Study plan

Name of study plan: Electrical Engineering, Power Engineering and Management - Management of Power Eng. and Electr.

Faculty/Institute/Others: Faculty of Electrical Engineering

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master combined

Required credits: 120 Elective courses credits: 0 Sum of credits in the plan: 120

Note on the plan:

Name of the block: Compulsory courses in the program

Minimal number of credits of the block: 61

The role of the block: P

Code of the group: 2018_MEEMDIP-K Name of the group: Diploma Thesis

Requirement credits in the group: In this group you have to gain 25 credits Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 25 Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
BDIP25	Diploma Thesis	Z	25	22s	L	Р

Characteristics of the courses of this group of Study Plan: Code=2018_MEEMDIP-K Name=Diploma Thesis

BDIP25 Diploma Thesis Z 25
Independent final comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or her branch of study, which will be specified by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the comprehensive final examination.

Code of the group: 2018_MEEMH-K Name of the group: Humanities subjects

Requirement credits in the group: In this group you have to gain 5 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 5 Note on the group:

This subject traces historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate students' interest in the history and traditions of the subject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life and the influence of technical engineers

BD0M16PSM	Psychology	Z,ZK	5
BD0M16TEO	Theology	Z,ZK	5

This subject provides to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture the basic theologic disciplines are gone through. The subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who want to get know Christianity - religion from which graws our civilization up.

Code of the group: 2018_MEEMP-K

Name of the group: Compulsory subjects of the programme

Requirement credits in the group: In this group you have to gain 31 credits

Requirement courses in the group: In this group you have to complete 6 courses

Credits in the group: 31 Note on the group:

Characteristics of the courses of this group of Study Plan: Code=2018_MEEMP-K Name=Compulsory subjects of the programme

BD1M16EKE1	Economy of Power Industry	Z,ZK	5
Fundamentals of financ	ng of power companies. Cost structure of power generation and distribution. Prices and tariff systems for power, heat and ga	as production and	distribution.
Examples of economic	evaluation and investment appraisal of the typical project in power sector. Renewable energy sources, externalities. Energy p	olicy and energy l	law in CR.
Liberalization and powe	r market development.		
DD 4144514D		7 71/	

BD1M15IAP	Engineering Applications	Z,ZK	5
BD1M13JAS1	Quality and Reliability	Z,ZK	6
1 -			

Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability as a part of quality. Basic definitions from the area of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types of warm and cold standbys. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical methods and tools joined with quality control, managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits. Statistical inspection.

Physical Education Course

Code of the group: 2018_MEEMVOL-K Name of the group: Elective subjects Requirement credits in the group: Requirement courses in the group:

Credits in the group: 0

Note on the group:

~Nabídku volitelných předmětů uspořádaných podle kateder najdete na webových stránkách http://www.fel.cvut.cz/cz/education/volitelne-predmety.html\\

List of courses of this pass:

Code	Name of the course	Completion	Credits
A003TV	Physical Education	Z	2
BD0M16FIL	Philosophy 2	Z,ZK	5
BD0M16HVT	History of science and technology 2	Z,ZK	5
traditions of the subject	orical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate stude, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life engineers	and the influence	of technica
BD0M16PSM	Psychology	Z,ZK	5
BD0M16TEO	Theology	Z,ZK	5
	o students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture the ubject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who religion from which graws our civilization up.	want to get know	-
BD1M13JAS1	Quality and Reliability	Z,ZK	6
Terminology and defin	itions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliabi	ity as a part of qu	ality. Basic
	ea of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types		-
	ts and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical method	-	-
	erial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits.		
BD1M14SSE	Machinery and Structures of Power Plants	Z,ZK	5
	to acquaint students with forms of energy transformation in power plants, describing the function of power facilities, their structure,		
BD1M15ETT	Electrical Heat	Z,ZK	5
BD1M15IAP	Engineering Applications	Z,ZK	5
BD1M15PPE1	Elements and Operation of Electrical Power Systems	Z,ZK	5
BD1M16CTR1	Controlling	Z,ZK	5
key role played by Pro which guarantee the c	the application of Project Management principles. The focus is on the integrative potential of Management Control in the Manager ject Management. Special attention is paid to technical-financial integration and its impact. The emphasis is on Project Management ompany not merely to survive, but also to achieve high performance. The computerized models are used for presentation key prince wey links between the controlled entities and used managerial tools.	ent of innovation partial procedure	orocesses, s and also
BD1M16DES	Power Transport Systems	Z,ZK	5
The course is focused of	on economical aspects of design and operation of various technical systems for various energy forms. That is road, railway and sh fuel, district heating system, cable car and convenyor belt transport for solid fuel and mainly grid for electricity (power) transport	•	id and liqui
BD1M16EKE1		Z,ZK	5
Fundamentals of final	Economy of Power Industry ncing of power companies. Cost structure of power generation and distribution. Prices and tariff systems for power, heat and gas nic evaluation and investment appraisal of the typical project in power sector. Renewable energy sources, externalities. Energy po Liberalization and power market development.	production and di	stribution.
BD1M16EKL	Ecology and economy	Z,ZK	5
•	nmental protection. Sustainable development. Global environmental problems and their aspects. Greenhouse effect and climate on nmental impacts. Support schemes for renewable energy sources utilization. Economic effectiveness of renewable energy sources economic instruments for economic activities regulation. Externalities. Environmental indicators.	-	
BD1M16EKM	Econometrics and economic applications	Z,ZK	4
History of Econometrics	s, econometric models, input-output models, modelling of demand, time series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models, production functions, linear regression models, and the series models are series and the series models.	dels, simultaneou	s equation
DD 4146=:::	models, econometric analysis of economic situation		
BD1M16ENI	Environmental Engineering on describing the interdisciplinary relationships of living and non-living nature with electrical engineering. By integrating electrical	Z,ZK	5
environmental practiconsequences. The consequences are consequences.	tices, new methods and techniques are being developed that either focus on predictive environmental protection from industrial in course discusses both routinely used technologies as well as prototype and laboratory technologies, mostly applicable to insitu re ocesses provides the ideal motivation and platform for developing and testing new innovative methods. The course is complemen out at CTU, UCT, IMCH and selected excursions. Laboratory facilities have been created for the course at the FEE CTU in Pragram of the course at the co	offluences or address mediation. Inspirated by laboratory value.	ess their tion from work carrie
environmental pract consequences. The conself-renewing natural practical by the self-renewing natural by t	tices, new methods and techniques are being developed that either focus on predictive environmental protection from industrial in course discusses both routinely used technologies as well as prototype and laboratory technologies, mostly applicable to insitu re ocesses provides the ideal motivation and platform for developing and testing new innovative methods. The course is complemen	offuences or address mediation. Inspirated by laboratory vigue. Z,ZK	ess their tion from

Organization and energy management of company, buildings or energy systems. Energy need and consumption, energy balance. Energy characterization of aggregate, secondary energy sources. Energy audit and feasibility study, optimization of energy management of energy systems. Prices and tariffs, economy and financial analysis.

_			1
BD1M16EVE	Economics of Power Generation	Z,ZK	5
	Power sources overview, energy processes analysis.		1
BD1M16FIM1	Financial Management	Z,ZK	5
•	nce, present value and alternative cost of capital, net present value, valuation of bonds and stocks, investment decision and net prese		
cost of capital, risk	and return, lease or buy, taxes, inflation and return, financial and real options, option valuation and application, hedging, short term fin	ance, cash flow n	nanagement.
BD1M16FIU	Financial accounting	Z,ZK	5
•	nting. Assets, inventory and financial investment book keeping. Debt and equity capital. Cost, revenues and profit. Tax system and acc	•	
	ss account. Cash flow statement. Analysis of company's financial position. International accounting standards. Auditing, consolidated s	statements. Hello	
BD1M16JAK	Quality management	Z,ZK	5
History of quality r	nanagement (QM), Current approaches to quality management, quality management system (QMS) based on ISO 9001, Process ma	nagement, Quali	ty planning,
Metrology in QM,	Control of documents and records, Internal audits of QMS, Continual improvement of QMS, Integrated management, Statistic metho	ds in QM, Accred	litation and
	certification		
BD1M16MAR	Marketing	Z,ZK	5
The role and function	ons of the marketing management. Marketing research and marketing information system. Concepts of marketing strategy. The use of p	product life cycle	and portfolio.
ı	Marketing-mix. Product and service policy, pricing and contractation policy, communication, distribution. Controlling and audit	t.	
BD1M16MES	Management and Economics of Power Systems	Z,ZK	5
This course will give	e an overview of the various aspects of power supply with special emphasis on power management. The course characterises energ	costs and marg	inal costs for
	determination of prices and tariffs. Energy market principles and operational decision making are integral parts of the course as	well.	
BD1M16MNR	Managerial Decision Making	Z,ZK	5
System approach	and decision making, Decision models, Games theory, Decision making under uncertainty and risk, Decisions with multiple objective	s, Stochastic pro	gramming,
	Expert systems, Cluster analysis		
BD1M16OVY	Operations Research	Z,ZK	5
Art of modeling a	nd elements of decision models, Linear programming, Transportation problem, Integer linear programming, Introduction to graphs the	ory, Nonlinear pro	gramming,
	Dynamic programming, Monte Carlo simulation, Project management (CPM, PERT).		
BD1M16RES	Development of Energy Systems	Z,ZK	5
In this subject th	e basic questions of power stations design is solved. This design is discussed from viewpoint of ecology and level of used technology	. Special focus is	on future
importance of cla	ssical and renewable energy resources. These kinds of energy resources are considered as the most important factor of future develo	pment of approp	riate power
ind	dustry systems. The subject provides overview of practical application of modern technologies to guarantee the development of energ	etic systems.	
BD1M16STA	Statistical methods in economics	Z,ZK	5
Basic Concepts. S	tatistical series. Assortment. Distributions of frequencies. One-dimensional descriptive characteristics. Measures of variables, coefficie	ent of skewness, o	coefficient of
excess. Points esti	mates of basic characteristics. Interval estimates of basic characteristics. Hypothesis testing of basic characteristics. Individual indexs	number. Aggrega	ative indexs.
Variable-structu	re indexs. Multifactor indexs . Correlation and regression, Basic Concepts. Measurement of dependence intensity. Time series, concepte	ots, qualities. Chro	onological
	average . Time series - trends and extrapolation.		
BD1MPROJ	Individual project	Z	5
Independent wor	k in the form of a project. A student will choose a topic from a list of topics specified by branch department. The project will be defende	ed within the fram	ework of a
	subject.		
BDIP25	Diploma Thesis	Z	25
Independent final	comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or h	er branch of stud	y, which will
be specified l	by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the comprehe	ensive final exami	nation.
TV-V1	Physical education	Z	1
TVKLV	Physical Education Course	Z	0
TVKZV	Physical Education Course	Z	0
TVV	Physical education	<u></u> Z	0
TVV0	Physical education	<u>Z</u>	0
1 7 7 0	i nysicai euucation
