### Study plan

## Name of study plan: Bachelor TET Common Part of Study Full-Time from 2025/26

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Technology in Transportation and Telecommunications

Type of study: Bachelor full-time

Required credits: 90 Elective courses credits: 0 Sum of credits in the plan: 90

Note on the plan:

Name of the block: Compulsory courses Minimal number of credits of the block: 90

The role of the block: Z

Code of the group: 1S-BP-TET-24/25

Name of the group: 1st Sem. Bachelor Full-Time TET from 2024/25

Requirement credits in the group: In this group you have to gain 30 credits

Requirement courses in the group: In this group you have to complete 9 courses

Credits in the group: 30 Note on the group:

Note on the (	<u> </u>

#### Characteristics of the courses of this group of Study Plan: Code=1S-BP-TET-24/25 Name=1st Sem, Bachelor Full-Time TET from 2024/25

Onaractoriotics or	the dearest of this group of study frum: odds=10 Bi 1212420 Hams=10t Schill Business 1	an	110111 202-720
11CAL1	Calculus 1	Z,ZK	7
Sequence of real number	ers and its limit. Basic properties of mappings. Function of one real variable, its limit and derivative. Indefinite integral, Newton in	tegral, Riemann i	ntegral, improper
Riemann integral. First-	order differential equations, linear differential equations.		
11LA	Linear Algebra	Z,ZK	3
Vector spaces (linear co	mbinations, linear independence, dimension, basis, coordinates). Matrices and operations. Systems of linear equations and	their solvability. D	eterminants and
their applications. Scala	r product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classification.		
12ZADY	Introduction to Transportation Engineering	Z,ZK	4

18MTY	Materials Science and Engineering	Z,ZK	3
Basic course of materia	als science and engineering explains mechanical properties of structural materials based on their bonding forces and microstru	ucture. However th	e main attentior
is paid to metals as the	e most important engineering materials, also other major classes of materials are presented, namely ceramics, polymers and	composites. Atten	tion is also paid
to degradation process	ses in materials, to defectoscopy and to main mechanical tests.		
11GIE	Geometry	KZ	3
Differential geometry of	f curves - parameterization, the arc of the curve, torsion and curvature, Frenet's trihedron. Kinematics - a curve as a trajector	y of the motion, th	e velocity, and
acceleration of a partic	ele moving on a curved path.		
14ASD	Algorithm and Data Structures	KZ	3
Students will analyze p	roblems, design a theoretical solution to a given problem and write the resulting algorithm using flowcharts, practice reading a	lgorithms written u	sing flowcharts
and use basic Boolear	algebra to construct constraints in algorithms. Students will be introduced to the basics of the Python programming language	e - variable, branch	ning, loops, the
will learn to work with	variables of basic data types (integer, floating point and string) and the list data structure in their programs.		
18TKK	Technical Drawing and Designing	KZ	4
16UDOP	Introduction into Vehicles	Z	2
Vehicles and transport	ation systems. Functionality and setup. Movement and drive principles. Engines and their characteristics. Rail, road, air and w	ater transport. Alte	rnative means
of transport. Lifting equ	uipment and conveyors. Legislation.		
TV-1	Physical Education	Z	1

Code of the group: 2S-BP-TET-20/21

tasks. Soft and hard systems, methods for soft system analysis.

Name of the group: 2nd Sem. Bachelor Full-Time TET from 2020/21

Requirement credits in the group: In this group you have to gain 30 credits

Requirement courses in the group: In this group you have to complete 9 courses

Credits in the group: 30 Note on the group:

## Characteristics of the courses of this group of Study Plan: Code=2S-BP-TET-20/21 Name=2nd Sem. Bachelor Full-Time TET from

2020/21			
11CAL2	Calculus 2	Z,ZK	5
Linear differential ed	uations and their systems, differential calculus of functions of several real variables. Riemann integral in Rn. Line and surface in	tegrals.	
11STAT	Statistics	Z,ZK	4
Basics of probability	Descriptive statistics Population and sample, limit theorem Point estimate, construction and properties Interval estimates Parar	netric tests Nonpa	rametric tests
Regression and cor	elation analysis		
12ZTS	Railway Lines and Stations	Z,ZK	4
Rail transport. Railw	ay track geometry parameters. Route layout of railway lines. Railway line construction - railway substructure and superstructure	Spatial layout of r	ailway lines.
Railway control syst	ems in relation to infrastructure. Operating and carriage points. Railway lines net and category. Traction in rail transport.		
18SAT	Structural Analysis	Z,ZK	4
General system of f	pres in plane and space. Calculation of reactions of bodies and structures. Assessment of internal forces on statically determin	ate beams and sin	nple girders.
Principle of virtual w	ork. Kinematic method for calculation of reactions of statically determinate systems. Determination of axial forces in truss construction	ons. Cross-section	al characteristic
of planar shapes. Fi	per polygons and chains.		
20SYSA	Systems Analysis	Z,ZK	5
Introduction to syste	m sciences, system viewpoint, terminology, typical system analysis tasks, system identification, system interface and interface ta	sks, processes, s	ystem behaviou
and its analysis stro	ing functions and processes, genetic code, system identity, system architecture. Tools for system analysis - Petri nets, decision i	ables algorithms	for structural

14PRG	Programming	KZ	2
The Course Programmii	ng builds on and fully extends the course 14ASD (Algorithmization and Data Structures). The knowledge of the Python progr	amming language	is expanded
here so that the participa	ant gains skills and can apply them to solve various follow-up tasks. Main topics: lists, multidimensional arrays, sorting and se	arching, tuples, s	ets, dictionaries,
working with date and ti	me, regular expressions, functions and procedures, working with files (CSV, JSON, XML).		
17TEDL	Transport Technology and Logistics	KZ	3
Basic terms in transport	technology and logistics, particular steps of transport planning, line planning, timetabling, planning in pasanger and freight t	ransport, organisa	ation of traffic in
each transport modus, t	echnologic factors of the side of operator and client, organisation of city transport, logistic technologies and their aplication u	sing various trans	sport modus.
21ZALD	Basics of Air Transport	KZ	2
History, definitions, term	inology, basic rules. VFR/IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigati	on. Weight, baland	ce, performance.
Flight planning, optimiza	ttion of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, g	round handling, s	ecurity. Air crew.
Airlines and economics.	Space technologies.		
TV-2	Physical Education	Z	1

Characteristics of	f the courses of this group of Study Plan: Code=3S-BP-TET-24/25 Name=3rd Sem. Bachelor F	ull-Time TET	irom 2024/2
11FYZ	Physics	Z,ZK	5
Kinematics, dynamics	, Newton's laws, force fields, mechanics of continuum, thermodynamics, introduction to electrostatics and electric current.		
12MDE	Transport Models and Transport Excesses	Z,ZK	3
Parameters of the traff	fic flow and methods for their measurement. Models of the traffic flow, communications load, line and urban systems. Theory o	f queues, shock w	aves. Quality of
transport and its asses	ssment. Statistical characteristics of transport. Transport excesses, their analysis, the causes, identify and minimize the conse	quences. Improvin	g of transport
safety and fluency.			
11TGA	Graph Theory and its Applications in Transport	Z,ZK	4
Basic terms of graph t	heory, paths in graphs, flows in networks, location problems, design problems on graphs, optimum routing, use of graphs in ot	her scientific disci	plines.
18PZP	Elasticity and Strength	Z,ZK	3
Tension and compress	sion. Bending of beam. Shear stress in bending of beam. Design and analysis of cross section of beam. Design of riveted, bolt	ed and welded joir	nts of structures
Analysis of deflection	curve of beams. Torsion of circular cross sections. Combined loading. Stability.		
20UITS	Introduction to Intelligent Transport Systems	Z,ZK	7
Terminology and legisl	ative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of i	nformation and tele	ecommunicatio
systems for ITS. Princ	iples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real exam	ples of possible ap	plications of the
principles of ITS.			
12PPOK	Designing Roads, Highways and Motorways	KZ	3
Definition, types, owner	ership, maintenance, management and categorization of roads and highways. Curve and transition curve. Sinuosity and stand	ard speed. Route i	n rural areas.
Range of vision for sto	pping and overtaking. Road body - shapes and proportions, bottom and superstructure. Drainage and components of roads. S	afety device. Cros	sings, junctions
intersections.			
14DATS	Database Systems	KZ	2
Basic concepts of data	abase systems, conceptual model, relational data model, the principles of normal forms, relational database design, security a	and integrity of data	a, database
queries, relational alge	ebra, SQL language, client / server, multilayer architectures, distributed database systems. Access to data via the WWW.		
15JZ1A	Foreign Language - English 1	Z	3
Grammatical Structure	es and Style. Selection of conversation topics relating to transportation sciences. Extending vocabulary, developing perceptive and	d communicative s	kills. Elementar

stylistics forms. Oral and written presentation of original research. Academic text principles and reading comprehension. Principles of rhetoric.

16UDOP	Introduction into Vehicles	Z	2
Vehicles and trans	sportation systems. Functionality and setup. Movement and drive principles. Engines and their characteristics. Rail, road, air and wate of transport. Lifting equipment and conveyors. Legislation.	er transport. Alterna	tive means
17TEDL	Transport Technology and Logistics	KZ	3
	nsport technology and logistics, particular steps of transport planning, line planning, timetabling, planning in pasanger and freight transport planning.	nsport, organisatior	of traffic in
each transport n	nodus, technologic factors of the side of operator and client, organisation of city transport, logistic technologies and their aplication us	ing various transpo	ort modus.
18MTY	Materials Science and Engineering	Z,ZK	3
Basic course of ma	aterials science and engineering explains mechanical properties of structural materials based on their bonding forces and microstructural	ire. However the ma	ain attention
is paid to metals a	is the most important engineering materials, also other major classes of materials are presented, namely ceramics, polymers and cor	nposites. Attention	is also paid
	to degradation processes in materials, to defectoscopy and to main mechanical tests.		

Tanadan a 1	Elasticity and Strength	Z,ZK	3
rension and compre	ession. Bending of beam. Shear stress in bending of beam. Design and analysis of cross section of beam. Design of riveted, bolted a	nd welded joints	of structures.
	Analysis of deflection curve of beams. Torsion of circular cross sections. Combined loading. Stability.		
18SAT	Structural Analysis	Z,ZK	4
General system of	of forces in plane and space. Calculation of reactions of bodies and structures. Assessment of internal forces on statically determinate	beams and sim	ple girders.
Principle of virtual w	ork. Kinematic method for calculation of reactions of statically determinate systems. Determination of axial forces in truss constructions.	Cross-sectional c	haracteristics
	of planar shapes. Fiber polygons and chains.		
18SPP	Seminary from Elasticity and Strength	Z	0
Excersise for pract	ice. Tension and compression. Bending of beam. Shear stress during bending of beam. Design and analysis of cross section of beam	n. Analysis of defl	ection curve
	of beam. Torsion of circle cross section. Combined loading. Stability of compressed bar and buckling.		
18SS	Seminary from Structural Analysis	Z	0
	se. General system of forces. Reactions of mass objects and compound systems. Internal forces on statically determinate beam and	•	
of principle of virtua	al works for calculation of reactions of staticaly determinate systems. Determination of axial forces in truss construction - method of joint process of the construction in the construction is a second construction of the construction of the construction is a second construction of the	oints and method	of sections.
	Geometry of cross sections. Plane fiber polygons.		
18STKK	Seminary from Technical Drawing and Designing	Z	0
18TKK	Technical Drawing and Designing	KZ	4
20SYSA	Systems Analysis	Z,ZK	5
Introduction to syste	em sciences, system viewpoint, terminology, typical system analysis tasks, system identification, system interface and interface tasks,	processes, syste	em behaviour
and its analysis, s	strong functions and processes, genetic code, system identity, system architecture. Tools for system analysis - Petri nets, decision tab	les, algorithms fo	or structural
	tasks. Soft and hard systems, methods for soft system analysis.		
20UITS	Introduction to Intelligent Transport Systems	Z,ZK	7
Terminology and leg	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform	nation and teleco	mmunication
Terminology and leg	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of information inciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples	nation and teleco	mmunication
