

Study plan

Name of study plan: navaz. mag. PRE program SC 22/23 (pro studenty studující všechny p edm ty 1. a 2.sem. na VUT)

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Smart Cities

Type of study: Follow-up master full-time

Required credits: 60

Elective courses credits: 0

Sum of credits in the plan: 60

Note on the plan:

Name of the block: Semestrální projekt

Minimal number of credits of the block: 8

The role of the block: ZP

Code of the group: XN SC 1-2 21/22

Name of the group: Projekty nav.prez.1.-2.sem (od) 21/22 na FD programu SC

Requirement credits in the group: In this group you have to gain 8 credits

Requirement courses in the group: In this group you have to complete 2 courses

Credits in the group: 8

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role

Name of the block: Compulsory courses in the program

Minimal number of credits of the block: 50

The role of the block: P

Code of the group: 1.S.NPSC 21/22

Name of the group: 1.s.nav.prez (od) 21/22 - program SC (studium všech p edm t na VUT)

Requirement credits in the group: In this group you have to gain 24 credits

Requirement courses in the group: In this group you have to complete 4 courses

Credits in the group: 24

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
17SCF-E	Smart Cities Fundamentals <i>Tomáš Horák, Miroslav Svítek</i>	Z,ZK	6	3P+2C	Z	P
17TSC-E	Technologies for Smart Cities <i>Tomáš Horák, Miroslav Svítek</i>	Z,ZK	6	3P+2C	Z	P
20AIMI-E	Application of ITS in Urban Engineering <i>Tomáš Tichý</i>	Z,ZK	6	3P+3C	Z	P
20GINS-E	Geographical, information, localization and navigation systems <i>Zuzana Purkrábková, František Kekula, Pavel Hrubeš</i>	Z,ZK	6	3P+3C	Z	P

Characteristics of the courses of this group of Study Plan: Code=1.S.NPSC 21/22 Name=1.s.nav.prez (od) 21/22 - program SC (studium všech p edm t na VUT)

17SCF-E	Smart Cities Fundamentals	Z,ZK	6	The main smart city components will be described (intelligent transport systems, smart grids, smart buildings, smart lighting, e-governance, etc.) together with their integration methods by using existing international standards to achieve the synergies among different sectors. The quality of life for different city residents is understood as the main criterial function.
17TSC-E	Technologies for Smart Cities	Z,ZK	6	Each presented technology will be described through performance parameters like safety, reliability, integrity, continuity, etc. New business models of technologies' implementation and operation will be introduced to provide advanced deployment decision-making. Legal aspects of technologies' assessment (e.g. GDPR) will be presented for selected application areas.
20AIMI-E	Application of ITS in Urban Engineering	Z,ZK	6	The course focuses mainly on the issue of the installation of engineering networks in the area, coordination of engineering activities in the area, organization of the public space, concept of public space solutions, design of systems for traffic and transport telematics management, coordination of transport modes - automobil, pedestrian, MHD, cyclo, modes etc. New approaches to the development of Smart and green approaches Promoting into Public.
20GINS-E	Geographical, information, localization and navigation systems	Z,ZK	6	The subject is specialized in problems of work with applications of geographic information systems with special attention to the specialization in the field of transport and telecommunication. It introduces students to geographic data management practices and tools, real world modeling, geographic data storage models, data entry and digitization methods, and a number of other GIS related technologies such as problem mapping, webmap, etc.

Code of the group: 2.S.NPSC 21/22

Name of the group: 2.s.nav.prez (od) 21/22 - program SC (studium všech p edm t na VUT)

Requirement credits in the group: In this group you have to gain 23 credits

Requirement courses in the group: In this group you have to complete 6 courses

Credits in the group: 23

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
11SMCD-E	Smart Cities Design Ond ej P ibyl Ond ej P ibyl Ond ej P ibyl (Gar.)	Z,ZK	6	3P+2C	L	P
14CISC-E	Cyber Infrastructure for Smart Cities Zden k Lokaj, Martin Šrotý, Tomáš Zelinka Tomáš Zelinka	Z,ZK	3	2P+1C	L	P
17SCAR-E	Sustainable Cities and Regions Tomáš Horák, Karel Maier Tomáš Horák (Gar.)	Z,ZK	3	2P+1C	L	P
17SU-E	Smart Urbanism Jakub Vorel Jakub Vorel (Gar.)	Z,ZK	6	2P+3C	L	P
14FCL-E	Future Cities Laboratory Miroslav Svítek, Zden k Lokaj, Martin Šrotý, Michal Mlada, Miroslav Vaniš	KZ	3	0P+3C	L	P
17PJMG-E	Project Management Lucie Vicherková, Alena Rybí ková Alena Rybí ková (Gar.)	KZ	2	2P+0C	L	P

Characteristics of the courses of this group of Study Plan: Code=2.S.NPSC 21/22 Name=2.s.nav.prez (od) 21/22 - program SC (studium všech p edm t na VUT)

11SMCD-E	Smart Cities Design	Z,ZK	6	Introduction to smart cities, systém analysis and design fundamentals, usage of UML for system design, principles of complex systems, modeling using multiagent systems in the SW environment AnyLogic, application on a small scale real world problem.		
14CISC-E	Cyber Infrastructure for Smart Cities	Z,ZK	3	Status quo and trends in telecommunications systems applied in cyber infrastructure, technical, economical and legal aspects of telecommunications networks design and services provisioning, identification and quantification of hierarchical telecommunications networks and services performance, telecommunication services dedicated for transport and specifically Smart Cities solutions.		
17SCAR-E	Sustainable Cities and Regions	Z,ZK	3	Cities in antiquity and in the middle ages, renaissance ideal of a perfect city, 19. and 20. century cities, modern city planning, sustainability as a concept, historical development of transportation in cities, modern transportation systems, logistics as a concept, supply chain, logistics center, city logistics.		
17SU-E	Smart Urbanism	Z,ZK	6	Urban metabolism and ecology, urban morphology and land use, urban society: demography, mobility, social transtition, urban space and places, urban flows, urban modeling, impact of technology innovations on urban transition.		
14FCL-E	Future Cities Laboratory	KZ	3	Future cities system architecture (with focus on C-ITS) and reference projects, functional and technology solutions description and principles, wireless telco solutions dedicated for C-ITS systems (ITS-G5, LTE-V, etc.), security architecture, data security and personal data protection, testing of the systems and functional parameters assessment, technical properties evaluation, methods of data collection and processing.		
17PJMG-E	Project Management	KZ	2	Basic terms of the project management, project management standards, organizational structures and processess in the project management, life-cycle of the project, risk analysis, projects in transport and transport infrastructure and their specifics, feasibility study and CBA, project evaluation, PPP projects.		

Code of the group: 2.S.NPSC VYB 21/22

Name of the group: 2.s.nav.prez (od) 21/22 výb r p edm tu - program SC (studium všech p edm t na VUT)

Requirement credits in the group: In this group you have to gain 3 credits

Requirement courses in the group: In this group you have to complete 1 course

Credits in the group: 3

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
16SHMI-E	Simulation and HMI Stanislav Novotný, Petr Bouchner, Alina Mashko	Z,ZK	3	2P+1C	L	P
17AMOL-E	Application of Operations Research Methods in Logistics Alena Rybí ková, Josef Volek Josef Volek (Gar.)	Z,ZK	3	2P+1C	L	P

Characteristics of the courses of this group of Study Plan: Code=2.S.NPSC VYB 21/22 Name=2.s.nav.prez (od) 21/22 výb r p edm tu - program SC (studium všech p edm t na VUT)

16SHMI-E	Simulation and HMI	Z,ZK	3	Simulation for the systems in transportation and vehicle systems. User interface, HMI (human-machine interaction), virtual reality and computer graphics for ITS. Simulation theory with application of computing equipment. Creating computing models. Mechanic and dynamic systems and their mathematical models. Simulation of vehicle dynamics, on-land carriage in particular. Virtual reality systems.		
----------	--------------------	------	---	--	--	--

17AMOL-E	Application of Operations Research Methods in Logistics	Z,ZK	3
Exact, heuristic, metaheuristic methods. Static and dynamic shortest path problem. Location analysis, P&R/K&R facilities location. Travelling salesman problem with constraints. Assignment problem and matching algorithms. Decision making in urban transport. Design of urban transport lines. Scheduling in public transport.			

Name of the block: Compulsory elective courses

Minimal number of credits of the block: 2

The role of the block: PV

Code of the group: 1.S.NPSC FA 20/21

Name of the group: 1.s.nav.prez (od) 20/21 - program SC - p edm ty z FA

Requirement credits in the group: In this group you have to gain at least 2 credits (at most 7)

Requirement courses in the group: In this group you have to complete at least 1 course (at most 3)

Credits in the group: 2

Note on the group:

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) <i>Tutors, authors and guarantors (gar.)</i>	Completion	Credits	Scope	Semester	Role
500EKL3	Ecology III - Social Ecology <i>Milan Macoun, Henry William Andrew Hanson Iv Henry William Andrew Hanson Iv (Gar.)</i>	KZ	2	2P+0C	Z	PV
500U3	Urbanism III - Theory	ZK	2	1P+1C	Z	PV
555UP1	Planning 1 - Urban Planning <i>Karel Maier, Jakub Vorel, Petr Klápšt Jakub Vorel (Gar.)</i>	ZK	3	2P+1C	Z	PV

Characteristics of the courses of this group of Study Plan: Code=1.S.NPSC FA 20/21 Name=1.s.nav.prez (od) 20/21 - program SC - p edm ty z FA

500EKL3	Ecology III - Social Ecology	KZ	2
Social Ecology: The subject deals with the relationship of man and the environment in landscape and settlements. It acquaints students with selected methods of socio-ecological research and participation of citizens in the formation of the rural environment, the city and its socio-spatial structure. The theoretical part of the subject is based on concrete practical examples, which are processed by the students and present them during the semester.			
500U3	Urbanism III - Theory	ZK	2
This course familiarizes students with the most important urban theories of the 20th and 21st century. The goal is to show the emergence and transformation of these theories on the background of social and economic development of the society. Students are guided through a case study approach to critical thinking, to analyze, evaluate, compare and recognize the impact of these theories on the city.			
555UP1	Planning 1 - Urban Planning	ZK	3
Close links between architecture and urban planning are typical for Central and Southern Europe. While in e.g. the UK, the USA and Canada planning is a fully independent profession, most planners in the Czech Republic have an architectural background. This may enrich both architecture and planning as multi-disciplinary professions. Man and the environment. Planning, the environment and designing. Planning before planners. Medieval European towns. Planning in the Industrial Era. Comprehensive planning. European great projects in the 20th century. Challenges for planning in modern and post-modern eras. Analyses for plan-making. Land-use planning and its contemporary issues. European spatial planning. A case of planning and development – Prague I. A case of planning and development – Prague II. Sustainability and planning. Role of a planner. Planning ethics. Presentation of seminar papers (essays).			

List of courses of this pass:

Code	Name of the course	Completion	Credits
11SMCD-E	Smart Cities Design	Z,ZK	6
Introduction to smart cities, systém analysis and design fundamentals, usage of UML for system design, principles of complex systems, modeling using multiagent systems in the SW environment AnyLogic, application on a small scale real world problem.			
11XN1C-E	Thesis 1	Z	4
11XN2C-E	Thesis 2	Z	4
12XN1C-E	Thesis 1	Z	4
12XN2C-E	Thesis 2	Z	4
14CISC-E	Cyber Infrastructure for Smart Cities	Z,ZK	3
Status quo and trends in telecommunications systems applied in cyber infrastructure, technical, economical and legal aspects of telecommunications networks design and services provisioning, identification and quantification of hiererchical telecommunications networks and services performance, telecommunication services dedicated for transport and specifically Smart Cities solutions.			
14FCL-E	Future Cities Laboratory	KZ	3
Future cities system architecture (with focus on C-ITS) and reference projects, functional and technology solutions description and principles, wireless telco solutions dedicated for C-ITS systems (ITS-G5, LTE-V, etc.), security architecture, data security and personal data protection, testing of the systems and functional parameters assessment, technical properties evaluaiton, methods of data collection and processing.			
14XN1C-E	Thesis 1	Z	4

14XN2C-E	Thesis 2	Z	4
15XN1C-E	Thesis 1	Z	4
15XN2C-E	Thesis 2	Z	4
16SHMI-E	Simulation and HMI	Z,ZK	3
Simulation for the systems in transportation and vehicle systems. User interface, HMI (human-machine interaction), virtual reality and computer graphics for ITS. Simulation theory with application of computing equipment. Creating computing models. Mechanic and dynamic systems and their mathematical models. Simulation of vehicle dynamics, on-land carriage in particular. Virtual reality systems.			
16XN1C-E	Thesis 1	Z	4
16XN2C-E	Thesis 2	Z	4
17AMOL-E	Application of Operations Research Methods in Logistics	Z,ZK	3
Exact, heuristic, metaheuristic methods. Static and dynamic shortest path problem. Location analysis, P&R&K&R facilities location. Travelling salesman problem with constraints. Assignment problem and matching algorithms. Decision making in urban transport. Design of urban transport lines. Scheduling in public transport.			
17PJMGE	Project Management	KZ	2
Basic terms of the project management, project management standards, organizational structures and processes in the project management, life-cycle of the project, risk analysis, projects in transport and transport infrastructure and their specifics, feasibility study and CBA, project evaluation, PPP projects.			
17SCAR-E	Sustainable Cities and Regions	Z,ZK	3
Cities in antiquity and in the middle ages, renaissance ideal of a perfect city, 19. and 20. century cities, modern city planning, sustainability as a concept, historical development of transportation in cities, modern transportation systems, logistics as a concept, supply chain, logistics center, city logistics.			
17SCF-E	Smart Cities Fundamentals	Z,ZK	6
The main smart city components will be described (intelligent transport systems, smart grids, smart buildings, smart lighting, e-governance, etc.) together with their integration methods by using existing international standards to achieve the synergies among different sectors. The quality of life for different city residents is understood as the main criterial function.			
17SU-E	Smart Urbanism	Z,ZK	6
Urban metabolism and ecology, urban morphology and land use, urban society: demography, mobility, social transition, urban space and places, urban flows, urban modeling, impact of technology innovations on urban transition.			
17TSC-E	Technologies for Smart Cities	Z,ZK	6
Each presented technology will be described through performance parameters like safety, reliability, integrity, continuity, etc. New business models of technologies' implementation and operation will be introduced to provide advanced deployment decision-making. Legal aspects of technologies' assessment (e.g. GDPR) will be presented for selected application areas.			
17XN1C-E	Thesis 1	Z	4
17XN2C-E	Thesis 2	Z	4
18XN1C-E	Thesis 1	Z	4
18XN2C-E	Thesis 2	Z	4
20AIMI-E	Application of ITS in Urban Engineering	Z,ZK	6
The course focuses mainly on the issue of the installation of engineering networks in the area, coordination of engineering activities in the area, organization of the public space, concept of public space solutions, design of systems for traffic and transport telematics management, coordination of transport modes - automobil, pedestrian, MHD, cyclo, modes etc. New approaches to the development of Smart and green approaches Promoting into Public.			
20GINS-E	Geographical, information, localization and navigation systems	Z,ZK	6
The subject is specialized in problems of work with applications of geographic information systems with special attention to the specialization in the field of transport and telecommunication. It introduces students to geographic data management practices and tools, real world modeling, geographic data storage models, data entry and digitization methods, and a number of other GIS related technologies such as problem mapping, webmap, etc.			
20XN1C-E	Thesis 1	Z	4
20XN2C-E	Thesis 2	Z	4
21XN1C-E	Thesis 1	Z	4
21XN2C-E	Thesis 2	Z	4
22XN1C-E	Thesis 1	Z	4
22XN2C-E	Thesis 2	Z	4
23XN1C-E	Thesis 1	Z	4
23XN2C-E	Thesis 2	Z	4
500EKL3	Ecology III - Social Ecology	KZ	2
Social Ecology: The subject deals with the relationship of man and the environment in landscape and settlements. It acquaints students with selected methods of socio-ecological research and participation of citizens in the formation of the rural environment, the city and its socio-spatial structure. The theoretical part of the subject is based on concrete practical examples, which are processed by the students and present them during the semester.			
500U3	Urbanism III - Theory	ZK	2
This course familiarizes students with the most important urban theories of the 20th and 21st century. The goal is to show the emergence and transformation of these theories on the background of social and economic development of the society. Students are guided through a case study approach to critical thinking, to analyze, evaluate, compare and recognize the impact of these theories on the city.			
555UP1	Planning 1 - Urban Planning	ZK	3
Close links between architecture and urban planning are typical for Central and Southern Europe.
