

Study plan

Name of study plan: navaz. mag. PRE program SC 20/21 (pro studenty studující všechny p edm ty 1. a 2.sem. na VUT)

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Smart Cities

Type of study: Follow-up master full-time

Required credits: 60

Elective courses credits: 0

Sum of credits in the plan: 60

Note on the plan:

Name of the block: Semestrální projekt

Minimal number of credits of the block: 8

The role of the block: ZP

Code of the group: XN SC 1-2 20/21

Name of the group: Projekty nav.prez.1.-2.sem na FD programu SC

Requirement credits in the group: In this group you have to gain 8 credits

Requirement courses in the group: In this group you have to complete 2 courses

Credits in the group: 8

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role

Name of the block: Compulsory courses in the program

Minimal number of credits of the block: 50

The role of the block: P

Code of the group: 1.S.NPSC 20/21

Name of the group: 1.s.nav.prez 20/21 - program SC (studium všech p edm t na VUT)

Requirement credits in the group: In this group you have to gain 24 credits

Requirement courses in the group: In this group you have to complete 4 courses

Credits in the group: 24

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
17SCF	Smart Cities Fundamentals	Z,ZK	6	3P+2C	Z	P
17TSC	Technologies for Smart Cities	Z,ZK	6	3P+2C	Z	P
20AIMI	Application of ITS in Urban Engineering <i>Tomáš Tichý</i>	Z,ZK	6	3P+3C	Z	P
20GINS	Geographical, information, localization and navigation systems <i>Pavel Hrubeš, František Kekula, Zuzana Purkrábková</i>	Z,ZK	6	3P+3C	Z	P

Characteristics of the courses of this group of Study Plan: Code=1.S.NPSC 20/21 Name=1.s.nav.prez 20/21 - program SC (studium všech p edm t na VUT)

17SCF	Smart Cities Fundamentals	Z,ZK	6	The main smart city components will be described (intelligent transport systems, smart grids, smart buildings, smart lighting, e-governance, etc.) together with their integration methods by using existing international standards to achieve the synergies among different sectors. The quality of life for different city residents is understood as the main criterial function.
17TSC	Technologies for Smart Cities	Z,ZK	6	Each presented technology will be described through performance parameters like safety, reliability, integrity, continuity, etc. New business models of technologies' implementation and operation will be introduced to provide advanced deployment decision-making. Legal aspects of technologies' assessment (e.g. GDPR) will be presented for selected application areas.
20AIMI	Application of ITS in Urban Engineering	Z,ZK	6	The course focuses mainly on the issue of the installation of engineering networks in the area, coordination of engineering activities in the area, organization of the public space, concept of public space solutions, design of systems for traffic and transport telematics management, coordination of transport modes - automobil, pedestrian, MHD, cyclo, modes etc. New approaches to the development of Smart and green approaches Promoting into Public.
20GINS	Geographical, information, localization and navigation systems	Z,ZK	6	The subject is specialized in problems of work with applications of geographic information systems with special attention to the specialization in the field of transport and telecommunication. It introduces students to geographic data management practices and tools, real world modeling, geographic data storage models, data entry and digitization methods, and a number of other GIS related technologies such as problem mapping, webmap, etc.

Code of the group: 2.S.NPSC 20/21

Name of the group: 2.s.nav.prez 20/21 - program SC (studium všech p edm t na VUT)

Requirement credits in the group: In this group you have to gain 23 credits

Requirement courses in the group: In this group you have to complete 6 courses

Credits in the group: 23

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
11SMCD	Smart Cities Design	Z,ZK	6	3P+2C	L	P
14CISC	Cyber Infrastructure for Smart Cities	Z,ZK	3	2P+1C	L	P
17SCAR	Sustainable Cities and Regions	Z,ZK	3	2P+1C	L	P
17SU	Smart Urbanism	Z,ZK	6	2P+3C	L	P
14FCL	Future Cities Laboratory	KZ	3	0P+3C	L	P
17PJMG	Project Management	KZ	2	2P+0C	L	P

Characteristics of the courses of this group of Study Plan: Code=2.S.NPSC 20/21 Name=2.s.nav.prez 20/21 - program SC (studium všech p edm t na VUT)

11SMCD	Smart Cities Design	Z,ZK	6	Introduction to smart cities, systém analysis and design fundamentals, usage of UML for system design, principles of complex systems, modeling using multiagent systems in the SW environment AnyLogic, application on a small scale real world problem.		
14CISC	Cyber Infrastructure for Smart Cities	Z,ZK	3	Status quo and trends in telecommunications systems applied in cyber infrastructure, technical, economical and legal aspects of telecommunications networks design and services provisioning, identification and quantification of hiererchical telecommunications networks and services performance, telecommunication services dedicated for transport and specifically Smart Cities solutions.		
17SCAR	Sustainable Cities and Regions	Z,ZK	3	Cities in antiquity and in the middle ages, renaissance ideal of a perfect city, 19. and 20. century cities, modern city planning, sustainability as a concept, historical development of transportation in cities, modern transportation systems, logistics as a concept, supply chain, logistics center, city logistics.		
17SU	Smart Urbanism	Z,ZK	6	Urban metabolism and ecology, urban morphology and land use, urban society: demography, mobility, social transtition, urban space and places, urban flows, urban modeling, impact of technology innovations on urban transition.		
14FCL	Future Cities Laboratory	KZ	3	Future cities system architecture (with focus on C-ITS) and reference projects, functional and technology solutions description and principles, wireless telco solutions dedicated for C-ITS systems (ITS-G5, LTE-V, etc.), security architecture, data security and personal data protection, testing of the systems and functional parameters assessment, technical properties evaluaition, methods of data collection and processing.		
17PJMG	Project Management	KZ	2	Basic terms of the project management, project management standards, organizational structures and processess in the project management, life-cycle of the project, risk analysis, projects in transport and transport infrastructure and their specifics, feasibility study and CBA, project evaluation, PPP projects.		

Code of the group: 2.S.NPSC VYB 20/21

Name of the group: 2.s.nav.prez 20/21 výb r p edm tu - program SC

Requirement credits in the group: In this group you have to gain 3 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 3

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
16SHMI	Simulation and HMI Petr Bouchner, Stanislav Novotný	Z,ZK	3	2P+1C	L	P
17AMOL	Application of Operations Research Methods in Logistics	Z,ZK	3	2P+1C	L	P

Characteristics of the courses of this group of Study Plan: Code=2.S.NPSC VYB 20/21 Name=2.s.nav.prez 20/21 výb r p edm tu - program SC

16SHMI	Simulation and HMI	Z,ZK	3	Simulation for the systems in transportation and vehicle systems. User interface, HMI (human-machine interaction), virtual reality and computer graphics for ITS. Simulation theory with application of computing equipment. Creating computing models. Mechanic and dynamic systems and their mathematical models. Simulation of vehicle dynamics, on-land carriage in particular. Virtual reality systems.		
17AMOL	Application of Operations Research Methods in Logistics	Z,ZK	3	Exact, heuristic, metaheuristic methods. Static and dynamic shortest path problem. Location analysis, P&R/K&R facilities location. Travelling salesman problem with constraints. Assignment problem and matching algorithms. Decision making in urban transport. Design of urban transport lines. Scheduling in public transport.		

Name of the block: Compulsory elective courses

Minimal number of credits of the block: 2

The role of the block: PV

Code of the group: 1.S.NPSC FA 20/21

Name of the group: 1.s.nav.prez (od) 20/21 - program SC - p edm ty z FA

Requirement credits in the group: In this group you have to gain at least 2 credits (at most 7)

Requirement courses in the group: In this group you have to complete at least 1 course (at most 3)

Credits in the group: 2

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
500EKL3	Ecology III - Social Ecology <i>Milan Macoun, Henry William Andrew Hanson Iv Henry William Andrew Hanson Iv (Gar.)</i>	KZ	2	2P+0C	Z	PV
500U3	Urbanism III - Theory	ZK	2	1P+1C	Z	PV
555UP1	Planning 1 - Urban Planning <i>Petr Klápšt , Jakub Vorel, Karel Maier Jakub Vorel (Gar.)</i>	ZK	3	2P+1C	Z	PV

Characteristics of the courses of this group of Study Plan: Code=1.S.NPSC FA 20/21 Name=1.s.nav.prez (od) 20/21 - program SC - p edm ty z FA

500EKL3	Ecology III - Social Ecology	KZ	2
Social Ecology: The subject deals with the relationship of man and the environment in landscape and settlements. It acquaints students with selected methods of socio-ecological research and participation of citizens in the formation of the rural environment, the city and its socio-spatial structure. The theoretical part of the subject is based on concrete practical examples, which are processed by the students and present them during the semester.			
500U3	Urbanism III - Theory	ZK	2
The course introduces the student to the most important urban theories and ways of thinking about the city from the 19th century to the present. In lectures and seminars, the student is led to think critically in order to be able to analyze, evaluate, compare and recognize the practical effects of these theories on the development of European cities.			
555UP1	Planning 1 - Urban Planning	ZK	3
Close links between architecture and urban planning are typical for Central and Southern Europe. While in e.g. the UK, the USA and Canada planning is a fully independent profession, most planners in the Czech Republic have an architectural background. This may enrich both architecture and planning as multi-disciplinary professions. Man and the environment. Planning, the environment and designing. Planning before planners. Medieval European towns. Planning in the Industrial Era. Comprehensive planning. European great projects in the 20th century. Challenges for planning in modern and post-modern eras. Analyses for plan-making. Land-use planning and its contemporary issues. European spatial planning. A case of planning and development – Prague I. A case of planning and development – Prague II. Sustainability and planning. Role of a planner. Planning ethics. Presentation of seminar papers (essays).			

List of courses of this pass:

Code	Name of the course	Completion	Credits
11SMCD	Smart Cities Design	Z,ZK	6
Introduction to smart cities, systém analysis and design fundamentals, usage of UML for system design, principles of complex systems, modeling using multiagent systems in the SW environment AnyLogic, application on a small scale real world problem.			
11XN1C	Thesis 1	Z	4
11XN2C	Thesis 2	Z	4
12XN1C	Thesis 1	Z	4
12XN2C	Thesis 2	Z	4
14CISC	Cyber Infrastructure for Smart Cities	Z,ZK	3
Status quo and trends in telecommunications systems applied in cyber infrastructure, technical, economical and legal aspects of telecommunications networks design and services provisioning, identification and quantification of hiererchical telecommunications networks and services performance, telecommunication services dedicated for transport and specifically Smart Cities solutions.			
14FCL	Future Cities Laboratory	KZ	3
Future cities system architecture (with focus on C-ITS) and reference projects, functional and technology solutions description and principles, wireless telco solutions dedicated for C-ITS systems (ITS-G5, LTE-V, etc.), security architecture, data security and personal data protection, testing of the systems and functional parameters assessment, technical properties evaluation, methods of data collection and processing.			
14XN1C	Thesis 1	Z	4
14XN2C	Thesis 2	Z	4
15XN1C	Thesis 1	Z	4
15XN2C	Thesis 2	Z	4
16SHMI	Simulation and HMI	Z,ZK	3
Simulation for the systems in transportation and vehicle systems. User interface, HMI (human-machine interaction), virtual reality and computer graphics for ITS. Simulation theory with application of computing equipment. Creating computing models. Mechanic and dynamic systems and their mathematical models. Simulation of vehicle dynamics, on-land carriage in particular. Virtual reality systems.			
16XN1C	Thesis 1	Z	4
16XN2C	Thesis 2	Z	4

17AMOL	Application of Operations Research Methods in Logistics	Z,ZK	3
Exact, heuristic, metaheuristic methods. Static and dynamic shortest path problem. Location analysis, P&R/K&R facilities location. Travelling salesman problem with constraints. Assignment problem and matching algorithms. Decision making in urban transport. Design of urban transport lines. Scheduling in public transport.			
17PJM	Project Management	KZ	2
Basic terms of the project management, project management standards, organizational structures and processes in the project management, life-cycle of the project, risk analysis, projects in transport and transport infrastructure and their specifics, feasibility study and CBA, project evaluation, PPP projects.			
17SCAR	Sustainable Cities and Regions	Z,ZK	3
Cities in antiquity and in the middle ages, renaissance ideal of a perfect city, 19. and 20. century cities, modern city planning, sustainability as a concept, historical development of transportation in cities, modern transportation systems, logistics as a concept, supply chain, logistics center, city logistics.			
17SCF	Smart Cities Fundamentals	Z,ZK	6
The main smart city components will be described (intelligent transport systems, smart grids, smart buildings, smart lighting, e-governance, etc.) together with their integration methods by using existing international standards to achieve the synergies among different sectors. The quality of life for different city residents is understood as the main criterial function.			
17SU	Smart Urbanism	Z,ZK	6
Urban metabolism and ecology, urban morphology and land use, urban society: demography, mobility, social transition, urban space and places, urban flows, urban modeling, impact of technology innovations on urban transition.			
17TSC	Technologies for Smart Cities	Z,ZK	6
Each presented technology will be described through performance parameters like safety, reliability, integrity, continuity, etc. New business models of technologies' implementation and operation will be introduced to provide advanced deployment decision-making. Legal aspects of technologies' assessment (e.g. GDPR) will be presented for selected application areas.			
17XN1C	Thesis 1	Z	4
17XN2C	Thesis 2	Z	4
18XN1C	Thesis 1	Z	4
18XN2C	Thesis 2	Z	4
20AIMI	Application of ITS in Urban Engineering	Z,ZK	6
The course focuses mainly on the issue of the installation of engineering networks in the area, coordination of engineering activities in the area, organization of the public space, concept of public space solutions, design of systems for traffic and transport telematics management, coordination of transport modes - automobil, pedestrian, MHD, cyclo, modes etc. New approaches to the development of Smart and green approaches Promoting into Public.			
20GINS	Geographical, information, localization and navigation systems	Z,ZK	6
The subject is specialized in problems of work with applications of geographic information systems with special attention to the specialization in the field of transport and telecommunication. It introduces students to geographic data management practices and tools, real world modeling, geographic data storage models, data entry and digitization methods, and a number of other GIS related technologies such as problem mapping, webmap, etc.			
20XN1C	Thesis 1	Z	4
20XN2C	Thesis 2	Z	4
21XN1C	Thesis 1	Z	4
21XN2C	Thesis 2	Z	4
22XN1C	Thesis 1	Z	4
22XN2C	Thesis 2	Z	4
23XN1C	Thesis 1	Z	4
23XN2C	Thesis 2	Z	4
500EKL3	Ecology III - Social Ecology	KZ	2
Social Ecology: The subject deals with the relationship of man and the environment in landscape and settlements. It acquaints students with selected methods of socio-ecological research and participation of citizens in the formation of the rural environment, the city and its socio-spatial structure. The theoretical part of the subject is based on concrete practical examples, which are processed by the students and present them during the semester.			
500U3	Urbanism III - Theory	ZK	2
The course introduces the student to the most important urban theories and ways of thinking about the city from the 19th century to the present. In lectures and seminars, the student is led to think critically in order to be able to analyze, evaluate, compare and recognize the practical effects of these theories on the development of European cities.			
555UP1	Planning 1 - Urban Planning	ZK	3
Close links between architecture and urban planning are typical for Central and Southern Europe. While in e.g. the UK, the USA and Canada planning is a fully independent profession, most planners in the Czech Republic have an architectural background. This may enrich both architecture and planning as multi-disciplinary professions. Man and the environment. Planning, the environment and designing. Planning before planners. Medieval European towns.
