Recomended pass through the study plan

Name of the pass: Bachelor Full-Time TET-DOS from 2025/26

Faculty/Institute/Others:

Department:

Pass through the study plan: Bachelor TET-DOS Full-Time from 2025/26

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Technology in Transportation and Telecommunications

Type of study: Bachelor full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
14ASD	Algorithm and Data Structures Tomáš Brandejský, Michal Je ábek, Alena Kubá ová, Jan Procházka, Vít Fábera, Martin Fiala Vít Fábera Vít Fábera (Gar.)	KZ	3	0P+2C+8B	Z	Z
11CAL1	Calculus 1 Olga Vraštilová, Tomáš Tasák, Magdalena Hykšová, Bohumil Ková, Ond ej Navrátil Bohumil Ková Ond ej Navrátil (Gar.)	Z,ZK	7	2P+4C+22B	Z	Z
11GIE	Geometry Old ich Hykš, Pavel Provinský, Šárka Vorá ová Old ich Hykš Old ich Hykš (Gar.)	KZ	3	2P+2C+12B	Z	Z

List of courses of this pass:

Code	Name of the course	Completion	Credits
00Y1XB	Active participation in a scientific project, workshop, short-term trip abroad	KZ	2
11CAL1	Calculus 1	Z,ZK	7
	s and its limit. Basic properties of mappings. Function of one real variable, its limit and derivative. Indefinite integral, Newton Riemann integral. First-order differential equations, linear differential equations.		al, imprope
11CAL2	Calculus 2	Z,ZK	5
Linear differ	ential equations and their systems, differential calculus of functions of several real variables. Riemann integral in Rn. Line	e and surface integrals.	
11EMOP	Electromagnetic Field and Optics	Z,ZK	4
· ·	Electric field. Electric current. Magnetic field. Electromagnetic field. Optics. Basics of solid-state physics.	,	
11FYZ	Physics	Z,ZK	5
Kinem	natics, dynamics, Newton's laws, force fields, mechanics of continuum, thermodynamics, introduction to electrostatics and	d electric current.	
11GIE	Geometry	KZ	3
Differential geometry of o	curves - parameterization, the arc of the curve, torsion and curvature, Frenet's trihedron. Kinematics - a curve as a trajectation of a particle moving on a curved path.	ctory of the motion, the v	elocity, and
11LA	Linear Algebra	Z,ZK	3
Vector spaces (linear com	nbinations, linear independence, dimension, basis, coordinates). Matrices and operations. Systems of linear equations ar their applications. Scalar product. Similarity of matrices (eigenvalues and eigenvectors). Quadratic forms and their clas	•	minants and
11MDSD	Collecting and Processing of Traffic Data	KZ	3
-	Collecting and Processing of Traffic Data of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us	I	
-	· · · · · · · · · · · · · · · · · · ·	I	
Basic principles of	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us	se in additional application	ons.
Basic principles of 11MSP System and subsystem, e.	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us Modeling of Systems and Processes	se in additional application Z,ZK differential and differential	ons. 4 al equations
Basic principles of 11MSP System and subsystem, e.	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of	se in additional application Z,ZK differential and differential	ons. 4 al equations
Basic principles of 11MSP System and subsystem, e.	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer to	se in additional application Z,ZK differential and differential	ons. 4 al equations
Basic principles of 11MSP System and subsystem, e Linear and nonlinear s	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer to Discretization of continuous systems. System interconnection.	se in additional application Z,ZK differential and differential function. Stability of LTI s	4 al equations
Basic principles of 11MSP System and subsystem, e Linear and nonlinear s	of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for us Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer to Discretization of continuous systems. System interconnection. Seminar of Physics	se in additional application Z,ZK differential and differential function. Stability of LTI s	d 4 equations
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state Solution Soluti	Of traffic detection and data collection, specific problems of the field of traffic data. Data preprocessing and analysis for use Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer to Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the	se in additional application Z,ZK differential and differential function. Stability of LTI s Z ermodynamics.	ons. 4 al equations systems.
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear states and system Solvester Solves	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer to Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the Seminar of Electromagnetic Field and Optics	se in additional application Z,ZK differential and differential function. Stability of LTI s Z ermodynamics.	ons. 4 al equations systems.
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state Solution Soluti	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer of Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the Seminar of Electromagnetic Field and Optics Solving problems on electric and magnetic field, electromagnetic field, optics and basics of solid-state physics	se in additional application Z,ZK differential and differential function. Stability of LTI s z ermodynamics. Z	ons. 4 al equations systems. 0
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state Solution Soluti	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer of Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the Seminar of Electromagnetic Field and Optics Solving problems on electric and magnetic field, electromagnetic field, optics and basics of solid-state physics Secondary School Physics Course	se in additional application Z,ZK differential and differential function. Stability of LTI s z ermodynamics. Z	ons. 4 al equations systems. 0
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state 11SCFZ Solution 11SEMO 11SSF 11STAT	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer of Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the Seminar of Electromagnetic Field and Optics Solving problems on electric and magnetic field, electromagnetic field, optics and basics of solid-state physics Secondary School Physics Course Basics of kinematics, dynamics, thermodynamics, electric field and magnetic field. Statistics scriptive statistics Population and sample, limit theorem Point estimate, construction and properties Interval estimates Pages in the statistics in the statist	se in additional application Z,ZK differential and differential function. Stability of LTI s Z ermodynamics. Z i. Z,ZK	ons. 4 4 al equations systems. 0 0 4
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state 11SCFZ Solution 11SEMO 11SSF 11STAT Basics of probability Des	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer for Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. Continuum mechanics, the Seminar of Electromagnetic Field and Optics Solving problems on electric and magnetic field, electromagnetic field, optics and basics of solid-state physics Secondary School Physics Course Basics of kinematics, dynamics, thermodynamics, electric field and magnetic field. Statistics scriptive statistics Population and sample, limit theorem Point estimate, construction and properties Interval estimates Paragerssion and correlation analysis	se in additional application Z,ZK differential and differential function. Stability of LTI s rmodynamics. Z rmodynamics. Z Z Z,ZK arametric tests Nonparan	ons. 4 al equations systems. 0 0 4 netric tests
Basic principles of 11MSP System and subsystem, e. Linear and nonlinear state of the state of t	Modeling of Systems and Processes xternal and internal system description, continuous and discrete system, mathematics as a tool, examples of formulation of system, stationary and non-stationary system, causality. Convolutional integral. Laplace and Z transformations. Transfer for Discretization of continuous systems. System interconnection. Seminar of Physics ving problems on kinematics, particle dynamics, dynamics of particle systems and rigid body. 	and practical usuage.		
11Y1TG	Graph Theory	KZ	2
	d terminology of graph theory, graph representation. Problems of graph theory, problem instance. Graph search algorithms, trees, mir rian path, bipartite graph matching, flow networks, circulations, critical path method, traveling salesman problem. Problem of existence a		
patri problem, Eule	for their solving. Computational complexity, dealing with NP-complete problems, heuristic approach.	id optimization and	a aigonumis
11Y1ZM	Foundation of MATLAB Programming	KZ	2
	ciple of algorithmization, flow charts, description of MATLAB environment and its settings, MATLAB help, mathematical operators, matr	ices and elements	operations,
	control flow, inputs and outputs, graphics, optimization and program code debugging.		
12DOSI	Traffic Surveys and Simulations	Z,ZK	3
	ection in road transport. Traffic surveys. Automatic traffic counting. Preparation and implementation of traffic survey. Description of indiverse from real measurements. Methods of data processing and evaluation. Principles of simulation, SW environment for creating traffic		
	procedure, calibration. Processing of a simple transport model based on real data.		
12MDE	Transport Models and Transport Excesses	Z,ZK	3
	traffic flow and methods for their measurement. Models of the traffic flow, communications load, line and urban systems. Theory of qu		
transport and its	assessment. Statistical characteristics of transport. Transport excesses, their analysis, the causes, identify and minimize the consequences safety and fluency.	ences. Improving o	f transport
12MKOD	City Rail Transport	Z,ZK	5
	an rail transport. Tram lines layout and city roads. Tram track geometry parameters. Tram track superstructure. Turnouts and other con		
stops and turn space	ce. Underground and its basic characteristics. Underground nets in the world and undeground history in Prague. Underground track geom track superstructure and substructure. Underground stations. Suburban rail transport.	etry parameters. U	nderground
12POSD	Assessment of Transport Structures	KZ	3
	prical context, impact and variants, analysis of individual phases of EIA process, SEA, legislative framework in the Czech Republic, EU	J directives, implen	nentation of
EU directives, publ	ic participation, process in practice. Methods of assessing the effects of transport structures on the environment. SWOT analysis. Multicipation, process in practice. Methods of assessing the effects of transport structures. TUVD greatest Reliable and the environment.	iteria methods for a	assessment
12PPOK	of transport structures, TUKP method. Risk analysis. Landscape. Designing Roads, Highways and Motorways	KZ	3
	ownership, maintenance, management and categorization of roads and highways. Curve and transition curve. Sinuosity and standard		
	stopping and overtaking. Road body - shapes and proportions, bottom and superstructure. Drainage and components of roads. Safet	•	
	intersections.		
12PRMK	Urban Road Traffic and Design	Z,ZK	5
Composition of urb	an road, elements and routes for traffic, pedestrian and cycling transport, projection of intersections, traffic lights and its traffic safety p of traffic, precaution for blind & partially-sighted, parking, traffic area, induction of traffic, organization and regulation of tran	•	uts, calming
12PUSS	Organization Disposition of Railway Stations	KZ	3
	on. Passenger transport equipment. Freight transport equipment. Branch lines and railway traffic inside industrial company areas. Zon		-
	rve stations. Technology of work in railway station with regard to its disposition. Railway station documentations in the Czech Republic		
12SDK	Highways, Motorways and Intersections	Z,ZK	4
	ays network, transport output. Types of direction curves. Hairpin bend. Stopping sight distance and overtaking sight distance. Levels of t d intersections. Crossroads. Roundabouts. Intersections. Special types of junctions. Capacity of crossroads and intersections. Structu	•	•
	motorways. Road engineering structures. Assessment of route alternatives.		
12VHD	Public Transport	Z,ZK	5
	iblic transport, transport research, evaluation, planning of lines routes and territory operation, planning of operation parameters, prepared to the control of the control		
conceptions, opera	tion-technology and operation-economically conditions of planning of operation conceptions, planning of operation conception, planing prepare of infrastrukture (route, stops), preference of public transport, financing.	and realisation of	timetables,
12X31D	Project 1 DOS	Z	2
12X32D	Project 2 DOS	Z	2
12X33D	Project 3 DOS	Z	4
12Y1AE	Applied Ecology	KZ	2
	ecological concepts and principles, ecosystem, ecological factors, energy flow through the ecosystem. Application of knowledge with		· ·
ecology. Landso	ape ecology - origin and historical development. Landscape definition and classification. Success. Traffic constructions in the country: protection. Applied ecology.	side. Landscape ar	nd nature
12Y1C1	Designing Roads in Civil 3D I	KZ	2
	voted to the traffic buildings design field, specifically the design of roads as such, by the means of a 3D software. Students go through		
particular linear b	building, from the initial situation, over the longitudinal section, to the model and work sections and the cubic capacity calculation. The	course also includ	es a basic
12Y1C2	explanation of the traffic building design in the real-life profession. Designing Roads in Civil 3D II	KZ	2
	voted to the traffic buildings design field, specifically the design of roads as such, by the means of a 3D software. Students go through		
	uilding, from the initial situation, over the longitudinal section, to the model and work sections and the cubic capacity calculation. The		
	improved and developed. Students learn to design intersections.		
12Y1DS	Project Documentation in Practice	KZ	2 Prostical
Project accument	ation creating. Project documentation types. Support materials for project documentation creating. Building permit obtaining process. creation of some project documentation parts.	buugeι and pricinί	y. Miactical
12Y1HD	Traffic Noise	KZ	2
	on, basic terms, quantities. Basics of physiological acoustic, noise impacts on human body. Acoustic legislation, standarts, regulation	· ·	
area, principles	of urban acoustic, noise transmission, soundproofing. Types of noise sources in area. Determination of acoustic situation in the area	of interest. Method	lology of
40)/41/81	computing and measurement of transport noise. Acoustic studies, measuring protocol.		
	Combined Transportation	レフ	2
12Y1KN Combined transp	Combined Transportation oort strategy and legislation. Load units. Means of transport in combined transport. Combined transport systems. Transshipping areas	KZ Multimodal logistic	2 c centres.

12Y1KP	Communication and Promotion of Transport Projects	KZ	2
	Public Relations and the power of public opinion. Work and tasks of PR department and press spokesperson. Communication with th		on social
networks and bey	ond. Communication strategy of transport projects. Systematic goodwill building. Crisis situations in communication and preparation f	or crisis communic	ation. The
	influence of political marketing and political PR on transport projects. Lobbing.		
12Y1PC	Pedestrian and Cycling Transport	KZ	2
Routes for pedestri	ans. Pedestrian crossings. Modifications for blind, dim-sighted and disabled people. Design of cycle routes network. Ways of cycle route	layout and design	parameters
for cyclists. Separ	ration of cyclists from other transport modes. Cycle tracks and its design - one way streets, reserved traffic lanes, bus stops, crossings	with other transpo	ort modes,
	crossroads. Traffic signs and road marking for cyclists.		
12Y1PU	Organization Disposition of Railway Stations	KZ	2
	on. Passenger transport equipment. Freight transport equipment. Branch lines and railway traffic inside industrial company areas. Zon		on yards.
	rve stations. Technology of work in railway station with regard to its disposition. Railway station documentations in the Czech Republic		
12Y1RU	Railway Lines Reconstruction	KZ	2
Keeping railway li	ne operational, maintaining lines and stations, geometrical alignment of railway line, vehicles for railway superstructure and substruct		scheduling
	and organising possesions, preparation of railway lines reconstruction and maintenance, process of railway line reconstruction		
12Y1SU	Road Management and Maintenance	KZ	2
	with ownership of roads in the Czech Republic and the administration of the road at the state and county level. It is presented develop		
medium and long-t	erm strategy of the Ministry of Transport. Maintenance of roads winter and summer, its requirements, specifics, possibilities and repair	methods are discu	ussed in the
40)/4)/D	classroom as well as investment activity in highway engineering.	1/7	
12Y1VR	Public Transport in Cities and Regions	KZ	2
	political pillars of public transport. Accessibility of public transport. Transport demand management and directional coordination of lines are produced transport varieties. Time according to the lines are transported transport and transport varieties.	=	- 1
basic operating p	earameters and transport variations. Types of lines according to their routing and basic operating parameters. Time coordination of line Organization of tram operation in Prague. Tram safety.	s. Operational trail	iic control.
12Y1ZU		KZ	2
	Principles of Urbanism of city and settlement building. Functional components and their mutual relations (working, living, recreation, transportation). Spacial		
ourvey on mistory	Types of towns or cities with a certain prevailing function, forms of their development. Brief overview of land-use planning.	arrangement or se	attiernerits.
12ZAR	Introduction to Architectural Design	7	3
	Introduction to Architectural Design architecture of traffic systems. Bus and trolley-bus transport. Tramway and town tracks. Design of vehicles. Subway. Railway transpor		-
Orbaniom and	communications. International airports.	t. Hailway Stationio	. 20041
12ZELP	Railway Operation	Z,ZK	4
	way transport. Railway vehicles. Railway signals and signal devices. Railway traffic organisation and operation. Simplified railway traffi	· · · · · · · · · · · · · · · · · · ·	- 1
3	brakes. Railway vehicles marking. Operation intervals. Theoretical graph of train running.		,
12ZTS	Railway Lines and Stations	Z,ZK	4
	ailway track geometry parameters. Route layout of railway lines. Railway line construction - railway substructure and superstructure. S	· ' '	way lines.
	Railway control systems in relation to infrastructure. Operating and carriage points. Railway lines net and category. Traction in rail to	ransport.	-
12ZYDI	Introduction to Transportation Engineering	Z,ZK	2
Role of transportat	ion in land-use planning. Basic terms in transportation engineering. Traffic survey and traffic prognosis. Introduction to topic of roads, p	ublic mass transpo	rt. Negative
	impacts of transportation to environment and safety.		
14ASD	Algorithm and Data Structures	KZ	3
-	ze problems, design a theoretical solution to a given problem and write the resulting algorithm using flowcharts, practice reading algor	_	
and use basic Boo	lean algebra to construct constraints in algorithms. Students will be introduced to the basics of the Python programming language - v	_	loops, they
	will learn to work with variables of basic data types (integer, floating point and string) and the list data structure in their progra		
14DATS	Database Systems	KZ	2

and on systems.	profiles, drawings with raster foundaments).	inico, ridioorib cir	VIIOIIIIIOIII
14PODP	Computer Aid of Transportation Projecting	KZ	3
	pplication for transportation projecting aid. AutoCAD environment possibilities of basic tasks automatizing (programming, scripting, dat		
	utes, relation to databases). Work in projecting group, external references. Basic tasks for cummunication projecting (clotoidic transition	• ,	
•	section). Basics of 3D modelling.		
14PRG	Programming	KZ	2
The Course Prog	ramming builds on and fully extends the course 14ASD (Algorithmization and Data Structures). The knowledge of the Python program	nming language is	expanded
here so that the pa	rticipant gains skills and can apply them to solve various follow-up tasks. Main topics: lists, multidimensional arrays, sorting and searc	hing, tuples, sets, o	dictionaries,
	working with date and time, regular expressions, functions and procedures, working with files (CSV, JSON, XML).		
14X31D	Project 1 DOS	Z	2
14X32D	Project 2 DOS	Z	2
14X33D	Project 3 DOS	Z	4
14Y1AV	Animation and Visualization	KZ	2
	tions and modeling of NURBS, Patch objects, selection of objects (according to filter and properties). 3D Studio MAX systems and Spa	l l	tmospheric
and other effect	s, rendering filters, Motion blur, advanced animations, Motion panel. Modeling for morphing and animation, bone formation, animation	using Inverse Kin	ematics.
14Y1BE	Barrierless Transport	KZ	2
	rless accessible public transportation in terms of architectural barriers and also for transportation-technological point of view. Students		
of barrierless environment	comment roads, railway stations, public transport stops, terminal buildings, vehicles, public transport, information and orientation systems	and transportation	technology.
	Theoretical knowledge will be supplemented by practical examples.		

14Y1BM Basic biometric terms			
Basic biometric term.	Biometric Methods	KZ	2
	s, authentication methods, principles and performance measurement of biometric systems, overview of biometric technologies, ha hod, 2D and 3D face recognition, vein patterns on the wrist, ear biometrics, fingerprint recognition, skin spectroscopy, behavioral n		•
	in transport applications, safety and risks of biometric technologies.		
14Y1HW	Computer Hardware	KZ	2
Computer architectu	ure, basics of logical circuits design and their realization using FPGA. In detail, description of computer architecture and separate p arithmetic and logical units, I/O subsystem.	parts designing - c	controllers,
14V4MD	<u> </u>	V7	
14Y1MP Assemblies progra	Modeling Complex Assemblies and Models in Parametric Modeller mming - tools and methodology of working subassemblies and assemblies, sheet metal parts modelling, welded assemblies, pipel	KZ lines, and distribut	2 tion lines.
	Photorealistic output rendering - physical and material properties, lighting sources. MKP - visual example.		
14Y1OJ	Object - oriented programming in JAVA	KZ	2
Objective thinking. En	capsulation. Classes. Attributes. Access modifiers. Methods and overloading. Special methods (constructors, getters / setters). Ba	sic object method	s. Reference
data types. Inheritance	e. Polymorphism. Statics, constants, interfaces, abstract classes, enum, packages, exceptions, collections, generics, lambda expre	essions, anonymo	us functions.
14Y1OP	Operating System	KZ	2
Distributions. Install	ation GNU/Linux OS. X-window system. Rights management - users and groups, ACL rights. Filesystems and attributes. Programs	s and processess.	OS boot,
runlevels. Basic con	sole programs / commands. Config files. SW management, package systems. Programs in graphic shell - text, spreadsheet, graph communication. Services management. Safe and secure configuration of OS. Remote administration.	nic editors, sound,	video and
14Y1P2	Computer Aid of Transportation Projecting 2	KZ	2
I	cation for transportation projecting aid. AutoCAD environment possibilities of basic tasks automatizing (programming, scripting, data		1
• •	s, relation to databases). Work in projecting group, external references. Basic tasks for cummunication projecting (clotoidic transition		
	section). Basics of 3D modelling.		
14Y1PA	3D Modeling in AutoCAD	KZ	2
	metric modeller (AutoCAD) environment, scenes rendering, creation of planar and volumetric objects, user setup creation, object		1
•	connected with external database. Basic definition of work with lights, materials and reflexes. Models presentation.		
14Y1PG	Computer Graphics	KZ	2
	phic and possibilities of their editing and mutual conversion. Use of individual types according to character of work. Work with editing		_
J	level scope) using layers, DPI, colors. Basics of digital photography, scanning and computer technology like monitors and graphics		
14Y1PI	Corporate Information System	KZ	2
	cnowledge, components of information system, syntatic and semantic sense of data, structure of corporate information system, par		1
	ion, storage, etc.), corporate information politic and information control, risks of information system operation, legal environment of		•
	state information system, information system security, data protection, safety politics.	ŕ	
14Y1PJ	C Programming Language	KZ	2
	age. Preprocessor, basics of the C language (data types, syntax, commands), functions, pointes, dynamical memory allocation, strin		1
	mplementations of abstract data types (FIFO, LIFO, list), programming techniques (sorting, searching, recursion), using bitwise op	_	
14Y1PZ	Advanced Data Processing in Spreadsheets	KZ	2
Students will be far	niliar with principles of working in a spreadsheet. Graphic layout of the table appearance, formatting of numbers, insertion of formu	las and functions,	including
	ction. Working with large spreadsheets, filters, advanced filters, database functions. Pivot tables and charts, conditional formatting, s		_
	data analysis. Examples and questions from various companies and training.		
14Y1TI	Creating Interactive Internet Applications	KZ	2
Possibilities of scriptin	g language PHP. Overview of PHP language syntax, and functions. Analysis of finished scripts and demonstration of solutions. You	r own application p	rogrammed
	in PHP language.		
14Y1UP	Editing of Theses in MS Word	KZ	2
Students will be intr	oduced to the principles of creating and editing large documents and basic typographic rules. They will properly apply styles, creat	te tables of conter	nts, lists of
figures, tables, graphs	, etc. Footnotes, captions, index. They practice corrections of finished documents. The goal is to prepare students for seamless ed	liting dissertations	and theses,
	so that they are able to concentrate mainly on writing a thesis.		T.
14Y1VM	Development of Applications for Mobile Devices	KZ	2
Object oriented pro	gramming, Java programming language, development environment, operating system Android, development application - widgets,		_
