| 32BC-K-RIZZ-01 | Risk Behavior of Pupils | Z | 3 | | | |
| The course introduces students to the issue of risky behaviour of pupils in pedagogical and psychological terms and with a focus on the school environment, and also focuses on its | | | | | | |
| social manifestations and consequences. | | | | | | |
| 32BC-K-PEDS-01 | Social Pedagogy | ZK | 6 | | | |
| 32BC-K-PSYS-01 | Social Psychology | ZK | 6 | | | |

The course is devoted to the issue of man in social situations. Students will get acquainted with basic socio-psychological knowledge that is directly or indirectly related to the teacher's activities. The dynamics of small social groups and interactions are studied, as well as issues related to communication (basics of communication, types of communication). Attention is paid to attitudes and their creation, conflicts and their solutions. Another important topic is the socialization of personality and social role. The acquisition of this knowledge at the theoretical level is associated with references to their application in the practice of teachers, especially in terms of individual approach to students, teamwork and contacts with the

32BC-K-SVZP-01 Education of Pupils with Special Educational Needs

The course introduces the most common special educational needs of pupils in secondary schools and the appropriate methods of intervention and support in the school environment,

including the process of creating an individual education plan for these pupils.

32BC-K-PPR2-01 | Reflection of Pedagogical Practice II

Teachers and students will jointly seek appropriate solutions for specific situations of pedagogical practice and effective solutions to the impact of dynamic changes in contemporary education. In particular, the course builds on the purposeful construction of a safe space to reflect on one's own disposition to learn, to share and process emotions and challenging topics from practice, including the presentation and communication of students' first pedagogical outcomes. Practices included: guided discussion, feedback interviews, brainstorming, psychosocial training methods.

32BC-K-SMNG-01 Self Management

. .

The issue of personal management seems to be in today's society more important as a crucial and topical issue that goes beyond the economic framework. To a large extent this is a mutidisciplinary field, at the edge of economics, management, psychology, mental health and stress. During this course, students will learn the basic procedures and techniques that will enable the knowledge workers (managers and representatives of the schools, as well as teachers) to achieve higher performance and optimal use of their potential. Personal management can be understood as a synonym for self-management, event. self-education. The biggest personal management tasks are used in the development of personality. Subject is focused to bring students practical knowledge and skills necessary for effective management of their own forces in different life roles. The main emphasis is on practical examples, which are designed to prepare future graduates for activities connected with the determination of their own objectives, priorities, self-management and time management.
