The course is devoted to the issue of man in social situations. Students will get acquainted with basic socio-psychological knowledge that is directly or indirectly related to the teacher's activities. The dynamics of small social groups and interactions are studied, as well as issues related to communication (basics of communication, types of communication). Attention is paid to attitudes and their creation, conflicts and their solutions. Another important topic is the socialization of personality and social role. The acquisition of this knowledge at the theoretical level is associated with references to their application in the practice of teachers, especially in terms of individual approach to students, teamwork and contacts with the general public.

Not only the significant development of science and technology has a fundamental influence on the transformation of didactic means. Nowadays, they occupy an increasingly important place in the activities of both teacher and pupil in teaching. Even in the future, it can be assumed that their position in the educational process can be strengthened as science and technology develop. Didactic means is also another basic didactic category. In this course we will focus on the basic characteristics, overview of didactic resources and didactic function and categorization of teaching aids. In many technical subjects, pupils often work in laboratories, so the didactics of laboratory work (classical, remote, virtual) and its specifics are included. We will focus in more detail on the motivation in the laboratory, preparation of laboratory tasks and tasks for practical activities and verification of students' readiness for laboratory tasks. Intensification of education currently puts the relationship between teacher and modern electronic techniques in a different position. It is necessary to address the question: "How should a good teacher use electronic learning opportunities in order to increase the didactic effectiveness of his / her pedagogical activities?".

U51C0105 | Environmental Education | Z | 3
Environmental education is taken in all developed countries as a part of basic as well as vocational and tertiary education. There is a long tradition of Environmental education, upbringing and popular cultural activities in the Czech Republic ("Environmentální vzd lávání, výchova a osv ta" abbreviated in Czech as EVVO). An important milestone is represented by

and popular cultural activities in the Czech Republic ("Environmentální vzd lávání, výchova a osv ta" abbreviated in Czech as EVVO). An important milestone is represented by adoption of the basic strategic document The National Programme of Environmental Education, Upbringing and Enlightenment in the Czech Republic in 2000 - it has secured long-term development of EVVO in the Czech Republic.

U51C0104 Evaluation and Self-evaluation in School Z 3

Framework structure and criteria for school self-evaluation. Objectives School self-evaluation, the effectiveness of measures to improve the quality of the SEP. The main areas of school self-evaluation, such as conditions, course learning outcomes, the challenge of the educational process and the level of the individual school results and educational activities, objects, etc.. The rules and schedule school self-evaluation. Implementing principles of quality management, quality in terms of education - general approaches and specific training. Application of internationally recognized quality management procedures, taking into account the conditions of schools and school facilities. Fulfilling the principles of quality expectations from the school staff.

U51C0308 Intercultural Psychology Z 3

The course is designed to build the core theoretical knowledge and to train basic skills within cross-cultural psychology. Personal experience and self-management development comply the theoretical part.
