## Characteristics of the courses of this group of Study Plan: Code=PROCM CP 1S20/21 POV Name=PRI CP navazující studium specializace Process Management 1. semestr povinné p edm ty

G16E1401	Marketing Innovations	Z,ZK	6
The primary role of inno	vation in marketing is to gain new customers, improve goodwill, increase sales and profitability of the company. At the begin	ning of the innova	tion process,
innovative marketing sh	ould help identify new market opportunities and risks and improve the research of customer needs. During developing a new	product, innovati	on marketing is
to ensure the constant i	nvolvement of customers and users in this process. And at the end of the innovation process, innovation marketing ensures	the successful intr	oduction of a
new product, technolog	y, and service to the target audience. Innovation marketing should therefore be present at all stages of the innovation proces	s to ensure that c	ustomer and
market orientation is in	ine with advances in products and technologies, which often lead to the application of new marketing approaches. We addre	ss these main as	pects in this
subject.			
G16C1401	Innovation Marketing	Z,ZK	6
G16C1201	Project Management	Z,ZK	6
G63C1301	Corporate Financial Management	Z,ZK	6
The course provides a c	omprehensive view of building the essential aspects of financial management of business processes and projects. Students h	ave the opportun	ty to understand
the main concepts, tools	s and methods of financial management of processes and projects and their use in decision-making practice. Substantial em	phasis is placed o	on evaluating the
financial performance o	f the company, evaluation and valuation of tangible and financial investment projects, working capital management, methods	of financing the c	ompany, project
financing, methods of fi	nancial planning and forecasting, and valuation techniques.		
G63C1102	Statistical Analysis	Z,ZK	6
The course builds on th	e introductory courses of statistics and prefaces slightly advanced statistical analysis methods.	-

Agile Bootcamp co	urse teaches students the fundamentals of Design Thinking and other agile innovation principles. The course introduces three method	s that work well tog	ether within
	nctional team: Design Thinking, Lean Startup and Agile across teams. In the main part, it will offer the right tools and techniques for the sign Sprints, including a practical test of the entire process. Teaching mode: completely online or hybrid, at a specific time/week durin		ementation
G16E0202	Project Technology Management	Z,ZK	6
Technology project	management means not only decisions about one's own technological research, innovative cooperation, or technology transfer. Technology	ological innovations	s, especially
	long tied up company resources, and poor decisions can pose significant financial problems for most companies. Therefore, it is necess-	-	
	d commercial activities of technology management in a more comprehensive form. Technology project management is more goal-or		
	onal structure and budget. After completing the course, students should answer the following framework topics: define the nature, imp	-	
	management with a focus on the analysis of technological trends, risks, and opportunities, innovation radar, and technology assessr gement to the development of the product, production, and service technologies. Characterize the process of technological forecasts,		-
	y of the company. Explain creating a project plan for implementing new technology. Clarify the importance of the necessary protection	-	
	property and the need to commercialize their own technologies at the level of industry, region, or state.		
G16E0203	Project Innovation Management	Z,ZK	6
	on requires much more than the management of individual aspects of the innovation process within the institution; it also requires a		
	actions between various stakeholders, their goals, objectives, markets, and organizations. Traditional innovation management usually for		
	ning, usually on implementation and control within the institution. Procedures are often repeated. This creates a framework that can l		
	the set of rules and measures of the institution. However, most innovation projects require an individual approach so that project teal		
	ative. Each innovation project is individual and requires an individual approach. A clear strategy in the area of innovation, a supportive al goals of innovation, constant study of trends and risks, an appropriate budget, Change- and Risk management, and adequate moti	•	
•	quisites for an innovation project. The main goal of this course is to acquaint students with the key specifics of innovation projects. In		
	nd commercialization of innovations, and related intellectual property protection. After completing the course, the student should ans	-	
topics: how to iden	tify and manage the framework of an innovation project, create a project breakdown structure, create a project innovation plan, creat	e a project budget,	define and
	for innovation, manage project development, identify and manage innovation risks, and understand the sourcing process for the project	-
