Management is a key discipline in the life of a company, institution, and society. Modern management trends fundamentally change its essence and content, methods and tools, while changes are getting faster. Knowing the basics of management is a necessity not only for managers, practically for all employees who hold key positions in the company or institution. However, it is not just a question of taking a basic course, managers must be prepared for lifelong learning and adaptation to new trends, knowledge, methods and tools. The course deals with the basics of management in the context of its modern trends and is therefore the starting point for further study of managerial and economic fields at the university.

U63E4201	Macroeconomics	ZK	3
This course provides basic macroeconomic concepts to understand how a country operates in terms of its markets, aggregate variables, equations, and trade-offs. Graphical representations of equilibrium conditions are extensively used for easy comprehension and flexibility. The canonical IS-LM (investment-saving, liquidity-money) model, describing the goods market and financial markets in the short run, is extended by the labor market and thus by the Phillips curve in the medium run. It is further taken to the open economy setting and presented as the famous Mundell-Fleming model, including the policy trilemma or impossible trinity concept. The effects of fiscal policy and monetary policy on the domestic economy are summarized as well. The history of modern macroeconomics concludes the course. The main textbook is Blanchard (2021). This course has only lectures, no seminars.			
U63C4201	Macroeconomics	ZK	3
Subject introduces students with functioning of economy in terms of macroeconomic variables that are framed in theories of economic growth derived from basic economic schools. These schools have overlaps to macroeconomic policy and its tools. Macroeconomics and its analysis makes familiar with economic phenomenon and problems of national economy and equilibrium at aggregate level. It also familiarizes with economic policy, its goals and efficiency of using its tools of exogenous and endogenous monetary and fiscal policy.			
U63C4302	Corporate Financial Management	Z,ZK	6
The aim is to widen and deepen knowledge and skills in the field of financial engineering instruments, the financing needs of the company, as well as performance analysis. The main emphasis will be placed on understanding the company in its entirety and complexity, particularly with regard to the basic function of the target enterprise, increase market value and maximize wealth for shareholders.			
U63C4101	Statistics 2	Z,ZK	6
The course develops on the Statistics I themes; students will receive an extension basic principles of statistical knowledge, which they have acquired during the study Statistics I. Deepening relates to the field of random variables - random vector field and non-parametric testing. The other topics below mentioned is extending the knowledge acquired in previous Statistics I course. After completing the course, students will be ready to use the complicated methodological apparatus suitable for extraction of knowledge from both quantitative and qualitative data files.

32BE-P-INPL-01	Innovation Policies	KZ	3
Technological, entrepreneurial, social, and institutional innovations are a key factor helping societies to adapt to quickly changing external conditions. The ability to innovate depends on a number of slow-to-change factors like education, institutional quality, research infrastructure, entrepreneurial spirit. Policy framing offers a much more flexible, yet also vital, point of intervention. This entails ensuring good communication channels between various sectors (triple/quadruple helix model), regulatory environment, and prioritization of results. The latter can aim to foster competitiveness and regional development (smart specialization), societal missions (Mariana Mazzucato) or wellbeing and quality of life (regionak value theory). There are both synergies and tensions among those approaches so innovation policies at both national and local level can bring very different results.

U16E0101	Corporate Social Responsibility	Z,ZK	6
The subject deals with corporate social responsibility (CSR). The CSR concept builds on the principle 3P: people-planet-profit. The course focuses on an explanation of the theoretical background of this concept, the interpretation of documents regulating corporate social, economic and environmental activities, and non-financial reporting standards. It includes a link between the CSR concept with corporate processes, especially business strategy, HRM, marketing, and PR. Illustrations of various CSR strategies and practices cover case studies of projects designed abroad, and in Czech conditions.

32BE-P-INPL-01	Innovation Policies	KZ	3
Technological, entrepreneurial, social, and institutional innovations are a key factor helping societies to adapt to quickly changing external conditions. The ability to innovate depends on a number of slow-to-change factors like education, institutional quality, research infrastructure, entrepreneurial spirit. Policy framing offers a much more flexible, yet also vital, point of intervention. This entails ensuring good communication channels between various sectors (triple/quadruple helix model), regulatory environment, and prioritization of results. The latter can aim to foster competitiveness and regional development (smart specialization), societal missions (Mariana Mazzucato) or wellbeing and quality of life (regionak value theory). There are both synergies and tensions among those approaches so innovation policies at both national and local level can bring very different results.			
32BE-P-INBL-01	International Business Life	Z,ZK	3
The course looks at various cases encountered in international business to give participants examples of real-life situations, help them understand what they may be confronted with and train them to find appropriate solutions. The aim of the course is to develop the participants' analytical ability in front of complex combinations of factors which may threaten the success of international projects, linked both to technical or interpersonal problems.

32BE-P-ITRF-01	International Trade and Finance	Z,ZK	6
We live and work in a globalized world, in a world of open borders. It is very likely that you will work in an international company or in a domestic company with international ambitions, maybe you will work abroad. For this type of work you need not only training in economic and managerial fields as you study them today (and technical as well if you will work in a technical field), but also special training for working in an international environment. The issue of international business and management is very extensive and complex, we choose from the overall mosaic two fields that you will surely meet in your practice: international trade and international finance. Both fields are closely related: trade without securing cash flows and financing is practically impossible, while international finance is largely focused on business transactions. This course is just a starting point for further study, but it is an important starting point for you at the right time. The combination of Czech and foreign students in this course opens one more dimension: mutual understanding and sympathy for diversity.			
U16E0104	International Trade and Finance	Z,ZK	6
32BE-P-GAME-01	Introduction to Game Theory	KZ	3
Teaching Strategy: The course is taught in English and is set on specialized foreign literature sources which might not be generally available in the university bookstore or library. However, students are not required to use the original textbooks to prepare for the course. Instead, after each lecture they will be provided with slide presentations and academic articles in pdf format containing all the basic knowledge which needs to be mastered for successful performance on the homework assignments and the final test.			
U63E0101	Introduction to Game Theory	KZ	3
U04E0201	Networking in English	ZK	3
Focusing on the practical communicative needs of the students, the aim of the course is to acquire and systematically develop language skills and strategies of effective and appropriate business communication, interaction and behaviour in typical networking situations (personal branding, creation and management of a network of business contacts with people who might help with extension and development of business opportunities) through language analysis, role-plays and practice situations, vocabulary and grammar development, teamwork, and individual feedback. Practical language skills will be systematically developed in contexts and situations relevant to professional work.			

32BE-P-OMAR-01	On-line Marketing	Z,ZK	6
This online marketing course provides a deep dive into the evolving landscape of digital marketing, with a significant emphasis on AI-driven strategies and understanding consumer behaviour in the digital realm. It begins with exploring modern marketing techniques, emphasising the transformative role of artificial intelligence. Subsequent modules cover essential topics such as digital marketing research, search engine marketing, and innovative content marketing, including AI and podcasting. The course also delves into the art of storytelling in marketing, the nuances of AI-enhanced video and mobile marketing, and effective social media strategies. It addresses the impact of influencer and affiliate marketing, rethinks email marketing through newsletters and explores display and programmatic advertising. Additionally, it focuses on managing digital public relations and goodwill, leveraging analytics and AI for performance measurement, and concludes with creating an integrated digital marketing plan. This comprehensive curriculum is designed to arm participants with the knowledge and skills to successfully navigate the complex online marketing ecosystem.			
U16E0105	Political Economy of International Trade Relations	Z,ZK	6
Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be done. Several topics dealing with the economic policy will be discussed: External Balance, Exchange Rate Policy, Free Markets vs Strategic Trade Policy. A modern approach will tackle the Balance of Payment analysis, emphasising the good and service transactions vs the capital flows performing movements in the capital account. The methodology introduces to students the important section of International political economy (IPE) relating to international trade. The course will focus on core issues of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed.

32BE-P-INBL-01	International Business Life	Z,ZK	3
The course looks at various cases encountered in international business to give participants examples of real-life situations, help them understand what they may be confronted with and train them to find appropriate solutions. The aim of the course is to develop the participants' analytical ability in front of complex combinations of factors which may threaten the success of international projects, linked both to technical or interpersonal problems.			
32BE-P-INPL-01	Innovation Policies	KZ	3
Technological, entrepreneurial, social, and institutional innovations are a key factor helping societies to adapt to quickly changing external conditions. The ability to innovate depends on a number of slow-to-change factors like education, institutional quality, research infrastructure, entrepreneurial spirit. Policy framing offers a much more flexible, yet also vital, point of intervention. This entails ensuring good communication channels between various sectors (triple/quadruple helix model), regulatory environment, and prioritization of results. The latter can aim to foster competitiveness and regional development (smart specialization), societal missions (Mariana Mazzucato) or wellbeing and quality of life (regionak value theory). There are both synergies and tensions among those approaches so innovation policies at both national and local level can bring very different results.			
32BE-P-ITRF-01	International Trade and Finance	Z,ZK	6
We live and work in a globalized world, in a world of open borders. It is very likely that you will work in international company or in domestic company with international ambitions, maybe you will work abroad. For this type of work you need not only training in economic and managerial fields as you study them today (and technical as well if you will work in technical field), but also special training for working in an international environment. The issue of international business and management is very extensive and complex, we choose from the overall mosaic two fields that you will surely meet in your practice: international trade and international finance. Both fields are closely related: trade without securing cash flows and financing is practically impossible, while international finance is largely focused on business transactions. This course is just a starting point for further study, but it is an important starting point for you at the right time. The combination of Czech and foreign students in this course opens one more dimension: mutual understanding and sympathy for diversity.			
32BE-P-OMAR-01	On-line Marketing	Z,ZK	6
This online marketing course provides a deep dive into the evolving landscape of digital marketing, with a significant emphasis on AI-driven strategies and understanding consumer behaviour in the digital realm. It begins with exploring modern marketing techniques, emphasising the transformative role of artificial intelligence. Subsequent modules cover essential topics such as digital marketing research, search engine marketing, and innovative content marketing, including AI and podcasting. The course also delves into the art of storytelling in marketing, the nuances of AI-enhanced video and mobile marketing, and effective social media strategies. It addresses the impact of influencer and affiliate marketing, rethinks email marketing through newsletters and explores display and programmatic advertising. Additionally, it focuses on managing digital public relations and goodwill, leveraging analytics and AI for performance measurement, and concludes with creating an integrated digital marketing plan. This comprehensive curriculum is designed to arm participants with the knowledge and skills to successfully navigate the complex online marketing ecosystem.			
32BE-P-PETR-01	Political Economy of International Trade Relations	Z,ZK	6
Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be developed. Several topics dealing with economic policy will be discussed: External Balance, Exchange Rate Policy, Free Markets vs Strategic Trade Policy. A modern approach will tackle the Balance of Payment analysis, emphasising the good and service operations vs the capital flow detailed in the capital account transactions. The methodology introduces to students the important section of International political economy (IPE) relating to international trade. The course will focus on core issues of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed, including the breaking issue of Strategic Trade Policy and the Industrial promotion, purposely implemented by developed countries.
