Study plan

Name of study plan: Master Full-Time DS from 2022/23

Faculty/Institute/Others: Department: Branch of study guaranteed by the department: Welcome page Garantor of the study branch: Program of study: Transportation Systems and Technology Type of study: Follow-up master full-time Required credits: 120 Elective courses credits: 0 Sum of credits in the plan: 120 Note on the plan:

Name of the block: Compulsory courses Minimal number of credits of the block: 93 The role of the block: Z

Code of the group: 1S-NP-DS-20/21 Name of the group: 1st Sem. Master Full-Time DS from 2020/21 Requirement credits in the group: In this group you have to gain 22 credits Requirement courses in the group: In this group you have to complete 7 courses Credits in the group: 22 Note on the group:

note on the group.						
Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
12IKD	Rail Transport Infrastructure Lukáš Týfa, Ond ej Trešl	Z,ZK	5	2P+2C	Z	Z
12TKVP	Highway Engineering Materials Otakar Vacín	Z,ZK	4	2P+2C	Z	Z
18GAZ	Geomechanics and Foundation Engineering Jitka ezní ková, Linda erná Vydrová, Vít Malinovský Linda erná Vydrová Linda erná Vydrová (Gar.)	Z,ZK	3	2P+1C	Z	Z
18TIK	Theory of Engineering Structures Petr Koudelka, Petr Zlámal, Ond ej Jiroušek, Ján Kopa ka Ond ej Jiroušek Ond ej Jiroušek (Gar.)	Z,ZK	4	2P+1C	z	Z
14GISS	Geographical Information Systems Vít Fábera, František Kekula, Tomáš Janata, Zuzana Purkrábková Tomáš Janata Tomáš Janata (Gar.)	KZ	2	0P+2C+8E	Z	Z
22MSV	Modelling and Vehicle Movement Simulation Michal Frydrýn, Drahomír Schmidt Michal Frydrýn Drahomír Schmidt (Gar.)	KZ	2	0P+2C	Z	Z
15J2A1	Language - English 1 Jitka He manová, Dana Boušová, Lenka Monková, Peter Morpuss, Markéta Vojanová, Marie Michlová, Markéta Musilová, Jan Feit, Eva Rezlerová	Z	2	0P+2C+10E	Z	Z

Characteristics of the courses of this group of Study Plan: Code=1S-NP-DS-20/21 Name=1st Sem. Master Full-Time DS from 2020/21

12IKD	Rail Transport Infrastructure	Z,ZK	5				
Non-compensated latera	al acceleration, parameters eduction for transition curve and cant transition, curves without straight, track spacing change. Track	detailed construct	on. Substructure				
design, slab track. Tram	train. Interoperability. Noise precautions. Railway line modernization for non-tilting and tilting trains.						
12TKVP	Highway Engineering Materials	Z,ZK	4				
The theory of road cons	The theory of road construction - Material Aspects. The course emphasizes the development of road construction from the beginning of the 20th century to the present, focusing on						
materials, understandin	g the production and placing of asphalt mixtures.						
18GAZ	Geomechanics and Foundation Engineering	Z,ZK	3				
Geology (basics of pert	ographyand stratigraphy), mechanics of soils (classification of fundamental soils, mechanic properties of fundamental soils,	permeability), pla	nar foundations				
(footings, footers, plates	, depth of founding), determination of planar foundations bearing and deformation, depth foundations classification of depth	foundations eleme	ents, examples				
of their use, piles (class	ification, technology od performing).						
18TIK	Theory of Engineering Structures	Z,ZK	4				
The course builds upon	the knowledge gained in basic mechanics courses in bachelor study (especially Statics and Elasticity) in the field of mathema	tical theory of ela	sticity. Emphasis				
is placed on plane and a	axisymmetric problems, as well as on the calculation of stress and strain in plates and shells. Students are further acquainted	d with methods of	modeling the				
behavior of subsoil used in the design of line structures.							
14GISS	Geographical Information Systems	KZ	2				
Construction of saving f	ormat of space-oriented information land-survey and cartography minimum basic tasks of spatial operations principles of ter	ritorial identificatio	n				

22MSV	Modelling and Vehicle Movement Simulation	KZ	2			
Principles and posibilitie	s of simulation tools with regards to vehicle movement analysis and vehicle crash analysis. Kinematic and dynamic modelling of	vehicle/set of veh	nicles movement.			
View conditions. Propos	/iew conditions. Proposed road space passage. Processing of road 3D models.					
15J2A1	Language - English 1	Z	2			
Presentation Skills - exp	esentation Skills - expert technical discourse and style; Analysis of expert texts and their production; Preparation for overseas work engagement.					

Code of the group: 1S-NP-DS-V1-22/23

Name of the group: 1st Sem. Master Full-Time DS Alternative from 2022/23 Requirement credits in the group: In this group you have to gain 4 credits Requirement courses in the group: In this group you have to complete 1 course Credits in the group: 4

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
17DOPD	Transportation Planning and Modeling	Z,ZK	4	2P+2C	Z	Z
17TZND	Technology of Railway Transport Daniel Drnec, Michal Drábek, Zden k Michl, Vít Janoš, Rudolf Vávra Vít Janoš (Gar.)	Z,ZK	4	2P+2C	Z	Z

Characteristics of the courses of this group of Study Plan: Code=1S-NP-DS-V1-22/23 Name=1st Sem. Master Full-Time DS Alternative from 2022/23

17DOPD	Transportation Planning and Modeling	Z,ZK	4			
Basic steps and tools used within four step model (trip generation, trip distribution, mode choice and trip distribution). Mobility and availability in urban areas, land use. New trends for						
transportation planning and modelling.						
17TZND	Technology of Railway Transport	Z,ZK	4			
Track line capacity asse	Track line capacity assesment, model operational situation with a system running time between IPT-nodes, calculation of traction energy savings compared with infrastructure costs					
for designing of fleeting crossing station, solving of capacity problem and blocking time in relation to train protection system, robustness of timetable, system concept of freight train						
paths, guidelines for centralised operational traffic control and management.						

Code of the group: 2S-NP-DS-20/21

Name of the group: 2nd Sem. Bachelor Full-Time DS from 2020/21 Requirement credits in the group: In this group you have to gain 20 credits Requirement courses in the group: In this group you have to complete 6 courses Credits in the group: 20 Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
12NAPI	Design and Maintenance of Transportation Structures Otakar Vacín, Gabriela Sidorinová	Z,ZK	4	2P+2C	L	Z
12UMUP	Sustainable Mobility and Land - Use Planning Dagmar Ko árková, Václav Novotný Dagmar Ko árková (Gar.)	Z,ZK	5	2P+2C	L	Z
12ZSUZ	Railway Stations and Centres Ond ej Trešl, Martin Jacura, Tomáš Javo ík	Z,ZK	3	2P+1C	L	Z
16PDP	Principles of Vehicle Design Jaroslav Machan, Jan Leistner, Filip Kotas, David Lehet Jaroslav Machan (Gar.)	ZK	2	2P+0C+8B	L	Z
22AMMD	Measuring Methods Applied to Transportation Michal Frydrýn, Drahomír Schmidt, Tomáš Mi unek, Luboš Nouzovský, Zden k Svatý Luboš Nouzovský Tomáš Mi unek (Gar.)	KZ	4	1P+3C	L	Z
15JBA2	Language - English 2 Jitka He manová, Dana Boušová, Lenka Monková, Peter Morpuss, Markéta Vojanová, Marie Michlová, Markéta Musilová, Jan Feit, Eva Rezlerová,	Z	2	0P+2C+10B	L	Z

Characteristics of the courses of this group of Study Plan: Code=2S-NP-DS-20/21 Name=2nd Sem. Bachelor Full-Time DS from 2020/21

12NAPI	Design and Maintenance of Transportation Structures	Z,ZK	4			
Design and constructior	of cement-concrete pavements and their maintenance. Construction of bridge objects, examples and choice of bridge const	ruction materials.	Construction			
and operation of tunnels).					
12UMUP	Sustainable Mobility and Land - Use Planning	Z,ZK	5			
Spatial planning - objec	tives and tasks, development over time. Land-use planning tools. SUMP. Territorial and transport planning context. Ways of ur	ban growth in cor	nnection with			
transport. Basic principl	es of the transport solution. The impact of transport on the size and shape of the city, on the development of the street and th	e square and the	roads. Solutions			
for pedestrian and bicyc	le transport. Suburbanization and transport. City economics.					
12ZSUZ	12ZSUZ Railway Stations and Centres Z,ZK 3					
Equipment for passenge	Equipment for passenger transport. Platform construction. Access roads to platforms. Modification of railway stations according to the TSI PRM. Station heads design. Variant solutions					
of station heads for curr	f station heads for current ride. Junction stations. Crossing stations. Passenger stations. Moving stations. Public transport terminals.					

16PDP	Principles of Vehicle Design	ZK	2
Design of transportation	vehicle according to its usage and function. Marketing and user demands. Vehicle dynamics. Propulsion systems. Design pr	rocess, functional	design and
vehicle structure. Evaluation	ation of variant concepts. Design phases. Realiability, technological aspects etc.		
22AMMD	Measuring Methods Applied to Transportation	KZ	4
Geodetic location and to	echnical processing of traffic route with geodetic total station, GPS and photogrammetry, 3D scanning. Transport corridor set	ting out using geo	detic methods.
Detection and technical	processing of several vehicle dynamic characteristics using high-speed cameras and accelerometers. It is a week course and	d the terms are us	sually set in June
and September - usuall	y in examination period.		
15JBA2	Language - English 2	Z	2
Presentation Skills - exp	pert technical discourse and style; Analysis of expert texts and their production; Preparation for overseas work engagement.	•	•

Characteristics of the courses of this group of Study Plan: Code=3S-NP-DS-21/22 Name=3rd Sem. Bachelor Full-Time DS from 2021/22

11STS	Stochastic Systems	Z,ZK	4
The subject deals with t	he problems of mathematical modelling of dynamical systems, estimation od these models and their utilization for prediction	The results are il	lustrated on
practical transportation	tasks. Mathematical theory roots from probability and mathematical statistics and they use the methods of the Bayesian prob	abilistic approach	۱.
12DAZP	Transport and Environment	Z,ZK	4
This course aims the im	pact of transport on environment. The accent is put mainly on noise and vibration, emission, barrier effect and energy deman	ds. The noise mea	asury is part and
parcel of this course.			
12TEAP	Theory of Road Traffic Operation	Z,ZK	7
Traffic parameters and t	heir measurement, acquisition and processing. Road capacity analysis. Theoretical foundations and applications of mathema	atical models - ma	acroscopic,
statistical and microsco	pic traffic models. Theory of traffic management. Traffic light signals, roundabouts, coordination, public transport priority. Urba	an and highway m	anagement.
Traffic excesses manag	ement. Road assessment and maintenance methods. Health risks assessment.		
12VRZ	High Speed Rail Transport	KZ	3
High speed railway (HS	R) transport characteristics and position in transportation system. Types / models of HSR systems, preparation of high speed	railway lines build	ling in the Czech
Republic conditions. No	n-adhesion HSR systems. City and region traffic service by HSR. HSR operating points. HSR worldwide network. HSR routin	g and traffic conc	eption. Specifics
of HSR track construction	on and layout track parameteres.		
15JBA3	Language - English 3	Z	2
Presentation Skills - exp	ert technical discourse and style; Analysis of expert texts and their production; Preparation for overseas work engagement.	Optional courses f	or certificates
FCE, CAE.

Characteristics of the courses of this group of Study Plan: Code=Y2-NP-DS-22/23 Name=Comp. Sel. Courses Master Full-Time DS from 2022/23

00Y2XN	Active participation in a scientific project, workshop, short-term trip abroad	KZ	2
17Y2AM	Application of Marketing Tools in Transportation	KZ	2
Application of marke	ting principles in transport issues, marketing tools suitable for transport, case studies of the use of marketing in the sphere	of public passenger tr	ansport.
12Y2BM	Safety on The Local Roads	KZ	2
Classification of road	accidents rates, social looses. Collision points, diagrams. Tools and methods for safer road transportation. Crossroads from t	he point of view of safe	ty. Psychological
right of way. Rounda	bouts. Pedestrian transport, cyclists. Traffic lights coordination. Transport control and regulation.		
23Y2BP	Security Class	KZ	2
The most prevalent	opics include data management, data and text mining applications, terrorism informatics, deception and intent detection, te	errorist and criminal so	cial network
analysis, crime analy	vsis, cyber-infrastructure protection, transportation infrastructure security, and information assurance, among others.		
21Y2BS	Unmanned aircraft systems 2	KZ	2
Modern trends in unr	nanned aircraft development. Use of unmanned aircraft. Managerial activities related to the operation of unmanned aircraft. F	lights beyond the appli	cable legislation.
14Y2C1	CATIA I	KZ	2
Fundaments of work	ing with CATIA, making basic parts and bodies. Making 2D sketches, geometric stucture, parametric linking, making adapti	ive models from 2D sk	etches. Import
and export of made	parts and bodies. Making assemble and visualization.		

14Y2C2	CATIA II	KZ	2
	se. Modeling compound bodies. Possibility of enumeration, comunications with other systems. Surface x solid bodies. Kinema	atic mechanism. F	roject making
and project cooperatior	. Outputs of projects.		
14Y2CS	Sensitivity of Systems	KZ	2
Design of systems with	defined reliability. The impact of changing parameters and subsystems within a system. System sensitivity computing, definit	ion of sensitivity f	unctions and
matrices and their usab	ility in system design.		
21Y2CR	CRM	KZ	2
Introduction to CRM. Ar	halysis of air accidents. Human factor. Error. Historical development of CRM. Health and fitness. Stress and its effect on the h	uman body. Fatigu	ie Sleep &
Vigilance. Information F	Processing. Situational Awareness. Workload Management. Decision Making. Communication. Leadership & amp; Team Behav	viour. Automation.	
12Y2DU	Transport in the Context of Sustainability	KZ	2
Definitions of sustainab	le transport, historical context, development in our country and in the world. Sustainable development and sustainable transport	rt. Demand for trai	nsport. Induction
	of sustainable transport. Biofuels. Electromobility. New trends in transport. Practical examples.		
15Y2DN	Transportation Psychology in German Speaking Countries	KZ	2
	er view of traffic problems with regard to the work with texts (Physics for drivers, abusing alcohol during driving, exhaustion, g	etting of driving lic	cence, children
	t, traffic psychology in the internet etc.)		
18Y2DC	Dynamics of Transport Routes and Vehicles	KZ	2
-	ations of more mass systems. Analysis of the forces acting between the vehicle and transport route. Creation of dynamic model		-
-	h a finite number of degrees of freedom. Methods of stiffness constants and pliability constants. Fundamentals of vibration of bi	ridges. Criteria for	the admissibility
	ntal methods in dynamics.		2
18Y2EM	Electron microscopy	KZ	. 2
	tron microscopy, construction, control and maintenance of SEM, sample preparation, signal detection, types of detectors and		
	of results and automation of data processing, energy dispersive X-ray microanalysis and other analytical methods in electron procession and the second se	i microscopy. Evai	uation of data
		1/7	2
16Y2EE	Emissions and Ergonomics of Vehicles	KZ	2
-	ny of vehicles and the influence on man and nature. National and international law related to the hygiene. Noise and vibrations i measuring, prevention, elimination. Exhausts - creation, measurement, reduction, non-regular fuels and drives. Ergonomy - sit		
	ng, ventilation, air-conditioning, filtration, tiredom.	ung, standing, coi	nioi, operational
17Y2FM	Financing in Urban Mass Transportation	KZ	2
	prent in Prague and other cities in the world. Building and operation of public tram, bus, and trolleybus networks. Undergrou		
-	opment in small towns. Particularities of investment and operation of public train, bus, and trolleybus networks. Ordergroup	-	-
	ssengers. Tourism & UMT. UMT typology & choice of optimum financing.		ong. nanoport
21Y2FM	Aviation Company Financial Management	KZ	2
	nance - financial statements, budget, forecast. Financial policy of the company. Financial resources - long-term financial reso		
	s, loans, leasing, capital. Financial and economic analysis of the company - structure and content.		, rotainoù
23Y2FB	Physics for Security Branches	KZ	2
	ubstances and phenomena at extreme conditions. Grounds of rheology. Physics of Earth's interior. Geophysics. Physics of at		
dengineering branches			
18Y2FZ	Physical foundation of materials' properties	KZ	2
	e defects influence on properties of materials, stiffness, plasticity, strength, fracture, fatigue, creep, corrosion, effects of enviro		
behavior are the main o			0
15Y2HS	Road Transport History	KZ	2
	n the Ancient Age, corridors of main mediveal pathways. Development of road traffic in the modern period, acceleration of road		
1st part of 20th century	Development of road layout, geometric and construction layers. Beginning of modern road civil engineering. Development of	road travelling in	modern period.
	tions, bridges and traffic control, development of road signs.		
16Y2HP	Vehicle Hygiene	KZ	2
Emissions and ergonor	hy of vehicles and the influence on man and nature. National and international law related to the hygiene. Noise and vibrations	s - sources, creati	on, propagation,
physical values, ways of	measuring, prevention, elimination. Exhausts - creation, measurement, reduction, non-regular fuels and drives. Ergonomy - sit	ting, standing, cor	ntrol, operational
reach. Condition - heati	ng, ventilation, air-conditioning, filtration, tiredom.		
14Y2IS	Intelligent Systems in Postal Services	KZ	2
The use of information	systems in the postal services (ITIS, and POST, T + T, PS, KMP, DS), application of information technology in the processing	of mail processin	g nodes in the
	ng logistics processes in the post. The appreciation of the real implementation of the Czech post in operation both in lectures ar	nd in the framewor	k of the practical
desk.			
12Y2IS	Urban Networks	KZ	2
	e position of UN as public and technical infrastructure / utilities, metodology of the UN master planning, of UN design, UN coo	ordination, UN ins	tallation and UN
	cal standards of UN, trenchless technologies for UN).		
14Y2JM	One-Chip Controllers	KZ	2
	chitecture, embedded peripherals (counters, timers, converters, ports) and their utilisation. Practical tasks are programmed w		-
15Y2JH	Job Hunting in English	KZ	2
	practical guide to applying for a job in English. The interview process is mapped out, with the course including skills practise f	-	of this process,
	bb-hunting in English. Students will also be introduced to the English vocabulary and phraseology necessary for a successful		2
14Y2KI	Capital Investment in Transportation and Telecommunications	KZ	2
	iment desicion making - long term goals and investment strategies, long term financing	•	-
16Y2KV	Car Body Design	KZ	2
	h-load car body, bus car body, and motorcycle as a construction set. Principles of design, production, testing and operation. N		-
	I passive safety parts. Ergonomics, HMI, view out of the vehicle, operational extent, view behind the car. Conditioning tools, s	ignaling function.	Aerodynamics
	and artistic design principles. Practical training.	1/7	2
12Y2KS	Rail Transport in Settlements and Regions	KZ	2
	elopment of railway infrastructure in Czech Republic. Arrangement of railway networks and junctions. Suburban railway servic		guration and
	ems. Network configuration and operation of tram systems. Special thematic lectures (rail transport in selected countries / reg		2
12Y2KE	Landscape Ecology	KZ	2
	ndscape - definition, types, evolution. Landscape systems. Anthropogenic impacts on landscape. Methods using for evaluating tions in landscape accelery. Landscape planning	y ianuscape. ⊢rac	tal geometry
and its potential applica	tions in landscape ecology. Landscape planning.		

	1/7	-
21Y2LS Air Traffic Services	KZ	2
Airspace structure in Czech Republic and other countries. Introduction and description of ATS units in Czech Republic. Practical examples of TWR, A	PP a ACC contro	I. History of ATS
at USA and Czechoslovakia. ATS - Model of financing. Training Systém of Air Traffic Controllers. Future development of ATS.		
11Y2LG Logics of Engineer's Judgement	KZ	2
Logical structure of engineer's judgement, its propositional and predicative logical base. Solutions of logical tasks through the methods of truthfulnes	s and semantic a	nalysis charts.
Venn's diagram method. Logical basis for network design for the solution of technical tasks.		-
23Y2MA Risk Analysis and Management	KZ	2
	1	_
Concept of risks and terms. Risk sources, definition of hazard, impacts and risks. Methods for identification, analysis, assessment and management	-	
and good engineering practice. Methods, tools and techniques for risk engineering. System of systems risk. Application of strategic and system appro	bach for benefit o	r security and
development. Territorial, emergency and crisis planning. Human factor - its role.		
21Y2MQ Quality Management	KZ	2
History, basic definition. Pioneers in the field of quality. International quality organisations and quality promotion in the Czech Republic. Quality mana-	gement system. E	invironmental
management systems. Integrated management systems. Risk management in the context of the requirements of ISO standards. Sectoral quality mana	gement systems.	Comprehensive
quality management, excellence models and corporate social responsibility. Quality audits.		
	KZ	2
	ļ	
Sociological approach to a corporation. Corporation and its organization. Corporation and its running - human role and communication. Corporation,	its culture and so	cial system.
Human's work position in free market economy. Corporate directorship, work groups, adaptation, strife, different roles and positions in corporation.		
21Y2MK Marketing of Air Transport	KZ	2
The content of the course "Marketing in air transport" is the management of activities and processes using available marketing tools and processes for	or analysis, strate	gy development
and implementation of sales of goods and services in the aviation industry. In addition to the theoretical foundations of marketing, the lectures preser	-	· ·
and product analysis, creation of marketing strategies and planning.	,	, I
	1/7	
12Y2MH Measurement and Modeling of Traffic Noise	KZ	2
Theoretical introduction to noise from traffic. Noise from rail transport. Noise from road traffic. Measurement and calculation of noise from rail traffic. It and the second sec	leasurement and	calculation of
noise from road traffic. Modelling of traffic noise in the CADNA A.		
12Y2MI Urban Engineering	KZ	2
Teaching aming on utilities storage in area, coordination engineering activities in area, arrangement of public space, concepement of public spaces.	I	
	1/7	
18Y2MP Finite Element Method And Its Application	KZ	2
Basic mathematical formulation of the Finite Element Method. Direct Stiffness Method used in structural mechanics. Evaluation of stiffness matrices is		• I
variational principles. Element formulation (bar and beam elements, CST, LST, quadrilateral, tetrahedral and brick elements). Natural coordinates, na	tural shape functi	ons and
isoparametric representation. Numerical integration. Introduction to dynamics. FEM programming.		
16Y2MK Quality Methods for Vehicles	KZ	2
Quality management methods list, customer data acquisition and analysis of customer requirements, QFD, DFM, DFA, DFS. FMEA (Failure mode eff	ect analysis). Elei	ments of parallel
(team) design.		
	1/7	
12Y2MD Methods of Traffic Regulation and Prediction	KZ	2
Basic ways of traffic prognosis, traffic prognosis for large area (calculation of future traffic volumes, calculation of future traffic volumes between areas (a	analogical and sy	nthetic methods,
modal split, traffic distribution to road network). Shock wave in traffic flow. Service levels and their traffic volumes. Acceleration noise.		
17Y2MO International Organisations in Transportation	KZ	2
International relations in transport, UN, EEC UN, Intergovernmental organisations, EU Offices and Agencies, Conference of European Ministries of t	ransport. Internat	ional mode
organisations of public transport, Air-Rail, railways, roads, air, waterways, forwarding and postal services.		
	1/7	
17Y2MS Microsimulation of Railway Operation	KZ	2
Introduction to the characteristics of simulation tools, creation of a simulation model of railway infrastructure, verification of a specific operational con		
adaptation of the infrastructure model and modification to the infrastructure to allow the implementation of the proposed operational concept. Stability	tests and evaluation	ions. Evaluation
of sensitivity of the operational concept to delays.		
17Y2MD Modelling and optimization on transport networks	KZ	2
Coordination problems on public transport networks, scheduling vehicles, design of control plans for light-controlled intersections including green was	1	
	re modelling, ser	nce systems,
modelling of advanced problems in distribution systems - exact, heuristic and metaheuristic principles of solving problems.		
21Y2MC CNS Systems Modelling	KZ	2
The course is designed as a set of model tasks in the field of communication navigation and surveillance systems in aviation, addressed using mathe	matical approach	es and software
tools. A large part is devoted to air targets tracking, measurement-to-track association, track filtering and multisensor tracking.		
17Y2MT Modern History for Engineering Students	KZ	2
Selected chapters from the 19. century history. Geopolitical situation in Europe explained on the examples of Great Britain, Germany and Austrian Ei	1	
American Civil War, transatlantic transportation development. Imperial China: Late Qing dynasty. Selected chapters from the 20. century history: From	-	
Czechoslovak historical myths.	I	
12Y2MZ Modernization of Railway Lines and Stations	KZ	2
Line speed increasing. AGC and AGTC Agreement. AGC and AGTC railway network. Principles of modernization (conceptual papers, definitions of bas	ic concepts, indiv	dual principles).
Track geometrical characteristics on modernized railway lines. Superstructure and substructure on upgraded lines. Designing of railway stations. Brid	ges and tunnels.	Development
and realization of projects. Technical description of the tranzit corridors.		
12Y2NS Shared Space Design		2
	K 7	~
Introducing students to the concept of integrated use of public spaces by sharing space with all users. Active promotion of settlements and sustainab	KZ	public chock of 1
towns and sitiss. Analysis of implemented foreign avanual - minimized - fore dealers in the set of	le mobility in the	
towns and cities. Analysis of implemented foreign examples, principles of zone design in the context of legal and technical requirements. Linking traff	le mobility in the	
and architecture in the process of designing quality public spaces.	le mobility in the	ban planning

20Y2TE	Technology of Electronic Systems	KZ	2
	or an effective operation of electronically controlled systems. Maintaining, meassuring, optimization of safety and reliability of		. Semiconductor
technologies, printed cir	rcuits, assembly operations, interconnection and repairs technologiesusers and operators.		
14Y2TU	Telecommunications Systems and Multimedia	KZ	2
New trends in telecomm	unications namely applied in transport solutions, identification and quantification of telecommunications networks and services	performance bas	ed on redundant
architecture, provissioni	ing of guaranteed service quality, two generations of the handover principles.		
16Y2TT	Transportation and Building Technology and Equipment	KZ	2
	ing technology and equipment. Transport of solid and mass material, soil and rock above all. Highway and underground cons	•	
vehicles, description and	d construction features, delivered mass calculation, economy of operation. Technics and technology of underground construct	ions. Terrestrial ve	ehicles operation
management methodolo	ogy (ultrasound, laser, GPS, total stations).		
23Y2TP	Creation of legal and technical regulations	KZ	2
Creation of legislation, s	structure of the bills of law, legal process, compatibility with the EC law, the creation of technical standards and their publicati	on, ÚNMZ (Czecł	n Office for
standards, metrology ar	nd testing) in Czech Republic, organizations CEN, CENELEC and ETSI, the notification process.		
14Y2UI	Artificial Intelligence	KZ	2
History of artificial intelli	igence, knowledge, its representation including frames, state space search, constraints, genetic algorithms, machine learning	j .	
18Y2UB	Accident Biomechanics and Safety	KZ	2
Anatomy of man. Metho	ds of Medical Diagnostics - RTG, CT, MRI, US. Dynamics of traumatic events. Factors influencing the severity of an accident a	and the extent of a	a traffic accident.
	edestrian injuries. Injury in railway and air traffic accidents. Analysis of biomechanical events in accidents and their computat	ional modeling. P	rinciples of
treatment and rehabilita	tion. Protective elements and safety measures in transport.		
23Y2VZ	Leadership and Human Resource Development	KZ	2
Introduction to the study	y of human resources, human resources management, corporate goals, strategies, cultural and ethical aspects. Team manag	ement, communi	cation in teams,
strategy and planning ir	human resources, ethics and corporate culture, cross-cultural differences. The labor code. Introduction into protocols.		
18Y2VC	Computational Mechanics in Transportation	KZ	2
Principle of virtual work	and variational principles in FEM. Bar shaped, planar and three - dimensional structures in FEM. FEM in statics and in dyna	mics of transporta	ational systems.
Elastic, elastoplastic an	d viscoelastic material. FEM in problems of biomechanics. Numerical analysis of structural parts with programme ANSYS on	instances.	
23Y2VR	Cope with Risks in Engineering Branches	KZ	2
Types of engineering brain	anches directed to risks, procedures used in risk engineering, ensuring the secured systems, ensuring the safe systems, ensuring	uring the safe syst	tems of systems.
15Y2ZA	Basic Principles of English Academic Writing and Abstract in English	KZ	2
Theory, creating a phras	sal bank according to students' specialisations, rhetorical analysis or texts/abstracts, drafting an abstract, providing effective	feedback.	
12Y2ZK	Traffic Calming	KZ	2
Principles of traffic calm	ning. Solution of road network organization. Urban road layouts. Psychological and physical obstacles (measures of traffic ca	ming) and their co	ombinations.
Traffic calming measure	es in crossroads. Pedestrian zones. Residential streets and zones.		
23Y2ZM	Intelligence Means and Methods	KZ	2
History and the present	of intelligence services and their role in the modern world. How intelligence services handle with information. Methods and proc	edures of collectir	g and evaluating
information. Means of ir	telligence services. Internal and external intelligence, military intelligence. The means and methods of state security services	s. Cooperation an	nong Intelligence
services within NATO, E	U. The organization of the intelligence services.

List of courses of this pass:

Code	Name of the course	Completion	Credits
00Y2XN	Active participation in a scientific project, workshop, short-term trip abroad	KZ	2
11STS	Stochastic Systems	Z,ZK	4
	with the problems of mathematical modelling of dynamical systems, estimation od these models and their utilization for prediction		
practical trar	nsportation tasks. Mathematical theory roots from probability and mathematical statistics and they use the methods of the Bayesi	an probabilistic appro	ach.
11XN1	Master Project 1	Z	2
11XN2	Master Project 2	Z	2
11XN3	Master Project 3	Z	1
11XN4	Master Project 4	Z	8
11XNDD	Master Thesis for study programme DS	Z	18
11Y2LG	Logics of Engineer's Judgement	KZ	2
	engineer's judgement, its propositional and predicative logical base. Solutions of logical tasks through the methods of truthfulner. Venn's diagram method. Logical basis for network design for the solution of technical tasks.		ysis charts.
11Y2PM	Programming in MATLAB	KZ	2
To explain the prine	ciple of modelling and simulation, description of Matlab environment and its settings, optimization and program code debugging, Matlab.	data fitting and desigr	hing GUI in
12BED	Road Safety Audit	Z,ZK	4
	ations of safety assessments (especially Road Safety Audit, Road Safety Inspection) during the process of preparations, and of the	e particular realization	
network that should	minimize traffic accident risks for all those who take part in road traffic. Application of European Directive 2008/96/EC on road set	afety infrastructure ma	anagement.
12DAZP	Transport and Environment	Z,ZK	4
This course aims the	e impact of transport on environment. The accent is put mainly on noise and vibration, emission, barrier effect and energy demand parcel of this course.	ts. The noise measury	y is part and
