32BE-P-MACR-01	Macroeconomics	ZK	3

This course provides the main macroeconomic concepts to understand how a country operates regarding its aggregate variables and equations describing its markets. Graphical representations of equilibrium conditions are extensively used for easy comprehension and flexibility. The canonical IS-LM (investment-saving, liquidity-money) model, characterizing the goods and financial markets in the short run, is extended by the labor market and thus by the Phillips curve in the medium run. In the long run, the Solow model as a fundamental economic growth framework is also covered. The open economy specifics related to exports-imports and exchange rates are presented within the famous Mundell-Fleming model, including the Policy Trilemma or Impossible Trinity concept. The main textbook is Blanchard (2021). Mankiw (2022) can be used as well. This course has only lectures and no exercise sessions.

32BC-P-MACR-01 Macroeconomics	ZK	3
32BC-P-RTBS-01 Retail Business	ZK	3
The course introduces students to the principles of managing a modern retail company. Emphasis is placed on current trends in retail and understa	nding of its busine	ss opportunities.

The lectures consist of topics that represent current microeconomic problems. The issue is viewed not only from the perspective of market participants, households, and companies, but also from the perspective of the government. Modern technologies have deeply influenced the way households decide on the optimal consumer basket and companies decide on the effective allocation of scarce resources. However, there are still valid rules and principles that remain unchanged for microeconomic entities. For households, it is about maximizing the total utility achieved. For companies, this is a profit motivation in an environment of sometimes too predatory competition and other times in an environment of barriers to entry into the industry (too high monopoly power). The last player in microeconomic relations is the government, which uses its tools to achieve its goals. Sometimes it is an efficient allocation of scarce resources in the context of competition; other times, it is about social justice and equal opportunities.

The classification of the subject of professional practice is based on the decision of the MÚVS VUT during their studies to give students the opportunity to acquire quality skills and experience. MÚVS supports the establishment of a relationship between students and companies and emphasizes their mutual cooperation The stady plans includes a 3-month long-term professional internship.

32BE-P-MNGP-01 Principles of Management

Z,ZK | 3

Management is a key discipline in the life of a company, institution, and society. Modern management trends fundamentally change its essence and content, methods and tools, while changes are getting faster. Knowing the basics of management is a necessity not only for managers, practically for all employees who hold key positions in the company or institution. However, it is not just a question of taking a basic course, managers must be prepared for lifelong learning and adaptation to new trends, knowledge, methods and tools. The course deals with the basics of management in the context of its modern trends and is therefore the starting point for further study of managerial and economic fields at the university.

32BE-P-PMAR-01 Principles of Marketing

Z,ZK

4

The course focuses on understanding the objectives and role of marketing in a company. Students will be introduced to the fundamentals of marketing and learn the procedures and techniques used in market segmentation, positioning and designing marketing mix tools. The marketing mix is introduced as a set of objectives and decisions in the areas of product, pricing, distribution and communication.

		1				

determine the method and technique of solution from the used procedures and applications in the field of marketing practice. Students should be able to enter and solve research problems independently and in cooperation with a professional research agency from the position of a marketing manager.

32BC-P-MRTR-01 New Trends in Marketing Communication

The course is based on the dynamic evolution of marketing in connection with AI and new-age technologies, focusing on emerging approaches in marketing communication such as

marketing in the metaverse, blockchain, multisensory marketing, hyper-personalization, and other innovative strategies.

32BC-P-CRMN-01 Customer Relationship Management

Z,ZK

The course introduces students to the issue of customer relationship management (CRM). Attention is paid to the principles of customer relationship management and differentiated customer relationship management. Students will understand how to create customer profiles based on customer segmentation and identify key customers. Emphasis is placed on creating and enhancing customer value in order to build long-term customer loyalty. The latest trends in marketing and customer management are introduced.

policies and practices for efficient performance management in the organization and the main tasks of managers in various activities related to performance	ormance manager	ment in the			

organization

32BC-P-VZRO-01 Training and Staff Development

Z,ZK

The subject is intended to strengthen the motivation of students to expand their knowledge of education and development of workers in both disciplinary and cross-disciplinary contexts, and at the same time it should serve to better understand the relationship between management and leadership of people in an organization. Presenting a whole range of attractive stimuli within the teaching of the subject, which opens a didactically desirable space for starting a discussion between students with an emphasis on a closer introduction and possible understanding of key topics, is a suitable way to create and strengthen the professional competences of future specialists in the field of management and HR.

Characteristics of the courses of this group of Study Plan: Code=B0413P - PVOK - AJ Name=Povinn volitelné p edm ty odborné kompetence B0413P050061 v anglickém jazyce 32BE-P-MACR-01 Macroeconomics This course provides the main macroeconomic concepts to understand how a country operates regarding its aggregate variables and equations describing its markets. Graphical representations of equilibrium conditions are extensively used for easy comprehension and flexibility. The canonical IS-LM (investment-saving, liquidity-money) model, characterizing the goods and financial markets in the short run, is extended by the labor market and thus by the Phillips curve in the medium run. In the long run, the Solow model as a fundamental economic growth framework is also covered. The open economy specifics related to exports-imports and exchange rates are presented within the famous Mundell-Fleming model, including the Policy Trilemma or Impossible Trinity concept. The main textbook is Blanchard (2021). Mankiw (2022) can be used as well. This course has only lectures and no exercise sessions 32BE-P-MICR-01 Microeconomics Z,ZK The lectures consist of topics that represent current microeconomic problems. The issue is viewed not only from the perspective of market participants, households, and companies, but also from the perspective of the government. Modern technologies have deeply influenced the way households decide on the optimal consumer basket and companies decide on the effective allocation of scarce resources. However, there are still valid rules and principles that remain unchanged for microeconomic entities. For households, it is about maximizing the total utility achieved. For companies, this is a profit motivation in an environment of sometimes too predatory competition and other times in an environment of barriers to entry into the industry (too high monopoly power). The last player in microeconomic relations is the government, which uses its tools to achieve its goals. Sometimes it is an efficient allocation of scarce resources in the context of competition; other times, it is about social justice and equal opportunities. 32BE-P-MNGP-01 Principles of Management Z,ZK Management is a key discipline in the life of a company, institution, and society. Modern management trends fundamentally change its essence and content, methods and tools, while changes are getting faster. Knowing the basics of management is a necessity not only for managers, practically for all employees who hold key positions in the company or institution. However, it is not just a question of taking a basic course, managers must be prepared for lifelong learning and adaptation to new trends, knowledge, methods and tools. The course deals with the basics of management in the context of its modern trends and is therefore the starting point for further study of managerial and economic fields at the university. 32BE-P-PMAR-01 Principles of Marketing Z.ZK The course focuses on understanding the objectives and role of marketing in a company. Students will be introduced to the fundamentals of marketing and learn the procedures and techniques used in market segmentation, positioning and designing marketing mix tools. The marketing mix is introduced as a set of objectives and decisions in the areas of product, pricing, distribution and communication. 32BE-P-BCOR-01 Business Correspondence ZK 3 The aim of the course to help students write better emails in English as emails are the most common form of written communication. It is aimed at intermediate or upper-intermediate level, and consists of sessions of language practice covering a wide range of business topics. It includes exercises on email style, but also practices more conventional language areas, such as fixed expressions, sentence structures, linking words, prepositions, verb tenses, and punctuation etc. It will help students to write effective emails, express themselves clearly, and their writing will be easier to understand. The course also uncovers cultural differences in Czech and English business communication 32BE-P-CSRS-01 Corporate Social Responsibility The subject deals with corporate social responsibility (CSR). The CSR concept builds on the principle 3P: people-planet-profit. The course focuses on an explanation of the theoretical background of this concept, the interpretation of documents regulating corporate social, economic and environmental activities, and non-financial reporting standards. It includes a link between the CSR concept with corporate processes, especially business strategy, HRM, marketing, and PR. Illustrations of various CSR strategies and practices cover case studies of projects designed abroad, and in Czech conditions. 32BE-P-CRTH-01 Critical Thinking ZK. 3 The primary objective of the course is to become familiar with the essentials of correct argumentation and to improve students' analytical and problem-solving skills. Through the discussion and practical use of advanced methods of argumentation, the course develops students' understanding of the essential principles involved in the practice of reasoned decision-making with the emphasis on their practical application in case studies discussing recent socioeconomic and political issues. The writing and language skills developed in this course might be used across the curriculum. 32BE-P-CCMN-01 Cross-Cultural Management Z.ZK 6 Managing cultural diversity plays crucial in todays globalized world and doing business across countries. Cross culture is the interaction of people from different backgrounds in the business world. Knowledge of cross-cultural differences and their practical use increases the efficiency of interaction between representatives of different national cultures and could be considered one of the core competencies of a successful manager in the global environment. The course is open to students of all majors looking for deeper knowledge about how culture shapes management practices in international companies as well as the cultural orientations of individual managers and organisation members. 32BE-P-EBPL-01 Entrepreneurship and Business Plan Students will be able to characterise the conditions and entrepreneurial trends in the 21st century, to evaluate a new business idea and to develop a business plan (to select and use relevant information and methods to develop business plans, analyse risks and their impact on the feasibility of business plans). Q32-6 EuroTeQ 6 ECTS Z,ZK 6 32BE-P-INBC-01 International Business Culture 3 The course examines various cases encountered in international business to give participants examples of real-life situations, help them understand what they may be confronted with, and train them to find appropriate solutions. It aims to develop the participants' analytical ability in facing complex combinations of factors that may threaten the success of international projects, linked to technical or interpersonal problems. 32BE-P-IPW1-01 | International Project Workshop I. ZK 32BE-P-IPW2-01 International Project Workshop II. 3 32BE-P-ITRF-01 International Trade and Finance Z,ZK 6 We live and work in a globalized world, in a world of open borders It is very likely that you will work in international company or in domestic company with international ambitions, maybe you will work abroad For this type of work you need not only training in economic and managerial fields as you study them today (and technical as well if you will work in technical field), but also special training for working in an international environment. The issue of international business and management is very extensive and complex, we choose from the overall mosaic two fields that you will surely meet in your practice: international trade and international finance Both fields are closely related: trade without securing cash flows and financing is practically impossible, while international finance is largely focused on business transactions This course is just a starting point for further study, but it is an important starting point for you at the right time The combination of Czech and foreign students in this course opens one more dimension: mutual understanding and sympathy for diversity 32BE-P-PETR-02 Political Economy and International Trade Relations Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be done. Several topics dealing with the economic policy will be discussed: External Balance, Exchange Rate Policy, Free Markets vs. Strategic Trade Policy. A modern approach will tackle the Balance of Payment analysis, emphasising the good and service transactions vs the capital flows registered in the capital account transactions. The methodology introduces to students the important section of International political economy (IPE) relating to international trade. The course will focus on core issues of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed, including the breaking issue of Strategic Trade Policy and the industrial promotion, purposely implemented by developed countries. 32BE-P-PRSK-01 Presentation Skills ZK Students will adopt main rules of verbal, nonverbal a para verbal (voice) communication and principles of presentation and communication strategies in English, Students will develop their own presentation skills in practical exercises. They will get feedback in a form of self-evaluation, "peer-review" and lecturer comments. The course is aimed at intermediate and

upper-intermediate level.

32BE-P-ICTI-01	Social and Political Impacts of Modern ICT	ZK	3
32BE-P-SDGB-02	Social Determinants of Global Business	ZK	6
32BE-P-WEBS-0	World Economy and Business	Z,ZK	6

The course introduces students of the technical universities to international business. Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be done. When analysing the international business context, the student must interpret the role of big players, mainly in the technological markets. Alongside, he/she must assess the degree of market power and the apparent strategies designed for taking advantage of pricing policy. Several topics affecting the international business will be discussed: External Balance, Exchange Rate Policy, Free Markets vs Strategic Trade Policy. A modern approach will tackle the trends in supplying new products: two sides markets, digital markets, online system of payments. The methodology introduces to students the important section of International Business. The course will focus on the links of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed, including the braking issue of Strategic Trde Policy and the Industrial promotion, purposely implemented by developed countries..

32BC-P-MRTR-01 New Trends in Marketing Communication

Z.ZK

The course is based on the dynamic evolution of marketing in connection with AI and new-age technologies, focusing on emerging approaches in marketing communication such as marketing in the metaverse, blockchain, multisensory marketing, hyper-personalization, and other innovative strategies.

32BC-P-CRMN-01 Customer Relationship Management

Z,ZK

The course introduces students to the issue of customer relationship management (CRM). Attention is paid to the principles of customer relationship management and differentiated customer relationship management. Students will understand how to create customer profiles based on customer segmentation and identify key customers. Emphasis is placed on

32BC-P-BOZP-01 Workplace Health, Safety anf Fire Prevention

ZK

Basic legislation in the field of OSH in the EU, Czech Republic. Labour Code. Implementing regulations of the Labour Code. Employer's obligations. Employee rights and obligations. Risk prevention. Employee training. Occupational accidents. Documentation to ensure OSH. Labour inspection. Fire protection. Public Health Protection Act. Occupational hygiene. Personal protective equipment. Safety signs and signals. Technical equipment.

creating and enhancing customer value in order to build long-term customer loyalty. The latest trends in marketing and customer management are introduced

32BC-P-KODO-01 Communication Skills in Management Practice	Z,ZK	6
32BC-P-PRAP-01 Labor Law	ZK	3
Labor relations - establishment, change and termination, liability of employer, liability of employee, collective bargaining.		

32BC-P-RHPV-01 Work Performance Management

Z.ZK

The course is focused on the development of managerial skills in performance management in the organization. Through lectures and seminars, students will learn effective strategies, policies and practices for efficient performance management in the organization and the main tasks of managers in various activities related to performance management in the organization.

32BC-P-VZRO-01 Training and Staff Development

Z,ZK

The subject is intended to strengthen the motivation of students to expand their knowledge of education and development of workers in both disciplinary and cross-disciplinary contexts, and at the same time it should serve to better understand the relationship between management and leadership of people in an organization. Presenting a whole range of attractive stimuli within the teaching of the subject, which opens a didactically desirable space for starting a discussion between students with an emphasis on a closer introduction and possible understanding of key topics, is a suitable way to create and strengthen the professional competences of future specialists in the field of management and HR.

32BC-P-FIDS-02 | Financial and Tax Environment

Development and current state of scientific knowledge in the field of management of financial institutions, financial and tax system in the conditions of an advanced market economy. Definition of the category "financial institutions". Classification of financial institutions. Typology of financial institutions. The position and importance of financial institutions in the current market system. Tax system in the Czech Republic, system and classification of taxes. Orientation in basic financial cases and calculations.

32BC-P-FIAN-01	Financial Analysis	Z,ZK	6
32BC-P-MNNP-01	Managerial Tools and Calculations	Z,ZK	6
32BC-P-POFI-01	Corporate Financial Management	Z,ZK	6

The aim is to widen and deepen knowledge and skills in the field of financial engineering instruments, the financing needs of the company, as well as performance analysis. The main emphasis will be placed on understanding the company in its entirety and complexity, particularly with regard to the basic function of the target enterprise, increase market value and maximize wealth for shareholders.

32BC-P-DSCR-01 Tax System in Czechia	ZK	3
The course is focused on the issue of the entire tax system in the Czech Republic with a focus on explaining direct and indirect taxes and their operations.	tion with a focus	on legal entities.

32BC-P-EKZP-01	Environmental Economics	Z,ZK	6
32BC-P-ESGR-01	ESG Reporting and Global Regulation	Z,ZK	6
32BC-P-ISPR-02	Information Systems and Design	Z,ZK	3
32BC-P-INPL-01	Innovation Policies	KZ	3
Technological, entrepre	neurial, social, and institutional innovations are a key factor helping societies to adapt to quickly changing external conditions	s. The ability to inn	ovate depends
on a number of slow-to-	change factors like education, institutional quality, research infrastructure, entrpreneurial spirit. Policy framing offers a much	more flexible, yet	also vital, point
of intervention. This enta	ails ensuring good communication channels between various sectors (triple/quadruple helix model), regulatory environment,	and prioritization	of results. The

latter can aim to foster competitiveness and regional development (smart specialization), societal missions (Mariana Mazzucato) or wellbeing and quality of life (regional value theory). There are both synergies and tensions among those approaches so innovation policies at both national and local level can bring very different results.

32BC-P-KAPL-01	Career Planning and Development	Z	3
32BC-P-MACA-01	Macroeconomic Analysis	ZK	3
32BC-P-MNPS-01	Managerial Psychology	Z,ZK	3

The subject acquaints with the basics of contemporary conception of psychology and its application in managerial practice. It allows to get a look at modern methods of psychology, which are used to recognize and assess other people. Students will be introduced to the role of psychology in managerial practice and personnel management. They will understand the importance of the personality of the manager, they will get acquainted with the basic concepts of personality psychology. They will become acquainted with the personality prerequisites of managers and their importance for successful performance of managerial activities, with psychic functions and processes applied in performing managerial functions. Developmental psychology introduces the principles of human development and psychological characteristics of selected developmental periods, personality psychology will focus on clarifying the structure and dynamics of personality. Social psychology will acquaint students with the way of socio-psychological thinking - it allows them to look at their own behavior, behavior of others and social phenomena around them with theoretical background and concepts of social psychology so that they can understand people's social behavior more and put them in deeper contexts. Students will also be guided to self-knowledge and self-awareness as a basis for the self-management and management of others, especially in difficult life situations. The course will also point out the workload and ways of its elimination, as well as problematic phenomena of the working environment such as mobbing, bossing, burnout, etc.

32BC-P-PAOS-01 Legal Aspects of Consumer Protection

ZK

Basic information on consumer protection in general, interpretation of legislation from general to special, incl. consumer protection in financial markets. Emphasizing the importance of codes of ethics as one of the preventive tools for consumer protection and the cultivation of the consumer market.

32BC-P-UDPD-01 Sustainability and Product Design	Z,ZK	6
32BC-P-ZAVR-01 Employee Selection Process	Z	3

The course is implemented in the form of an intensive weekly (off-semester) course. Students will have a special opportunity to gain additional knowledge, but most importantly, under the guidance of experts, they will be able to practice the professional skills needed for the selection process and applying for job positions from the perspective of the applicant and the company. In the course will be created a special space for practicing model situations and for discussing real problems from practice. In the summer semester of the acad. year 2023/24, the course will take place on May 6, 7, 9, 10, 2024, from 9 a.m. to 2:30 p.m.

32BC-P-ZPDT-01 | Business Data Processing

Z,ZK

Design of primary system database, database implementation using SQL, data retrieval from transaction systems and data processing, OLAP measures and dimensions design and implementation for decision making purposes and results reporting using pivot charts and tables.

32BC-P-ERGO-01 Ergonomics	ZK	3
The student should acquire theoretical knowledge and practical skills in ergonomic workplace adjustment, familiarize themselves with ergonomic	requirements for work	ing while sitting,
standing, and using a computer. The course also includes understanding spatial perception and the interaction between a person and their env	ironment, as well as pro	eventing health
issues caused by prolonged passive sitting in poorly adjusted conditions.		
32BC-P-MATP-01 Applied Materials in Technology	ZK	3
32BC-P-DOPT-01 Transportation Technology	ZK	3
Basic terms in transport technology, particular steps of transport planning, line planning, timetabling, planning in pasanger and freight transport,	organisation of traffic in	n each transport
mode, technologic factors of the side of operator and client including influence on economy, organisation of urban transit and their aplication us	ing various means of tr	ansport.
32BE-P-TRST-01 Transportation Technology	ZK	3
The course serves as a technical extension of the knowledge of economics and management students, in this case in the field of transport. It into	roduces students to the	basic problems
and concepts of this field. It is an ideal area for applying knowledge in the field of project management, corporate management, strategic mana	gement and/or econom	nics.

32BE-P-CRTH-01 Critical Thinking ZK The primary objective of the course is to become familiar with the essentials of correct argumentation and to improve students' analytical and problem-solving skills. Through the discussion and practical use of advanced methods of argumentation, the course develops students' understanding of the essential principles involved in the practice of reasoned decision-making with the emphasis on their practical application in case studies discussing recent socioeconomic and political issues. The writing and language skills developed in this course might be used across the curriculum. 32BE-P-CSRS-01 Corporate Social Responsibility Z.ZK The subject deals with corporate social responsibility (CSR). The CSR concept builds on the principle 3P: people-planet-profit. The course focuses on an explanation of the theoretical background of this concept, the interpretation of documents regulating corporate social, economic and environmental activities, and non-financial reporting standards. It includes a link between the CSR concept with corporate processes, especially business strategy, HRM, marketing, and PR. Illustrations of various CSR strategies and practices cover case studies of projects designed abroad, and in Czech conditions. 32BE-P-EBPL-01 Entrepreneurship and Business Plan 6 Students will be able to characterise the conditions and entrepreneurial trends in the 21st century, to evaluate a new business idea and to develop a business plan (to select and use relevant information and methods to develop business plans, analyse risks and their impact on the feasibility of business plans). 32BE-P-ICTI-01 Social and Political Impacts of Modern ICT ZK 3 32BE-P-INBC-01 International Business Culture Z,ZK 3 The course examines various cases encountered in international business to give participants examples of real-life situations, help them understand what they may be confronted with, and train them to find appropriate solutions. It aims to develop the participants' analytical ability in facing complex combinations of factors that may threaten the success of international projects, linked to technical or interpersonal problems. 32BE-P-IPW1-01 International Project Workshop I. ZK 3 32BE-P-IPW2-01 International Project Workshop II. ZK 3 32BE-P-ITRF-01 International Trade and Finance 7.7K We live and work in a globalized world, in a world of open borders It is very likely that you will work in international company or in domestic company with international ambitions, maybe you will work abroad For this type of work you need not only training in economic and managerial fields as you study them today (and technical as well if you will work in technical field). but also special training for working in an international environment The issue of international business and management is very extensive and complex, we choose from the overall mosaic two fields that you will surely meet in your practice: international trade and international finance Both fields are closely related: trade without securing cash flows and financing is practically impossible, while international finance is largely focused on business transactions This course is just a starting point for further study, but it is an important starting point for you at the right time The combination of Czech and foreign students in this course opens one more dimension: mutual understanding and sympathy for diversity 32BE-P-MACR-01 Macroeconomics 3 This course provides the main macroeconomic concepts to understand how a country operates regarding its aggregate variables and equations describing its markets. Graphical representations of equilibrium conditions are extensively used for easy comprehension and flexibility. The canonical IS-LM (investment-saving, liquidity-money) model, characterizing the goods and financial markets in the short run, is extended by the labor market and thus by the Phillips curve in the medium run. In the long run, the Solow model as a fundamental economic growth framework is also covered. The open economy specifics related to exports-imports and exchange rates are presented within the famous Mundell-Fleming model, including the Policy Trilemma or Impossible Trinity concept. The main textbook is Blanchard (2021). Mankiw (2022) can be used as well. This course has only lectures and no exercise sessions. 32BE-P-MICR-01 7.7K 4 Microeconomics The lectures consist of topics that represent current microeconomic problems. The issue is viewed not only from the perspective of market participants, households, and companies, but also from the perspective of the government. Modern technologies have deeply influenced the way households decide on the optimal consumer basket and companies decide on the effective allocation of scarce resources. However, there are still valid rules and principles that remain unchanged for microeconomic entities. For households, it is about maximizing the total utility achieved. For companies, this is a profit motivation in an environment of sometimes too predatory competition and other times in an environment of barriers to entry into the industry (too high monopoly power). The last player in microeconomic relations is the government, which uses its tools to achieve its goals. Sometimes it is an efficient allocation of scarce resources in the context of competition; other times, it is about social justice and equal opportunities. 32BE-P-MNGP-01 Principles of Management Management is a key discipline in the life of a company, institution, and society. Modern management trends fundamentally change its essence and content, methods and tools, while changes are getting faster. Knowing the basics of management is a necessity not only for managers, practically for all employees who hold key positions in the company or institution. However, it is not just a question of taking a basic course, managers must be prepared for lifelong learning and adaptation to new trends, knowledge, methods and tools. The course deals with the basics of management in the context of its modern trends and is therefore the starting point for further study of managerial and economic fields at the university. 32BE-P-PETR-02 Political Economy and International Trade Relations Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be done. Several topics dealing with the economic policy will be discussed: External Balance, Exchange Rate Policy, Free Markets vs. Strategic Trade Policy. A modern approach will tackle the Balance of Payment analysis, emphasising the good and service transactions vs the capital flows registered in the capital account transactions. The methodology introduces to students the important section of International political economy (IPE) relating to international trade. The course will focus on core issues of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed, including the breaking issue of Strategic Trade Policy and the industrial promotion, purposely implemented by developed countries 32BE-P-PMAR-01 Principles of Marketing Z.ZK 4 The course focuses on understanding the objectives and role of marketing in a company. Students will be introduced to the fundamentals of marketing and learn the procedures and techniques used in market segmentation, positioning and designing marketing mix tools. The marketing mix is introduced as a set of objectives and decisions in the areas of product, pricing, distribution and communication. 32BE-P-PRSK-01 Presentation Skills ZK 3 Students will adopt main rules of verbal, nonverbal a para verbal (voice) communication and principles of presentation and communication strategies in English. Students will develop their own presentation skills in practical exercises. They will get feedback in a form of self-evaluation, "peer-review" and lecturer comments. The course provides students with knowledge of fundamental integrated business processes of sales and logistics, production and human resources management in SAP S/4HANA 32BE-P-SDGB-02 Social Determinants of Global Business ZK 6 32BE-P-TRST-01 Transportation Technology 3 The course serves as a technical extension of the knowledge of economics and management students, in this case in the field of transport. It introduces students to the basic problems and concepts of this field. It is an ideal area for applying knowledge in the field of project management, corporate management, strategic management and/or economics 32BE-P-WEBS-01 World Economy and Business The course introduces students of the technical universities to international business. Throughout the course, an interesting contrast between the inspiring trade theory and the alternative instances of economic policy will be done. When analysing the international business context, the student must interpret the role of big players, mainly in the technological markets. Alongside, he/she must assess the degree of market power and the apparent strategies designed for taking advantage of pricing policy. Several topics affecting the international

business will be discussed: External Balance, Exchange Rate Policy, Free Markets vs Strategic Trade Policy. A modern approach will tackle the trends in supplying new products: two sides markets, digital markets, online system of payments. The methodology introduces to students the important section of International Business. The course will focus on the links of international trade and domestic policies, such as diverse development strategies, the role of multinational corporations, and the policies of protectionism or free trade. A set of case studies relating to the present state of affairs of international trade will be analyzed, including the braking issue of Strategic Trde Policy and the Industrial promotion, purposely implemented by developed countries. 32BL-P-ENL1-01 English Language 1 The course is suitable for students of bachelor managerial studies.
