automatic control	lers are important part of many industrial processes. The goal of this course is to introduce students into basic knowledge of automat	ic control theory a	nd practice
ike transfer functio	ns, open versus closed loop control, design of controllers and frequency based analysis of control systems. The course also concentra	tes on logic contro	ol and contro
via programmab	le logic controllers. Some seminaries are arranged in laboratories where practical skills and control engineering methods are trained.	Students begin to	work with
	MATLAB software as a common platform of control engineers.		
2372041	Computer Support for Study	KZ	3
he course introdu	ces students into creating technical and professional documents on computers or Web and into realizing technical computations with t	he use of compute	ers. Student
gain practic	al skills by creating an essay in a text editor, by realizing technical computations with a spreadsheet calculator, and by creating techni	cal-based WWW	page.

2383009	Communication and Dealing with People	Z	2
Human communic	cation represents an irreplaceable phenomenon in human activity, as it is present in practically all of his activities. The same applies (with specific modi	fications) to
	the activities of managers. So you can't not communicate - you can only communicate badly, well and excellently.
