Recomended pass through the study plan

Name of the pass: Specialization Human-Computer Interaction - Passage through study

Faculty/Institute/Others: Faculty of Electrical Engineering Department: Pass through the study plan: Open Informatics - Human-Computer Interaction Branch of study guranteed by the department: Welcome page Guarantor of the study branch: Program of study: Open Informatics Type of study: Follow-up master full-time Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1						
Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
BEZM	Safety in Electrical Engineering for a master's degree Vladimír K la, Radek Havlí ek, Ivana Nová, Josef ernohous, Pavel Mlejnek Radek Havlí ek Vladimír K la (Gar.)	Z	0	2BP+2BC	Z	Ρ
B4M33PAL	Advanced algorithms Marko Genyk-Berezovskyj, Daniel Pr ša, Ond ej Drbohlav Daniel Pr ša Daniel Pr ša (Gar.)	Z,ZK	6	2P+2C	z	Ρ
B4M39NUR	User Interface Design Zden k Mikovec Zden k Mikovec (Gar.)	Z,ZK	6	2P+2S	Z	PO
B4M39PUR1	Psychology in HCI Jakub Franc, Jan Balata Jakub Franc Jakub Franc (Gar.)	Z,ZK	6	2P+2S	Z	PO
2018_MOIVOL	Volitelné odborné p edm ty	Min. cours. 0	Min/Max 0/999			V

Number of semester: 2						
Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
B4M35KO	Combinatorial Optimization Zden k Hanzálek Zden k Hanzálek (Gar.)	Z,ZK	6	3P+2C	L	Р
B4M01TAL	Theory of Algorithms Marie Demlová, Natalie Žukovec Marie Demlová Marie Demlová (Gar.)	Z,ZK	6	3P+2S	L	Ρ
B4M39PTV	Spatial Design Marian Karel, Adéla Bébarová Zden k Míkovec Zden k Míkovec (Gar.)	Z,ZK	6	2P+2L	L	PO
B4M39VIZ	Visualization Ladislav molík Ladislav molík Ladislav molík (Gar.)	Z,ZK	6	2P+2C	L	PO

List of groups of courses of this pass with the complete content of members of individual groups

Kód	Name of the group of courses and codes of members of this group (for specification see here or below the list of courses)	Completion	Credits	Scope	Semester	Role
2018_MOIVOL	Volitelné odborné p edm ty	Min. cours.	Min/Max			
		0	0/999			V

List of courses of this pass:

Code	Name of the course	Completion	Credits			
B4M01TAL	Theory of Algorithms	Z,ZK	6			
The course brings t	he course brings theoretical background of the theory of algorithms with the focus at first on the time and space complexity of algorithms and problems, secondly on the correct					
of algorithms. Furt	her it is dealt with the theory of complexity; the classes P, NP, NP-complete, PSPACE and NPSPACE are treated and properties of th	em investigated. P	robabilistic			
	algorithms are studied and the classes RP and ZZP introduced.					
B4M33PAL	Advanced algorithms	Z,ZK	6			
Basic	graph algorithms and graph representation. Combinatorial algorithms. Application of formal languages theory in computer science - p	pattern matching.				
B4M35KO	Combinatorial Optimization	Z,ZK	6			
The goal is to show	the problems and algorithms of combinatorial optimization (often called discrete optimization; there is a strong overlap with the term o	perations research	 Following 			
the courses on li	near algebra, graph theory, and basics of optimization, we show optimization techniques based on graphs, integer linear programmin	ig, heuristics, appre	oximation			
algorithms and st	ate space search methods. We focus on application of optimization in stores, ground transportation, flight transportation, logistics, pl	anning of human r	esources,			
	scheduling in production lines, message routing, scheduling in parallel computers.					
B4M36SAN	Statistical Data Analysis	Z,ZK	6			
This course builds of	on the skills developed in introductory statistics courses. It is practically oriented and gives an introduction to applied statistics. It mainly	/ aims at multivaria	te statistical			
analysis and mode	lling, i.e., the methods that help to understand, interpret, visualize and model potentially high-dimensional data. It can be seen as a p	ourely statistical co	unterpart to			
	machine learning and data mining courses.					
B4M36ZKS	Software Quality Assurance	Z,ZK	6			
B4M39NUR	User Interface Design	Z,ZK	6			
Students will get ac	quainted with the theory of human-computer communication and interaction (formal description of user interfaces, formal user models, th	he fundamentals of	perception,			
	cognition, and user information evaluation).					
B4M39PTV	Spatial Design	Z,ZK	6			
Course aim is to ev	oke interest in shape, material and its spatial characteristic with help of sophisticated spatial tasks and studies. It is not intended to e	ducate a sculptor	or designer.			
Another aspect is to	o turn students' attention from restricted form of flat computer screens towards free real space and let them by means of basic techniq	ues like drawing ar	nd modeling			
to create spontar	neously. Students will be confronted with basic composition and form creation principles of Gestalt psychology. Student will verify kno	wledge gained by	means of			
	sophisticated composition tasks. This course will take place in the sculptural and design workshop of Faculty of Architecture	э.				
B4M39PUR1	Psychology in HCI	Z,ZK	6			
The aim of the co	purse is that students will master all phases of the research process starting from initial planning up to the translation of their observa	ations into innovativ	ve design			
concepts, so they a	re able to run applied research projects themselves. Overall the emphasis is laid on practitioner's approach and developing skills neede	d for adopting thes	e technique			
	in daily design practice across various domains.					
B4M39VIZ	Visualization	Z,ZK	6			
In this course, you	will get the knowledge of theoretical background for visualization and the application of visualization in real-world examples. The visu	ualization methods	are aimed			
at exploiting bot	h the full power of computer technologies and the characteristics (and limits) of human perception. Well-chosen visualization method	s can help to revea	al hidden			
dependencies in t	he data that are not evident at the first glance. This in turn enables a more precise analysis of the data, or provides a deeper insight	into the core of the	particular			
	problem represented by the data.					
B4MSVP	Software or Research Project	KZ	6			

BDIP25	Diploma Thesis	Z	25			
Independent final	comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or h	ner branch of study	, which wil			
be specified b	y branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the compreh-	ensive final exami	nation.			
BEZM	Safety in Electrical Engineering for a master's degree	Z	0			
The course provides for students of all programs periodic training guidelines for health and occupational safety and gives knowledge of electrical hazard of given branch of study.						
	Students receive indispensable qualification according to the current Directive of the Dean.
