Not only the significant	development of science and technology has a fundamental influence on the transformation of didactic means. Nowadays, the	occupy an increa	singly important			
place in the activities of	both teacher and pupil in teaching. Even in the future, it can be assumed that their position in the educational process can b	e strengthened as	science and			
technology develop. Did	lactic means is also another basic didactic category. In this course we will focus on the basic characteristics, overview of didac	tic resources and	didactic function			
and categorization of te	aching aids. In many technical subjects, pupils often work in laboratories, so the didactics of laboratory work (classical, remo	te, virtual) and its	specifics are			
included. We will focus	in more detail on the motivation in the laboratory, preparation of laboratory tasks and tasks for practical activities and verifica	tion of students' re	adiness for			
laboratory tasks. Intens	ification of education currently puts the relationship between teacher and modern electronic techniques in a different position	. It is necessary to	address the			
question: "How should a	a good teacher use electronic learning opportunities in order to increase the didactic effectiveness of his / her pedagogical ac	ctivities?".				
U51C3301	Social Psychology	ZK	6			
The course is devoted to	o the issue of man in social situations. Students will get acquainted with basic socio-psychological knowledge that is directly c	r indirectly related	to the teacher's			
activities. The dynamics	s of small social groups and interactions are studied, as well as issues related to communication (basics of communication, ty	pes of communic	ation). Attention			
is paid to attitudes and	is paid to attitudes and their creation, conflicts and their solutions. Another important topic is the socialization of personality and social role. The acquisition of this knowledge at the					
theoretical level is associated with references to their application in the practice of teachers, especially in terms of individual approach to students, teamwork and contacts with the						
general public.

Within this subject, the student will be introduced to the English terminology used in selected topics from social psychology, (listening, understanding) and the use of common phrase used in English communication will be reflected. Those areas of interpersonal communication that students can most often encounter in practice will be chosen. Topics like Negotiation, Assertion, Manipulation, Verbal and Non verbal Communication will be discussed and trained. Introduction to the art of negotiation and practical aspects how to negotiate. Verbal and non-verbal communication. Manipulation and how to avoid it. Soft skills, emotional intelligence.

U51C0307	Self Management for Teachers	Z	3
----------	------------------------------	---	---

The issue of personal management seems to be in today's society more important as a crucial and topical issue that goes beyond the economic framework. To a large extent this is a mutidisciplinary field, at the edge of economics, management, psychology, mental health and stress. During this course, students will learn the basic procedures and techniques that will enable the knowledge workers (managers and representatives of the schools, as well as teachers) to achieve higher performance and optimal use of their potential. Personal management can be understood as a synonym for self-management, event. self-education. The biggest personal management tasks are used in the development of personality. Subject is focused to bring students practical knowledge and skills necessary for effective management of their own forces in different life roles. The main emphasis is on practical examples,

110000101		_	
disorders, physical disa	bilities and some chronic diseases.		
The content of the subject	ect are the causes, manifestations and consequences of specific learning and behavioral disorders, sensory impairment, me	ntal retardation, c	ommunication
U51C0103	Behavior Problems and Learning Disabilities	Z	3
which are designed to p	repare future graduates for activities connected with the determination of their own objectives, priorities, self-management a	nd time managen	nent.
