Not only the significant development of science and technology has a fundamental influence on the transformation of didactic means. Nowadays, they occupy an increasingly important place in the activities of both teacher and pupil in teaching. Even in the future, it can be assumed that their position in the educational process can be strengthened as science and technology develop. Didactic means is also another basic didactic category. In this course we will focus on the basic characteristics, overview of didactic resources and didactic function and categorization of teaching aids. In many technical subjects, pupils often work in laboratories, so the didactics of laboratory work (classical, remote, virtual) and its specifics are included. We will focus in more detail on the motivation in the laboratory, preparation of laboratory tasks and tasks for practical activities and verification of students' readiness for laboratory tasks. Intensification of education currently puts the relationship between teacher and modern electronic techniques in a different position. It is necessary to address the question: "How should a good teacher use electronic learning opportunities in order to increase the didactic effectiveness of his / her pedagogical activities?".

	Not only the significant development of science and technology has a fundamental influence on the transformation of didactic means. Nowadays, they occupy an increasingly important place in the activities of both teacher and pupil in teaching. Even in the future, it can be assumed that their position in the educational process can be strengthened as science and technology develop. Didactic means is also another basic didactic category. In this course we will focus on the basic characteristics, overview of didactic resources and didactic function and categorization of teaching aids. In many technical subjects, pupils often work in laboratories, so the didactics of laboratory work (classical, remote, virtual) and its specifics are included. We will focus in more detail on the motivation in the laboratory, preparation of laboratory tasks and tasks for practical activities and verification of students' readiness for laboratory tasks. Intensification of education currently puts the relationship between teacher and modern electronic techniques in a different position. It is necessary to address the question: "How should a good teacher use electronic learning opportunities in order to increase the didactic effectiveness of his / her pedagogical activities?".
