Recomended pass through the study plan

Name of the pass: Bachelor Full-Time TET-Common Part of the Study from 2023/24

Faculty/Institute/Others:

Department:

Pass through the study plan: Bachelor TET Common Part of Study Full-Time from 2023/24

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Technology in Transportation and Telecommunications

Type of study: Bachelor full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
14ASD	Algorithm and Data Structures Tomáš Brandejský, Michal Je ábek, Alena Kubá ová, Jan Procházka, Vít Fábera, Martin Fiala Vít Fábera Vít Fábera (Gar.)	KZ	3	0P+2C+8B	Z	Z

List of groups of courses of this pass with the complete content of members of individual groups

List of courses of this pass:

11CAL1	Name of the course	Completion	Credits
I I O/ (L I	Calculus 1	Z,ZK	7
Sequence of real no	umbers and its limit. Basic properties of mappings. Function of one real variable, its limit and derivative. Indefinite integral, Newton integri Riemann integral. First-order differential equations, linear differential equations.	ral, Riemann integr	al, improper
11CAL2	Calculus 2	Z,ZK	5
	r differential equations and their systems, differential calculus of functions of several real variables. Riemann integral in Rn. Line and		•
11FYZ	Physics Kinematics, dynamics, Newton's laws, force fields, mechanics of continuum, thermodynamics, introduction to electrostatics and elect	Z,ZK	5
11GIE	Geometry	KZ	3
	etry of curves - parameterization, the arc of the curve, torsion and curvature, Frenet`s trihedron. Kinematics - a curve as a trajectory o acceleration of a particle moving on a curved path.		_
11LA	Linear Algebra	Z,ZK	3
	ar combinations, linear independence, dimension, basis, coordinates). Matrices and operations. Systems of linear equations and their their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificati	ir solvability. Deterr	_
11SCFZ	Seminar of Physics	Z	0
	Solving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, thermody		•
11SSF	Secondary School Physics Course	Z	0
1.00.	Basics of kinematics, dynamics, thermodynamics, electric field and magnetic field.	_	Ü
11STAT	Statistics	Z.ZK	4
	lity Descriptive statistics Population and sample, limit theorem Point estimate, construction and properties Interval estimates Paramet	, ,	·=
240.00 0. p. 0240.	Regression and correlation analysis	o tooto monparan	101.10 10010
11TGA	Graph Theory and its Applications in Transport	Z,ZK	4
	f graph theory, paths in graphs, flows in networks, location problems, design problems on graphs, optimum routing, use of graphs in c		-
12MDE	Transport Models and Transport Excesses	Z,ZK	3
Parameters of the	traffic flow and methods for their measurement. Models of the traffic flow, communications load, line and urban systems. Theory of quassessment. Statistical characteristics of transport. Transport excesses, their analysis, the causes, identify and minimize the consequences safety and fluency.	ieues, shock waves	s. Quality of
12PPOK	Designing Roads, Highways and Motorways	KZ	3
12ZTS Rail transport. Ra	intersections. Railway Lines and Stations ailway track geometry parameters. Route layout of railway lines. Railway line construction - railway substructure and superstructure. S	Z,ZK	4 way lines.
	Railway control systems in relation to infrastructure. Operating and carriage points. Railway lines net and category. Traction in rail to	ransport.

each transport m	odus, technologic factors of the side of operator and client, organisation of city transport, logistic technologies and their aplication using	ng various trans	oort modus.
18MTY	Materials Science and Engineering	Z,ZK	3
Basic course of ma	terials science and engineering explains mechanical properties of structural materials based on their bonding forces and microstructure	e. However the r	nain attention
s paid to metals as	the most important engineering materials, also other major classes of materials are presented, namely ceramics, polymers and com	posites. Attentio	n is also paid
	to degradation processes in materials, to defectoscopy and to main mechanical tests.		
18PZP	Elasticity and Strength	Z,ZK	3
Tension and compr	ession. Bending of beam. Shear stress in bending of beam. Design and analysis of cross section of beam. Design of riveted, bolted ar	nd welded joints	of structures
	Analysis of deflection curve of beams. Torsion of circular cross sections. Combined loading. Stability.		
18SAT	Structural Analysis	Z,ZK	4
	of forces in plane and space. Calculation of reactions of bodies and structures. Assessment of internal forces on statically determinate		
rinciple of virtual v	ork. Kinematic method for calculation of reactions of statically determinate systems. Determination of axial forces in truss constructions. C	Cross-sectional o	haracteristics
	of planar shapes. Fiber polygons and chains.		
18SPP	Seminary from Elasticity and Strength	Z	0
Excersise for prac	ice. Tension and compression. Bending of beam. Shear stress during bending of beam. Design and analysis of cross section of beam	. Analysis of def	lection curve
	of beam. Torsion of circle cross section. Combined loading. Stability of compressed bar and buckling.		
18SS	Seminary from Structural Analysis	Z	0
	se. General system of forces. Reactions of mass objects and compound systems. Internal forces on statically determinate beam and s		
of principle of virtu	al works for calculation of reactions of staticaly determinate systems. Determination of axial forces in truss construction - method of journal of successions.	oints and method	d of sections.
	Geometry of cross sections. Plane fiber polygons.

20LUTS	Introduction to Intelligent Transport Systems	7 7K	7
20UITS	Introduction to Intelligent Transport Systems Introduction to Intelligent Transport Systems Instruction and their architecture Telematics systems in practice and their operation. Fundamentals of information for the systems and their architecture.	Z,ZK	7
Terminology and le	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform	nation and teleco	ommunication
Terminology and le	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform nciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples	nation and teleco	ommunication
Terminology and le systems for ITS. Pr	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform nciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS.	nation and telect of possible appli	ommunication cations of the
Terminology and leasystems for ITS. Pr	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of information and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport	nation and telector of possible appli Z	cations of the
Terminology and lessystems for ITS. Pr 21SLD History, definiti	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of information inciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio nav	nation and telector of possible appli Z vigation. Weight,	ommunication cations of the 0 balance,
Terminology and lessystems for ITS. Pr 21SLD History, definiti	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of information inciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio naw the planning, optimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic mar	nation and telector of possible appli Z vigation. Weight,	ommunication cations of the 0 balance,
Terminology and lessystems for ITS. Pr 21SLD History, definiti performance. Flig	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform neighborholders and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic man security. Air crew. Airlines and economics. Space technologies.	nation and telect of possible appli Z vigation. Weight, nagement, grour	ommunication cations of the 0 balance,
Terminology and lessystems for ITS. Pr 21SLD History, definiti performance. Flig	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of information inciples and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio naw the planning, optimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic mar	nation and telect of possible appli Z vigation. Weight, nagement, groun	ommunication cations of the 0 balance, and handling,
21SLD History, definiti performance. Flig 21ZALD History, definiti	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform neighborholders and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic man security. Air crew. Airlines and economics. Space technologies. Basics of Air Transport	nation and telector possible appliar Z vigation. Weight, nagement, ground KZ	ommunication cations of the 0 balance, and handling, 2 performance
21SLD History, definiti performance. Flig 21ZALD History, definiti	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform neighborholder in the properties of traffic data, localization and navigation. Practical work with traffic data. Real examples of principles of ITS. Seminar of Air Transport Tons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation, optimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic man security. Air crew. Airlines and economics. Space technologies. Basics of Air Transport terminology, basic rules. VFR/IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation. V	nation and telector possible appliar Z vigation. Weight, nagement, ground KZ	ommunication cations of the O balance, and handling, 2 performance
Terminology and lessystems for ITS. Pr 21SLD History, definiti performance. Flig 21ZALD History, definitions,	gislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform neighborholders and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation, optimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, architecture. Space technologies. Basics of Air Transport terminology, basic rules. VFR/IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation. Vimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, grounding in the propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation. Vimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, grounding in the propulsion of aircraft. Aircraft design.	nation and telector possible appliar Z vigation. Weight, nagement, ground KZ	ommunication cations of the 0 balance, and handling, 2 performance
Terminology and lesystems for ITS. Pr 21SLD History, definiti performance. Flig 21ZALD History, definitions, Flight planning, opt	pislative framework telematics systems and their architecture. Telematics systems in practice and their operation. Fundamentals of inform neighbor and technical support measurement of traffic data, localization and navigation. Practical work with traffic data. Real examples of ITS. Seminar of Air Transport Ons, terminology, basic rules. VFR / IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation, optimization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, arc rew. Airlines and economics. Space technologies. Basics of Air Transport terminology, basic rules. VFR/IFR. Basics of aerodynamics. Propulsion of aircraft. Aircraft design. Basics of navigation, radio navigation. Viginization of speed and heights, minimum fuel. Limitations of operation, maintenance, service life of aircraft. Traffic management, ground Airlines and economics. Space technologies. Physical Education	nation and telector possible appliar Z vigation. Weight, nagement, groun KZ Veight, balance, and handling, second	ommunication cations of the 0 balance, and handling, 2 performance. urity. Air crew.
