## Recomended pass through the study plan

## Name of the pass: Bachelor Full-Time PIL (CS) from 2025/26

Faculty/Institute/Others: Department: Pass through the study plan: Bachelor PIL (CS) Full-Time from 2024/25 Branch of study guranteed by the department: Welcome page Guarantor of the study branch: Program of study: Professional Pilot Type of study: Bachelor full-time Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

	Name of the course / Name of the group of courses					
Code	(in case of groups of courses the list of codes of their members)	Completion	Credits	Scope	Semester	Role
	Tutors, <b>authors</b> and guarantors (gar.)

## List of courses of this pass:

Code	Name of the course	Completion	Credits
00Y1XB	Active participation in a scientific project, workshop, short-term trip abroad	KZ	2
11CAL1	Calculus 1	Z,ZK	7
Sequence of real numb	ers and its limit. Basic properties of mappings. Function of one real variable, its limit and derivative. Indefinite integral, Newton integ Riemann integral. First-order differential equations, linear differential equations.	ral, Riemann integr	al, imprope
11CAL2	Calculus 2	Z.ZK	5
Linear diff	erential equations and their systems, differential calculus of functions of several real variables. Riemann integral in Rn. Line and	surface integrals.	1
11EMO	Electromagnetic Field and Optics	Z,ZK	4
1	Electric field. Electric current. Magnetic field. Electromagnetic field. Optics. Basics of solid-state physics.	1 ,	I
11FYZ	Physics	Z,ZK	5
Kine	matics, dynamics, Newton's laws, force fields, mechanics of continuum, thermodynamics, introduction to electrostatics and elec	tric current.	I
11GIE	Geometry	KZ	3
Differential geometry of	f curves - parameterization, the arc of the curve, torsion and curvature, Frenet's trihedron. Kinematics - a curve as a trajectory of	of the motion, the v	elocity, and
	acceleration of a particle moving on a curved path.		
11LA	Linear Algebra	Z,ZK	3
Vector spaces (linear c	ombinations, linear independence, dimension, basis, coordinates). Matrices and operations. Systems of linear equations and the		
rooter opacoo (inical o		ir solvability. Deteri	minants an
	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat		minants an
11MSP			minants an
11MSP System and subsystem	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different	ion. Z,ZK ential and differentia	4 al equations
11MSP System and subsystem	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different r system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer function	ion. Z,ZK ential and differentia	4 al equations
11MSP System and subsystem	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different	ion. Z,ZK ential and differentia on. Stability of LTI s	4 al equations
11MSP System and subsystem	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different r system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer function	ion. Z,ZK ential and differentia	4 al equations
11MSP System and subsystem Linear and nonlinea 11SCFZ	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different ar system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer function Discretization of continuous systems. System interconnection.	ion. Z,ZK ential and differentia on. Stability of LTI s	4 al equations systems.
11MSP System and subsystem Linear and nonlinea 11SCFZ	their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their classificat Modeling of Systems and Processes external and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of different ar system, stationary and non-stationary system, causality. 	ses for improvement of theoretical knowledge in a range of at least PPL(A) of the objects 010 - 090 in accordance with Part FCL. The	basics of flight cor	ntrol, dual
	ights and navigation flights. This course is intended only for long-term student, who are in integrated pilots training and study all course		
	(Professional Pilot) in all three years.		
21LPX2	Flight Training 2	KZ	2
Practical exercise	es for improvement of theoretical knowledge in a range MEP land and IFR from the relevant subjects in accordance with Part FCL. The	e basics of instrum	hent flying,
dual exercises, er	nergency procedures, descents and navigation flights. This course is intended only for long-term student, who are in integrated pilots	training and study	all courses
	related to Study field PIL (Professional Pilot) in all three years.		
21LPX3	Flight Training 3	KZ	2
	Deepening of theoretical knowledge and practical examination of progress in professional competence in pilot skills and know	edge	
21LPX4	Flight Training 4	KZ	2
	Deepening of theoretical knowledge and practical examination of progress in professional competence in pilot skills and know	ledge	
21LPX5	Flight Training 5	KZ	2
	Deepening of theoretical knowledge and practical examination of progress in professional competence in pilot skills and know	edge	
21LVIP	MCC - Multicrew Cooperation	KZ	2
Flight safety analys	sis in relation to human factor. MCC - basic principles, phases and methods within the area of air transport. CRM - leadership, situation	al awareness, deci	sion making
	process, communication, effect of stress to the multi-crew performance, standard operational procedures, automation.		
21MEE1	Meteorology 1	Z,ZK	3
Composition, size	and vertical structure of the atmosphere. QNH, QFE, QFF, QNE, density and height measurements. Wind, moisture and adiabatic pro-	ocesses. Creating a	and types of
	cloud, fog, haze. Precipitation. Types of air masses, atmospheric fronts. Distribution of pressure, cyclones, anticyclones, non-fronta	l cyclone.	
21MET2	Meteorology 2	Z,ZK	5
Climatic zones,	tropical climatology, meteorological situation of mid-latitudes. Icing, turbulence, wind shear, thunderstorms, tornadoes, flying in the st	ratosphere, mounta	ain areas,
	reducing visibility phenomena. Observation, weather maps, important information for flight planning.		
210BN	General Navigation	ZK	5
The Earth: latitu	de and longitude. Reference systems. Circles on the Earth and distance. Calculations. Time. Magnetism and sirections. Wind and Sp	ed: Course, headi	ng, track.
Calculations: navig	ation computer conversions, TAS, rates. Calculations: 1 in 60 and navigation computer track and GS. Projections. Charts. VFR navigation	ation. Nav Log prep	aration and
	use. Navigation display. Navigation in remote and oceanic areas.		
21PKL2-E	Advanced Flying 2	ZK	2
	es are based on requirements laid down in Commission Regulation (EU) No 1178/2011, subjects 081 and 100. Multi engine aircraft a	-	
energy manage	ement, stabilized approach and landing errors, jet - performance - engine out flight, jet - handling - engine out flight go around, UPRT,	volcanic ash, cold	weather
	operations, operation manuals, MEL procedures and deviations, flight time limitation		
21PML-E	Flight Planning and Monitoring	Z,ZK	3
	Flight planning for VFR flights for small, single- and multi-engine aeroplanes	,	
21PPY1-E	Operational Procedures 1	Z,ZK	3
	Annex 6, PART-OPS, Air operator, Aircraft operation, Operating procedures, Airplane equipment, Flight management, Airspa		
21PRJ2	Instrumentation 2	ZK	3
Compass, gyrosco	pic instruments (turn indicator, attitude indicator, directional gyro), inertial instruments, recording and monitoring systems, warning sy	/stems (TCAS, GP	WS), AFCS
	(autopilot, flight director, autothrust), FMS, flight envelope protection, communication systems, flight computers.		
21PRKP-E	Practical Flight Planning	Z,ZK	4
	nce 2. fuel planning, PDP, RIF, RCF 3. ATC FPL 4. Preflight procedure and briefing-NOTAM + weather(METAR, SIGMET) 5. Jeppesen		
theory 7. VFR flig	ght planning- ICAO mapa, softwary 8. IFR flight planning- theory 9. PBN- RNAV, RNP 10. IFR flight planning- softwary 11. MRJT- OFI	<sup>2</sup> 12. ETOPS a NAT	r hla 13.
	PET, PSR, PNR 14. practical VFR a IFR flight planning		-
21PRY2-E	Operational Procedures 2	ZK	3
Flight documen	tation and manuals, Icing and protection of the aircraft against icing, noise abatement procedures, Abnormal and emergency situation	is and procedures,	, Runway
	contamination	71/	0
21PUP1	Instrumentation 1	ZK	3
	on principles of instrumentation, electronic displays, basics of measurement - sensitivity and errors, engine instrumentation (pressure		
quantity and fuel fi	ow measurement, torque and EPR measurement), indication in other aircraft systems (position, fire and icing indication, vibration mo monitoring, aerometric instruments (sensors, altimeter, air speed indicator, VSI, ADC).	moning, pressunsa	ation system
		7 71/	4
21RNV	Radionavigation	Z,ZK	4
	nder (VDF), ADF, VOR and Doppler VOR, DME, ILS, MLS, ground ATC radar, weather Radar, SSR and transponder. Radar utilization	-	
	RNAV) - general philosophy, gauges and equipment, indication and sensors for RNAV, VOR/DME (RNAV). Autopilot and flight director and backups.	. Satellite Havigatio	in, systems

21VL-E	Aircraft Performance	Z,ZK	4
Basic terms of airc	raft performance, basic characteristic speeds, runway characteristics, single and multiengine aircraft performance class B, aircraft per	formance class A	take off and
	landing performance, after take off and missed approach climb, noise abatement procedures, range of aircraft, drift down, MEL, I	ETOPS.	
21X31	Project 1	Z	2
21X32	Project 2	Z	2
21X33	Project 3	Z	2
21Y1BC	Aviation safety and security	KZ	2
History o	f safety and security development in aviation. Modern tools for safety and security management. Research and development of safe	and secure syster	ns.
21Y1BS	Unmanned aircraft systems 1	KZ	2
Unmanned Aviatio	n Development. Aircraft design. Legislation in force in the Czech Republic. Planning and execution of the flight. Airspace division. Opprocedures. Practical flights.	erational risks and	operationa
21Y1MP	Matlab for project-oriented study	KZ	2
	bus is focused on the problem-solving during bachelor's thesis preparation and it is based on students' requests. Individual exercises		according to
particular examp	les, based on actual students' needs and suggestions. The subject will have a flexible form, which is expected to bring an improvement	ent of students' Ma	atlab skills.
21Y10H	Airline Business and Operations	KZ	2
The course provide	s a comprehensive view of the commercial, operational and transportation activities of air transport companies. It focuses on the organiz	ational structure o	f companies
various aspects of	their strategy, economic and operational indicators. It introduces students in detail to operational processes and the essentials of transp	ortation processe	s. It provide
	a basic view of the economic aspects of air transport.		
21Y1RZ	Human Resources Management	KZ	2
The position of	human resources in the organization and related disciplines file. Substance, importance and challenges of human resources manage	ment. Internal and	dexternal
environment of hur	nan resource management. Human resource planning. Search, recruitment and selection of employees. Motivation, evaluation and rer	nuneration of staff	. Positioning
	dismissal and redundancies of employees. Education of employees. Planning career management.		
21ZYT1	Principles of Flight 1	Z,ZK	3
, ,	, relation between drag and speed, streamline, boundary layer, formula of continuity, formula of Bernoulli, lift and drag, air flow and pr		
attack, reactions of	wing in air flow, lift and drag of a wing and an aircraft, coefficient of lift and drag, critical angle of attack, wing with final span, induced	drag, interference	e, devices fo
	lift and drag increase.		
21ZYT2	Principles of Flight 2	Z,ZK	3
	amic longitudinal stability, neutral point, location of centre of gravity, static directional & amp; lateral stability, dynamic directional & amp		
(longitudinal), ya	w (directional) & amp; roll (lateral), roll/yaw interaction, trimming, speed of sound, Mach number, compressibility, shock waves, critical	Mach number, ae	rodynamic
	heating, operating limitations, manoeuvring envelope, gust-load diagram.		1
