Recomended pass through the study plan

Name of the pass: Specialization Electrical Drives - Passage through study

Faculty/Institute/Others: Faculty of Electrical Engineering

Department:

Pass through the study plan: Electrical Engineering, Power Engineering and Management - Electrical Drives

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

List of courses of this pass:

Code	Name of the course	Completion	Credits
A003TV	Physical Education	Z	2
B0M16FIL		Z,ZK	5

B0M16HSD1	History of economy and social studies	Z,ZK	5
This subject deals	with the history of the Czech society in the 19th - 21th centuries. It follows the forming of the Czech political representation, its aims a	nd achieved resu	lts as well as
	the social and cultural development and coexistence of the various ethnical groups in the Czech countries.		
B0M16HVT	History of science and technology 2	Z,ZK	5
=	historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate stude		-
traditions of the sur	bject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life engineers	and the iniliaence	e or technicar
B0M16PSM	Psychology	Z,ZK	5
B0M16TEO	Theology	Z,ZK	5
	des to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture t		
	he subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who		
	- religion from which graws our civilization up.		1
B1M13ASS	Solar Systems Application	Z,ZK	5
Solar energy. Photo	ovoltaic phenomena. Photovoltaic cells and modules and their characteristics. Photovoltaic systems and their applications. Photo-therm	nal phenomena.P	hoto-thermal
DAMAGEKE	power stations. Significance, economic and environmental aspects of solar energy exploitation.	7 71/	
B1M13EKP	Ecology and materials logy from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspects of	Z,ZK	5
	nmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult op		
	of electrical waste.	g	
B1M13JAS1	Quality and Reliability	Z.ZK	6
	definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliabi	lity as a part of q	uality. Basic
definitions from the	e area of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types	of warm and co	d standbys.
	onents and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical method	•	
	nagerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits.		1
B1M13VSE	Power components in electrical engineering	Z,ZK	5
Power semicono	ductor device (diodes, BJTs, thyristors, MOSFETs and IGBTs) and integraed structures (modules). Structures, function, characteristic components of powet electronic. Connection of devices in parallel and in series.	s and parameter	s, Passive
B1M14DEP	Digital Control of Electric Drives	Z.ZK	5
	Digital Control of Electric Drives	,	_
The course deals w	developing and debugging control program for electric drive.	araware resource	3 riccuca ioi
B1M14EPT1	Electric Drives and Traction	Z,ZK	5
	he course focuses on the basics of designing AC drives with AC motors at different power supply types and loads, their reliability, des	•	explosive
atmospheres and	for special purposes as well as the necessary technical documentation. In the second part, students are introduced to mathematical	and all the second and	l etratogiae
		modeling, contro	i strategies
(vector control, di	irect torque control) and basic techniques of induction motor parameter estimation. Furthermore, the control and nonlinear behavior of	_	-
· · · · · ·	irect torque control) and basic techniques of induction motor parameter estimation. Furthermore, the control and nonlinear behavior converter equipped with IGBT elements as the most commonly used power converter for induction motors is analyzed.	of a two-level volta	age-source

BEZM	Safety in Electrical Engineering for a master's degree	Z	0			
The course provides for students of all programs periodic training guidelines for health and occupational safety and gives knowledge of electrical hazard of given branch of students.						
	Students receive indispensable qualification according to the current Directive of the Dean.
