2361097	Design of Instruments	Z,ZK	5
Basics of instrume	nts design.	'	
2371710	Computer Simulation Models	Z,ZK	4
The course provide	es a basic knowledge on formulation and computer implementation of dynamical system models. It starts from theoretical issues of	of Laplace and Z ti	ransform in thei
application to desc	ribing the continuous and discrete linear systems respectively. A particular emphasis is given on the skills in describing the dynar	mic processes in th	ne state space
approach in both li	near and non-linear systems.		
2373712	Project	Z	3
Breaf introduction	o the SmartPlant projection software. The project from the informatics in the second half of this subject.		
2371524	Means of Automatic Control	Z,ZK	5
Various categories	of means for automatic control according to the different criterions. Main features in each category. Air and hydraulic fluid as a me	edium for informati	on transfer.
Symbols and desc	iptions in pneumatic and hydraulic diagrams. Pneumatic control systems design. Pneumatic actuators, valves, special pneumatic,	electropneumatic	devices. Contro
valves, categories,	dimensioning, design, applications. Inteligent pneumatics as an integration of pneumatic, electronic and control components and sy	stems. Valve island	ds and terminals
standard, with indu	strial buses communication, programmable. Pneumatic positioning systems.		
2371126	Programmable Controller Applications	Z,ZK	4
Logic control, Theo	ry of finite automaton - introduction, Petri nets -application for industrial processes control. Programmable Logic Controller (PLC), P	LCs in distributed	control systems
	explication areas. Function principles of DLC, configuration, HW structure of DLC, DLC activare, Standard IEC 1121.2; activare	program mand cor	mmunication
-	pplication areas. Function principles of PLC, configuration, HW structure of PLC, PLC software. Standard IEC 1131-3: software,		
type sof PLC and a	ements of programming languages, standard and derived functions and function blocks, structuring resource - sequential function		orogramming
type sof PLC and a model, common el		n diagram (SFC), p	
type sof PLC and a model, common el languages LD, IL,	ements of programming languages, standard and derived functions and function blocks, structuring resource - sequential function	n diagram (SFC), p Systems of PLCs, r	networking of

The course gives a thorough interpretation of the principle of image forming by planar and spherical surfaces under the laws of geometric optics. It also deals with monochromatic and

Characteristics of the courses of this group of Study Plan: Code=12DSK1P-KMEN Name=00 2012 D kmenové 1. semestr STR kombinované

	2182019	Chemistry	KZ	3			
1	General chemistry from	the point of view of mechanical and process engineering. Physical chemistry forms 2/3 of the course (structure and propertic	es of matter, therr	nodynamics,			
	phase equilibrium, chemical reactions, reaction engineering), the remaining 1/3 is devoted to organic chemistry (hydrocarbons, polymers) and biochemistry. Laboratory practice is						
1	oriented upon the mater	rial properties measurement.					

2011021 Constructive Geometry Z,ZK
The subject is focused on geometric objects in the space - curves, surfaces and solids and their properties and mutual relations.

2011056 | Mathematics I | Z,ZK | 8

In the course, greater emphasis is placed on the theoretical basis of the concepts discussed and on the derivation of basic relationships and connections between concepts. Students will also get to know the procedures for solving problems with parametric input. In addition, students will gain extended knowledge in some thematic areas: eigennumbers and eigenvectors of a matrix, Taylor polynomial, integral as a limit function, integration of some special functions.

2372041 Computer Support for Study

The course introduces students into creating technical and professional documents on computers or Web and into realizing technical computations with the use of computers. Students gain practical skills by creating an essay in a text editor, by realizing technical computations with a spreadsheet calculator, and by creating technical-based WWW page.

K333038 Fundamentals of Technology I. Z 3

Production processes in engineering production. Technology of engineering production. Materials in engineering. Concepts of steel and cast iron, technology of engineering production. Materials in engineering. Concepts of steel and cast iron, technology. Production of pig iron and steel. Casting: modeling devices, molding materials, molding and castings. Foundry alloys. Overview of basic casting technology. Forming technology. Hot and cold forging. Free and drop forging. Rolling. Production of pipes. Bulk and sheet metal forming. Welding technology. The characteristics of the various types of welding. Fusion welding: Flame welding and arc welding with coated electrodes. Thermal cutting.

Characteristics of the courses of this group of Study Plan: Code=12DSK2P-KMEN Name=00 2012 D kmenové 2. semestr STR kombinované

Kinematics and dynamics of a particle motion. Principle of conservation of energy. System of particles, centre of mass. Rigid body. Continuum, elastic properties of bodies. Oscillations, waves. Fluid mechanics. Temperature and heat transfer. Kinetic theory of gases. Thermodynamics. Electric field, current, conductivity, resistance. Conductors, semiconductors, insulators. Magnetic field. Magnetic materials. Laboratories - accuracy of measurements, systematic and random errors, uncertainty of direct and indirect measurements, regression, measurements of 11 various experiments related to the lectures.

2011062 Matematika II. Z,ZK 8

Open and closed set, boundary in E^k. Real function of k-variables. Partial derivatives and differentiability. Gradient and directional derivative. Differential operators div (divergence) and curl (rotation). Function given implicitly. Local and global (= absolute) extremes of a function of more variables. Double integral, volume (=triple) integral, Fubini theorem. Transformation of integrals to polar, cylindrical and spherical coordinates. A simple smooth curve and line integral of a scalar and vector function. Circulation and Green's theorem. A potential vector field, independence of a line integral on the path. Simple smooth surface and surface integral of a scalar function and a vector function. Flow of a vector field through a surface. The Gauss-Ostrogradskij theorem.

2322029 Materials Science I. KZ 3
History and present state of materials engineering, overview of technical materials, internal structure of metals, crystal lattices and their defects, deformation, recrystallization and

Principles of ISO GPS (Geometrical Products Specification). Students will get critical knowledge about ISO system of limits and fits, tolerancing, surface texture, geometrical tolerance, dimensional loops, tolerancing of angles and cones, tolerancing of threads. Integral part of course is a project where students apply and practice their knowledge from lectures.

Machine Elements and Mechanisms I. Joints and joining elements (screwed, clamped, splined, welded, riveted, soldered and adhesive joints; joints with use of feathers, pins, tenons, cotters, keys). Mechanical transmissions (belt, chain, friction, gear drives). Seminars are devoted to practical individual solution of simple design projects - tasks with motion screws, preloaded connecting bolts, clamped,

pressed, splined and key joints between shafts and hubs and tasks with welded and riveted joints. Sketching of machine elements and their simple assembly units is also indispensable seminar work.

2141504	Electric Circuits and Electronics	Z,ZK	4

Introduction into theory of electrical circuits, analysis special types of electrical circuits as DC and AC. Transient states in circuits with accumulators of energy. El. Power and Energy. Introduction into electronics. Principle and typical parameters of basic semiconductor components. Application in electronic circuits (rectifier, stabilizer, power control, operational amplifier). Analogue and digital circuits. Principle of analogue and digital signal processing. Logical circuits, converters, microprocessor.

2372083	Measurement in Engineering	KZ	3
Overview of sensor prin	ciples for measurement of non-electrical variables (temperature, position, force, speed, acceleration, torque). Calibration and	verification of me	easurement
instruments.			

K341014	Technology II.	Z,ZK	5
2153005	Fundamentals of Energy Conversions	Z	1
2383001	Fundamentals of Law	Z	2

Basic orientation in legal system is a necessary part of professional equipment of each expert with university degree. The aim of this course is to provide a view into the Czech Legal Order, particular sources of law and system of law (branch of law), using tutorials, lectures, specialised literature and significant legal regulations. It is necessary for students to know our legal institutions, that will be regularly in touch with, especially during their professional career and to learn how to work with the collection of laws. At the same time the course leads students to know some practical habits and processes while putting the law on, especially in domain of contracts and other important legal relationships and to make them ready to prepare professional presentations and to understand basic structures between law and engineering

Automatic Control

Automatic Con

2131026 Machine Elements and Mechanisms II

Preliminary design, design calculations and aplication of axles and shafts, sliding and rolling bearings, shaft connections, elements of crank mechanism, pipelines and their accessories and fittings.

2141505 Electrical machines and drives Z,ZK 4
AC el. curcuits. Electrical power and energy. Calculation, measurement, power factor. Magnetic circuit, materials, hysteresis loop. Electromagnet. Transformer, principle, construction,

3-phase transformer, operating conditions, rated (scheduled) values. Induction machine, principle, construction, operating conditions. Starting, speed-torque characteristic, speed control. Synchronous machines. DC-machines, principle, parameters, operating conditions, construction, starting, speed control, speed-torque characteristic. Low-voltage instruments. Low-voltage distribution system.

2133025 Design
Design, design calculations and their aplications in case of geared transmissions, axles and shafts, sliding and rolling bearings, shaft couplings and clutches.

2381054 Management and Economics of the Enterprise Z,ZK 4

The subject is intended to teach the students of the Faculty of Mechanical Engineering the basic economic starting points necessary for technical reasoning and to help them understand the basic relationships between economic quantities costs - revenues, expenses - incomes and other basic economic terms. The goal is for the audience to be able to communicate with economists in organizations, every product or service is valued at a selling price and therefore it is necessary to understand the simple costing of products and services. Every technician will encounter reports and should understand the basic structure of financial statements. As a future manager, he will compile and approve the operating budget. In the field of management, they will learn basic management functions and their content. Furthermore, they will learn how to use network analysis in project management. For decision-making purposes, they will learn the applications of multi-criteria decision-making. The basics of marketing and strategic management will be introduced.

2181026 Momentum, Mass and Heat Transfer Z,ZK 5

Fundamentals of transport phenomena balances in homogeneous fluids. Navier-Stokes equations. Momentum transport in turbulent flows. Mechanical energy equation. Residence time distributions in continuous systems. Conduction heat transfer. Forced and natural convection heat transfer with phase changes and thermal radiation. Multicomponent systems. Mass transfer by molecular diffusion, convection, with chemical reactions and interphase mass transfer.

2383009 | Communication and Dealing with People | Z | 2

Human communication represents an irreplaceable phenomenon in human activity, as it is present in practically all of his activities. The same applies (with specific modifications) to the activities of managers. So you can't not communicate - you can only communicate badly, well and excellently.

Code of the group: 12B**4Q-BZJ S+T

Name of the group: 08 2012 bakalá ské zkoušky z jazyk pro STR a TZIS

Requirement credits in the group: In this group you have to gain at least 2 credits (at most 10)

Requirement courses in the group: In this group you have to complete at least 1 course (at most 5)

Credits in the group: 2

Note on the group:

Součástí tohoto bakalářského studijního programu je povinnost vykonat zkoušku z jednoho cizího jazyka. Student ji může vykonat kdykoliv v průběhu studia. Administrativně je předmět přiřazen ke studijnímu plánu čtvrtého semestru druhého ročníku, neboť se předpokládá, že si student během předcházejících

semestrů nejprve doplňuje v jazykových kurzech (volitelných předmětech) jazykové znalosti zejména v oblasti odborné terminologie

202A041	Physics I.	ZK	3					
Kinematics and dynamic	es of a particle motion. Principle of conservation of energy. System of particles, centre of mass. Rigid body. Continuum, elastic	properties of bod	lies. Oscillations,					
waves. Fluid mechanics	. Temperature and heat transfer. Kinetic theory of gases. Thermodynamics. Electric field, current, conductivity, resistance. Co	nductors, semicor	nductors,					
insulators. Magnetic field	d. Magnetic materials. Laboratories - accuracy of measurements, systematic and random errors, uncertainty of direct and inc	lirect measureme	nts, regression,					
measurements of 11 va	rious experiments related to the lectures.							
202A025	Physics II.A	ZK	2					
Faraday's law of electron	raday's law of electromagnetic induction. Maxwell's equations, electromagnetic waves. Light, wave optics, geometrical optics. Quantum properties of electromagnetic waves. Interaction							

of radiation with matter. Photoelectric effect. Wave-particle mature of matter. Quantum-mechanical description of particle's motion. Hydrogen atom and periodic system of elements. Spectra, x-rays, ;laser. Band theory of solids, semiconductors. Nucleus, radioactivity, sources of nuclear energy. Laboratories - measurements of 6 experiments related to the lectures.

201A021 | Constructive Geometry A | ZK | 3

The subject is focused on geometric objects in the space - curves, surfaces and solids and their properties and mutual relations.

201A021	Constructive Geometry A	ZK	3
The subject is focused of	on geometric objects in the space - curves, surfaces and solids and their properties and mutual relations.		
201A056	Mathematics I.A	ZK	4
Introduction to linear alg	gebra, analytic geometry of straight lines and planes in E3, calculus of functions of one variable		
201A062	Mathematics II.A	ZK	4
Open and closed set, be	oundary in E^k. Real function of k-variables. Partial derivatives and differentiability. Gradient and directional derivative. Differe	ntial operators di	v (divergence)

and curl (rotation). Function given implicitly. Local and global (= absolute) extremes of a function of more variables. Double integral, volume (=triple) integral, Fubini theorem. Transformation of integrals to polar, cylindrical and spherical coordinates. A simple smooth curve and line integral of a scalar and vector function. Circulation and Green's theorem. A potential vector field, independence of a line integral on the path. Simple smooth surface and surface integral of a scalar function and a vector function. Flow of a vector field through a surface. The Gauss-Ostrogradskij theorem.

List of courses of this pass:

Code	Name of the course	Completion	Credit
2011009	Mathematics III	Z,ZK	5
	An introductory course in ordinary differential equation and infinite series.		
2011021	Constructive Geometry The subject is focused on geometric objects in the space - curves, surfaces and solids and their properties and mutual relative.	Z,ZK	6
2011049	Numerical Mathematics	Z,ZK	4
	rounterical Mathernatics of systems of linear equations, iterative methods. Numerical solution of nonlinear algebraic equations. Least squares method. Numerica		1
varrieriear solution	equations, initial and boundary value problems. Numerical solution of basic linear partial differential equations by finite difference		y dilicion
2011056	Mathematics I	Z,ZK	8
	ter emphasis is placed on the theoretical basis of the concepts discussed and on the derivation of basic relationships and connection	1	_
=	v the procedures for solving problems with parametric input. In addition, students will gain extended knowledge in some thematic areas:	=	
g	of a matrix, Taylor polynomial, integral as a limit function, integration of some special functions.		
2011062	Matematika II.	Z,ZK	8
	set, boundary in E^k. Real function of k-variables. Partial derivatives and differentiability. Gradient and directional derivative. Different		ivergence
-	Function given implicitly. Local and global (= absolute) extremes of a function of more variables. Double integral, volume (=triple) integral,		-
	r, cylindrical and spherical coordinates. A simple smooth curve and line integral of a scalar and vector function. Circulation and Gree ce of a line integral on the path. Simple smooth surface and surface integral of a scalar function and a vector function. Flow of a vector Gauss-Ostrogradskij theorem.	•	
2012035	Algorithmization and Programming Fundamentals	KZ	4
	MATLAB and its programming language. MATLAB command line. Elementary commands, variable, assignment and expression. Matr	1	perations
Vritting M-script. Ir	nput and output. Condition and cycle. Algorithmization of simple problems in MATLAB. Graphical commands. Matrix operations. Syste	ems of linear equati	ions. Scri
	ructure of program. Variables, expressions, assignment, and input / output commands. switch. For cycle. Arrays and files. Pointers. S	_	
simple programs	s: minimum, mean, norm, numerical integration, bisection method, Newton method, matrix operations. Direct methods for solution of	systems of linear e	quations.
2012037	Computer Graphics	KZ	3
2016007	Mathematics I Seminar	Z	2
201A009	Mathematics III.A	ZK	2
201A021	Constructive Geometry A	ZK	3
	The subject is focused on geometric objects in the space - curves, surfaces and solids and their properties and mutual relations.	1	
201A049	Numerical Mathematics A	ZK	2
201A056	Mathematics I.A

2183091	Project Presentation Preparation and presentation of a given project theme.	Z	4
2311101	Mechanics I.	Z,ZK	4
Mechanics I deals	with the basic concepts of statics. There are described the methods of solution of equilibrium of particles and rigid bodies and their sys	stems with and with	nout friction.
2311102	There are introduced the methods of description of position and motion of particles and rigid bodies. Mechanics II.	Z,ZK	4
	INECTIALITIES 11. and of rigid bodies. Transformation matrix. Kinematics of concurrent movements. Motion: translation, rotation, general planar motion, s		-
· ·	tion. Composition of mechanisms. Basic planar mechanisms. Analytical methods in kinematics of mechanisms - Trigonometric and vectors.	•	
	in kinematics. Basic theory of gearing. Transmition mechanisms with geers. Strutting and seezing in mechanisms. Cable mechanisms		
2321039	Materials Science II.	Z,ZK	4
Fundamentals of n	netallurgy, iron-carbon alloys and influence of other elements, phase transformations, thermal, combined chemical and thermal and the technical iron-carbon alloys, non-ferrous metals and their alloys, plastics, structural ceramics, composites, selection of materi		processing,
2322029	Materials Science I.	KZ	3
	ent state of materials engineering, overview of technical materials, internal structure of metals, crystal lattices and their defects, defor		
	erials, structure and properties of materials and their testing, fundamentals of thermodynamics, phases and phase transformations, in		
2361005	Instrumental Technology This subject gives students a detail review of technology used for instrumentation production.	Z,ZK	4
2361097	Design of Instruments	Z,ZK	5
	Basics of instruments design.		
2362091	Project	KZ	2
2362502	Technical optics	KZ	3
The course gives a	thorough interpretation of the principle of image forming by planar and spherical surfaces under the laws of geometric optics. It also colour aberrations and basic visual instruments.	deals with monoch	romatic and
2362503	Applied Optics	KZ	4
2302303	The course introduces students to the functions of basic optical instruments and shows their applications.	1\2	7
2363091	Project Presentation	Z	4
2363985	Bachelor Thesis	Z	5
2371047	Automatic Control	Z,ZK	5
Automatic control	lers are important part of many industrial processes. The goal of this course is to introduce students into basic knowledge of automat	ic control theory ar	nd practice
like transfer functio	ns, open versus closed loop control, design of controllers and frequency based analysis of control systems. The course also concentra	tes on logic control	and control
via programmab	le logic controllers. Some seminaries are arranged in laboratories where practical skills and control engineering methods are trained.	Students begin to	work with
0074400	MATLAB software as a common platform of control engineers.	7.71/	
2371126	Programmable Controller Applications ry of finite automaton - introduction, Petri nets -application for industrial processes control. Programmable Logic Controller (PLC), PLCs	Z,ZK	4
_	d application areas. Function principles of PLC, configuration, HW structure of PLC, PLC software. Standard IEC 1131-3: software, pr		-
	elements of programming languages, standard and derived functions and function blocks, structuring resource - sequential function c	-	
languages LD, IL	, ST and FBD. Control applications design -methodology. Software tools for PLC programming. Industrial processes visualization. Sys	stems of PLCs, net	working of
PLCs, communicat	ion possibilities of PLCs. Industrial communication standards (Profibus, ASi). Laboratory exercises on technological models via PLCs:T	eco, Festo, Schnei	der Electric,
0074504	Siemens.	7.71/	
2371524	Means of Automatic Control es of means for automatic control according to the different criterions. Main features in each category. Air and hydraulic fluid as a med	Z,ZK	5
	es of means for automatic control according to the different chieffons. Main features in each category. All and hydraulic fluid as a med riptions in pneumatic and hydraulic diagrams. Pneumatic control systems design. Pneumatic actuators, valves, special pneumatic, elec		
	dimensioning, design, applications. Inteligent pneumatics as an integration of pneumatic, electronic and control components and system		
, , ,	standard, with industrial buses communication, programmable. Pneumatic positioning systems.		,
2371710	Computer Simulation Models	Z,ZK	4
1	es a basic knowledge on formulation and computer implementation of dynamical system models. It starts from theoretical issues of La	-	
application to des	cribing the continuous and discrete linear systems respectively. A particular emphasis is given on the skills in describing the dynamic approach in both linear and non-linear systems.	processes in the s	tate space
2372041	Computer Support for Study	KZ	3
The course introdu	ces students into creating technical and professional documents on computers or Web and into realizing technical computations with t		
gain practic	al skills by creating an essay in a text editor, by realizing technical computations with a spreadsheet calculator, and by creating technical	ical-based WWW p	age.
2372083	Measurement in Engineering	KZ	3
Overview of sen	sor principles for measurement of non-electrical variables (temperature, position, force, speed, acceleration, torque). Calibration and	verification of mea	surement
2372091	instruments. Project	KZ	2
2372091	An individual project from the branch of specialisation, which student will study on his/her magister level	1\2	2
2372507	Informatic systems	KZ	4
	formation. Information theory. Channel capacity. Coding theory. Data coding, markup languages, XML. Cryptography. OSI Reference I		
(metallic, opt	ical, wireless). Data link layer. Network layer, communication protocols, TCP/IP suite. Digitization of analog signals. Quantum informat	tion. Genetic inform	ation.
2373091	Project presentation	Z	4
I -	pachelor work presentation. Student should study the presentation software possibilities and proposition of the department. Student sl		
or actual versior	of his diploma or bachelor work and present it in the face of the other student. The presentation will continue with discussion. Conse presented as a pdf file on a temporal web page.	quently, the work s	nould be
2373712	Project	Z	3
23/3/12	Breaf introduction to the SmartPlant projection software. The project from the informatics in the second half of this subject	1	J
2373985	Bachelor Thesis	Z	5
	Each student will solve his individual theme under guiding of his individual supervising department specialist. Result is his/her bache	elor thesis.	

2381054	Management and Economics of the Enterprise	Z,ZK	4
The subject is inten	ded to teach the students of the Faculty of Mechanical Engineering the basic economic starting points necessary for technical reasonin	g and to help them	understand
the basic relations	hips between economic quantities costs - revenues, expenses - incomes and other basic economic terms. The goal is for the audien	ce to be able to co	mmunicate
with economists in	n organizations. every product or service is valued at a selling price and therefore it is necessary to understand the simple costing of	products and serv	ices. Every
technician will enco	ounter reports and should understand the basic structure of financial statements. As a future manager, he will compile and approve th	e operating budge	t. In the field
of management,	hey will learn basic managerial functions and their content. Furthermore, they will learn how to use network analysis in project mana	gement. For decisi	on-making
ı	ourposes, they will learn the applications of multi-criteria decision-making. The basics of marketing and strategic management will be	introduced.	
2383001	Fundamentals of Law	Z	2
Basic orientation in	n legal system is a necessary part of professional equipment of each expert with university degree. The aim of this course is to provide	le a view into the C	zech Legal
Order, particular se	ources of law and system of law (branch of law), using tutorials, lectures, specialised literature and significant legal regulations. It is n	ecessary for stude	nts to know
our legal institution	ns, that will be regularly in touch with, especially during their professional career and to learn how to work with the collection of laws.	At the same time	the course
leads students to k	now some practical habits and processes while putting the law on, especially in domain of contracts and other important legal relation	ships and to make	them ready
	to prepare professional presentations and to understand basic structures between law and engineering		
2383009	Communication and Dealing with People	Z	2
Human communic	ation represents an irreplaceable phenomenon in human activity, as it is present in practically all of his activities. The same applies (with specific modif	ications) to
	the activities of managers. So you can't not communicate - you can only communicate badly, well and excellently.		
K331068	Technology I	Z,ZK	5
Foundry properties	of metals. Treatment. Pouring. Casting solidification. Moulding and core making. Thermal treatment. Plastic deformation. Division of form	ning processes. Se	mi-products,
	heating-up. Cutting. Cold and hot forming. Welds. Weldability. Weldment testing. Thermal cutting. Brasing. Surface treatmen	t.	
K333038	Fundamentals of Technology I.	Z	3
Production proces	ses in engineering production. Technology of engineering production. Materials in engineering. Concepts of steel and cast iron, techr	nical metals. Produ	ction of pig
iron and steel. Ca	sting: modeling devices, molding materials, molding and castings. Foundry alloys. Overview of basic casting technology. Forming tech	nnology. Hot and co	old forging.
Free and drop for	orging. Rolling. Production of pipes. Bulk and sheet metal forming. Welding technology. The characteristics of the various types of weld	ding. Fusion weldir	ıg: Flame
	welding and arc welding with coated electrodes. Thermal cutting.		
K341014	Technology II.	Z,ZK	5
