

Study plan

Name of study plan: Navazující Architektura a urbanismus 2023

Faculty/Institute/Others:

Department:

Branch of study guaranteed by the department: Welcome page

Garantor of the study branch:

Program of study: Architecture and Urbanism

Type of study: Follow-up master full-time

Required credits: 112

Elective courses credits: 8

Sum of credits in the plan: 120

Note on the plan: Platí od AR 2023/24

Name of the block: Compulsory courses

Minimal number of credits of the block: 96

The role of the block: Z

Code of the group: ATRN

Name of the group: Ateliér - realizační

Requirement credits in the group: In this group you have to gain 11 credits

Requirement courses in the group: In this group you have to complete at least 1 course

Credits in the group: 11

Note on the group:

Characteristics of the courses of this group of Study Plan: Code=VOLITELNÉ NAU 2023 Name=Volitelné navazující AU 2023

521UP2	Planning analyses	KZ	2
Recognition and assessment and the specification of problems to be solved in the planning documentation., The basic principles of urban planning applied to the planning of basic themes: natural conditions, settlement and housing, recreation, production, transportation - in terms of limits, values and risks for each theme			
516CAD4	Computer Aided Design IV	KZ	2
Workshop - new trends in modelling, visualization, animation, software: 3DStudio Viz, ArchiCAD, Allplan Nemetechek			
513DAT6	History and Theory of Architecture VI	KZ	2
513DAT8	History and Theory of Architecture VIII	KZ	2

513DU3N	History of Art III Monographic portraits of selected artists from Renaissance to 20th century, whose importance exceeded both style and movement categories.	KZ	2
518DEV1	Development I	KZ	2
518DEV2	Development II	KZ	2
521EKL2	Ecology II Approaches, methods, problem questions and particular examples of social ecology in connection with regional and strategic planning, architecture, municipal policy, sustainable development. Social-environment situation, identity problems, phenomenon of a location, everyday life. Methods of social ecology for participation of inhabitants and communication, examples of their use. Giving tutorials on students' works and presentation.	KZ	2
513FSP4	Philosophy, Sociology and Psychology IV	KZ	2
513FSP5	Philosophy, Sociology and Psychology V	KZ	2
515I2	History of Interior To acquaint students with historical evolution of interiors in the Czech R. and abroad in relationship to the life of the society (architectural style, material culture, way of life, clothing, craft) .	KZ	2
513HS2N	Historical buildings and seats II	KZ	2
513HS3N	Historical buildings and seats III	KZ	2
520KAN3	Landscape Architecture III	Z,ZK	3
520KA4	Landscape Architecture IV	ZK	2
520KA5	Landscape Architecture V	KZ	2
513HS1	Vernacular Architecture Following the development of building activities in the Czech villages from the Middle Ages to the 20th century in the context of the overall development of architecture	KZ	2
519U5N	Methods	KZ	2
515I3	Multimedia Design a/ Understanding the evolution of theatre building: technology and typology of scene, lighting, acoustics. b/ Architecture and visual media. Theatrical, Film and Television scenography. Exhibition, advertisement, virtual reality - different ways of presentation of architectural projects	KZ	2
518NS7	Communication and Design Strategies How the highways, railways, bridges, waterways, contruction of dams, weirs and other engineering structures affect the formation of cities and landscape	KZ	2
524TZ2N	Renewable Resources of Energy Renewable energy resources,secondary energy resources,passive solar energ. gains,photovoltaic,photothermal active energ. systems,energy of wind,biomass,geothermal energy,conception of low energy consumption house,low energy consumption of urban space, sustainable development and alternative energy resources	KZ	2
514PP3	Monument Preservation III	KZ	2
520PRK1N	Regional and Landscape planning I	KZ	2
521PRK2	Regional and Landscape planning II	KZ	2
520PRK3	Regional and Landscape planning III	Z,ZK	2
516PG2N	Computer Graphics II	KZ	2
523PN1	Design Computing I	KZ	2
516PN2	Design Computing II Students are expected to structure their own learning path on the basis of the challenge provided by the architect. The course lectures supplement knowledge and background of contemporary design computation technologies.	KZ	2
522PN3	Design Computing III Design Computing 3 introduces the way computers understand geometry and space. Students skilled and trained in this area (basic data types, coordinates, NURBS and its predecessors, simulations, optimizations and other phenomena) can become experts in the newly created field. This knowledge is already general enough to grant students abilities in whatever modeling platform they choose (Revit-Dynamo, ArchiCAD, Rhinoceros-Grasshopper and others). By knowing and being able to use the algorithms used in current software students can solve complex problems without being dependent on the solutions provided only by the software developers mentioned above.	KZ	2
523PS8N	Failures and Reconstruction of Buildings Failures and reconstruction of basements, vertical and roof structures. Analysis of origin, improper design, application, further aspects. Emphasis on waterproofing and building physics. Defect prevention, renovation methods, incl. advanced methods with usage of up to date technologies and materials.	KZ	2
519U7N	Urbanistic Composition II	KZ	2
521UP3	Spatial and Strategic Planning Analyses of structuration of a space, local / regional ecology and economy, technical limits in a territory, and opinions of citizens. SWOT analysis use to identify problems and potentials of concrete area. Development of scenarios and, on their bases, development strategy.	KZ	2
521PRI1		KZ	2
521PRI2		KZ	2
521PRS1		KZ	2
521PRS2		KZ	2
524PRES4	4	KZ	2
519DEN2	Special Dendrology	KZ	2
522SNK5	Statics and Loadbearing Structures V Building foundations: Technology and procedures applied in foundation and intercepting of buildings. Determining risks in the design of buildings and in construction of foundation jams, choice of appropriate technical solutions. Causes of building failures and suggestions of remedial procedures. Lessons are combination of lectures and seminars.	KZ	2
522SNK6	Statics and Loadbearing Structures VI Modern and historical structures. Structural design in various materials: stone, brick, concrete, metal, wood, plastics. Structural design of high-rise buildings, arched structures, shells, rope structures, membrane structures, tensegrities.	KZ	2
514SHP1		KZ	2
514SHP2		KZ	2
514SHP3		KZ	2
599STN1	Residency	Z	
599STN	Residency	Z	
520TKA1N	Landscape Technology I	KZ	2

520TKA2N	Landscape Technology II	KZ	2
519U6N	Regional Planning	KZ	2
511VT6	Visual Arts VI	KZ	2
523PS7N	Design of Facades	KZ	2
Trends in contemporary construction (integrated and sustainable building design, digitalization of construction in all phases of the building life cycle, use of BIM information modelling, ...) and the expected development of construction in relation to architectural design. Presentation of construction types and typologies of contemporary buildings in the Czech Republic and abroad. Interaction between urbanism and buildings. Modern trends in the realization of buildings. Architecture of artificial intelligence. Excursions with commentary by the authors to important buildings in Prague.			
599WS2	Workshop	Z	
599WS1	Workshop	Z	
599WS3	Workshop	Z

521PRI2		KZ	2
521PRK2	Regional and Landscape planning II	KZ	2
521PRS1		KZ	2
521PRS2		KZ	2
521UP1	Urban Planning	Z,ZK	3
Principles of spatial planning as a conscious influence of changes in the territory. Planning history and the role of planning in a democratic society. Getting to know stakeholders in the planning process and the types of planning tools, the process of their creation, approval and use and relationships and linkages that influence the regional development.			

521UP2	Planning analyses	KZ	2
Recognition and assessment and the specification of problems to be solved in the planning documentation., The basic principles of urban planning applied to the planning of basic themes: natural conditions, settlement and housing, recreation, production, transportation - in terms of limits, values and risks for each theme			
521UP3	Spatial and Strategic Planning	KZ	2
Analyses of structuration of a space, local / regional ecology and economy, technical limits in a territory, and opinions of citizens. SWOT analysis use to identify problems and potentials of concrete area. Development of scenarios and, on their bases, development strategy.			
522PN3	Design Computing III	KZ	2
Design Computing 3 introduces the way computers understand geometry and space. Students skilled and trained in this area (basic data types, coordinates, NURBS and its predecessors, simulations, optimizations and other phenomena) can become experts in the newly created field. This knowledge is already general enough to grant students abilities in whatever modeling platform they choose (Revit-Dynamo, ArchiCAD, Rhinoceros-Grasshopper and others). By knowing and being able to use the algorithms used in current software students can solve complex problems without being dependent on the solutions provided only by the software developers mentioned above.			
522SNK5	Statics and Loadbearing Structures V	KZ	2
Building foundations: Technology and procedures applied in foundation and intercepting of buildings. Determining risks in the design of buildings and in construction of foundation jams, choice of appropriate technical solutions. Causes of building failures and suggestions of remedial procedures. Lessons are combination of lectures and seminars.			
522SNK6	Statics and Loadbearing Structures VI	KZ	2
Modern and historical structures. Structural design in various materials: stone, brick, concrete, metal, wood, plastics. Structural design of high-rise buildings, arched structures, shells, rope structures, membrane structures, tensegrities.			
523PN1	Design Computing I	KZ	2
523PS6N		KZ	2
Basic definitions and factors of sustainable construction. Methodology of quality assessment of buildings based on sustainable principles. Parameters and structural principles of the design of low-energy buildings. Interaction between building parterre and urban complex.			
523PS7N	Design of Facades	KZ	2
Trends in contemporary construction (integrated and sustainable building design, digitalization of construction in all phases of the building life cycle, use of BIM information modelling, ...) and the expected development of construction in relation to architectural design. Presentation of construction types and typologies of contemporary buildings in the Czech Republic and abroad. Interaction between urbanism and buildings. Modern trends in the realization of buildings. Architecture of artificial intelligence. Excursions with commentary by the authors to important buildings in Prague.			
523PS8N	Failures and Reconstruction of Buildings	KZ	2
Failures and reconstruction of basements, vertical and roof structures. Analysis of origin, improper design, application, further aspects. Emphasis on waterproofing and building physics. Defect prevention, renovation methods, incl. advanced methods with usage of up to date technologies and materials.			
524P	Law	ZK	2
Introduction to system of law - brief historical explanation of construction law and professional conduct; professional conduct in Czech republic and EU - comparative explanation; , construction law, land use planning, city (town) planning, structure planning, local and regional planning, building permit, urban issues; , administrative law and decision making, environment and sustainable development; green building and new technologies; care of nature and landscape (town and country), forest protection, soil protection, water protection, atmosphere protection, care of historical monuments and conservation; public health protection and safety; , infrastructure: transportation / traffic; railways; civil aviation; shipping traffic; energetics - energy efficiency etc.; , copyright, registration and licensing; professional conduct; procurement of architectural services; professional standards for planning and design build; professional contracts; procurement and competitions (architectural, urban and landscape)			
524PRES2	2	Z,ZK	3
Solution arrangement of structure and process flow sheet, solution technoloical structure, planing card, planning and scheduling of building, PERT, spativ - temporal chart, gant chart, structure of building site and solution of building traffic, eniroment protection during implamation, feasibility study of building implamation, processing and seliction of building method, flow - line process.			
524PRES3	3	Z,ZK	3
Investment, evaluation of an investment opportunity, calculation of efficiency of architectural project. Economics and development of a region, real estate market, governmental investments.			
524PRES4	4	KZ	2
524TZ1N	Municipal Engineering	Z,ZK	2
Structure of settlement utilities, resources, transfer, consumption, water supply of settlements, drainage of settlements, integrated systems of solid waste management, water courses, water basins, energy supply of settlements, fossil energy. resources, nuclear energy, alternative energy resources, transfer of information, ecology and urban space, sustainable development.			
524TZ2N	Renewable Resources of Energy	KZ	2
Renewable energy resources,secondary energy resources,passive solar energ.gains,photovoltaic,photothermal active energ. systems,energy of wind,biomass,geothermal energy,conception of low energy consumption house,low energy consumption of urban space, sustainable development and alternative energy resources			
527ATRn	Studio-Implementation Project	KZ	11
527ATS1	Studio-Building Complex	KZ	11
527ATUR	Studio-Urban Design	KZ	11
