Recomended pass through the study plan

Name of the pass: Software Engineering and Technology

Faculty/Institute/Others:

Department:

Pass through the study plan: Software Engineering and Technology Branch of study guranteed by the department: Common courses

Guarantor of the study branch: Program of study: Welcome page Type of study: unknown full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role
B6B04PRE	Presentation Petra Juna Jennings, Jitka Pinková Jitka Pinková Petra Juna Jennings (Gar.)	KZ	3	1P+1C	Z	Р

List of courses of this pass:

Code	Name of the course	Completion	Credits
B0B04B2Z	English language B2 - exam	Z,ZK	0
I) The B2 English E	xam is a compulsory subject for all Faculty of Electrical Engineering students at the Czech Technical University. According to the Stu	dy and Examination	n Rules and
Regulations for Stu	dents at CTU (Part III, Article 4), a compulsory subject is one whose completion is a necessary condition in order to successfully con	plete the study pro	ogramme. In
addition, this requir	es the passing of an examination evaluated on the scale A, B, C, D, or E (SERR Part III, Article 6). II) According to the Common Euro	pean Framework o	f Reference
for Languages (CE	FR), an international standard for describing language ability, the definition of an English language learner who has achieved the B2	(Upper-Intermedia	ate) level is
one who can under	stand the main ideas of complex text on both concrete and abstract topics, including technical discussions in his/her field of specialisa	tion. Can interact w	ith a degree
, ,	itaneity that makes regular interaction with native speakers quite possible without strain for either party. Can produce clear, detailed to	U	,
	point on a topical issue giving the advantages and disadvantages of various options. III) Students who have successfully passed an	• •	
within the past five	ears may present their certificate to the Department of Languages, Faculty of Electrical Engineering.Upon approval, students are the	n exempt from both	the Writter
	Test and the Oral Part. For a list of approved international exams go the department website: http://jazyky.fel.cvut.cz/		
B0B36DBS	Database Systems	Z,ZK	6
The course is design	ned as a basic database course mainly aimed at the student ability to design a relational data model and to use the SQL language f	or data definition a	s well as for
data querying and	to choose the appropriate degree of transaction isolation. Students will also get acquainted with the most commonly used indexing		ise system
	architecture and their management. They will verify their knowledge during the elaboration of a continuously submitted seminal		
B0B36PJV	Programming in Java	Z,ZK	6
	on the basics of algorithms and programming from the first semester and introduces students to the Java environment. The course al		•
	e. The topics of the course includes exceptions, event handling, and building a graphical interface. Basic library methods, working wit		
	An important topic is models of multithreaded applications and their implementation. Practical exercises of practical skills and knowled	•	
of solving partial ta	sks and semester work, which will be submitted continuously through the source code version control system. The semester work so		oints for the
	correctness and efficiency of the code, as well as points that take into account the quality of the source codes, their readability and		
B0B39KAJ	Client applications in JavaScript	Z,ZK	5
B0B39MM1	Multimedia 1	Z,ZK	6
_	udents knowledge necessary to produce and edit multimedia content using variety of tools and creative methods. Lectures are focuse		
•	hods and approaches commonly used in commercial and alternative creation processes. The presented topics include production pr		
interactive multimed	dia applications, data formats and compression methods, technical equipment to record video, lighting devices and their control. The co		roblematics
	of archivation and distribution of multimedia content. The part of the course is also a project with use of presented technologies and		
B0B39PGR	Computer graphics programming	Z,ZK	6
B6B01LAG	Linear Algebra	Z,ZK	7
B6B01MAA	Mathematics Analysis	Z,ZK	5
This course is an ir	troduction to differential and integral calculus. It covers basic properties of functions, limits of functions, derivative and its application	s (graphing, Taylor	polynomial)
	and definite/indefinite integral with its applications, sequences and series.		
B6B01PST	Statistics and Probability	Z,ZK	4
The students will be	be introduced to the theory of probability and mathematical statistics, namely to the basic computing methods and their applications is	n practice. The cou	irse covers
the basic parts of p	robability and mathematical statistics. The first part is focused on classical probability, including conditional probability. The next part c	leals with the theor	y of random
variables and their	distributions, examples of the most important types of discrete and continuous distributions, numerical characteristics of random varial	oles, their independ	lence, sums
and tran	sformations. Probabilistic knowledge is then used in the description of statistical methods for estimating distribution parameters and	testing hypotheses	
B6B01ZDM	Introduction to Discrete Mathematics	Z,ZK	5
No advanced kno	wleges of mathematics are required at the beginning of this course. Using illustrative examples we build sufficient understanding of	combinatorics, set	and graph
	theory. Then we proceed to a brief formal construction of predicate calculus.		
B6B04PRE	Presentation	KZ	3

DCD4CEID	Compared finance	7 71/	_
B6B16FIP B6B16INS	Corporate finance Information Systems	Z,ZK KZ	5 4
	urse is to familiarise students with the information systems topic and information systems implementation principles. During the cours		_
	cisting types of systems and their usage in specific industry segments. Students are familiarised with the CRM, ERP, MRP and other t		
The fundament	tal part of the course is the introduction to key ideas of an information system selection, evaluation of information system benefits, wa	ays of information	systems
•	d information system implementation based on the project management principles. The emphasis is on the initial customer analysis,		•
	better to implement any existing information system or to develop a new one from scratch. These factors determine the information sy	•	
	of the course information systems security, operation, support, maintenance, legislation impacts, and government information systems		
B6B16ISP	Business Process Management	Z,ZK	5
B6B16MPR	Decision Making Methods	Z,ZK	5
B6B16PIT	Law for IT	Z,ZK	4
B6B16ZMI	Marketing Research	Z,ZK	5
B6B16ZPD	Business Economics	Z,ZK	5
B6B32DSV	Distributed Computing	Z,ZK	5
	ised on technologies that support distributed computing: on mechanisms ensuring reliable, efficient and secure connection of applica Imunication channels and up-to-date middleware technologies. A significant part of lectures is dedicated to distributed algorithms tha		
interfaces of com	access, deadlock detection/avoidance, fault-tolerance, mobile computing, and security.	t assure causanty,	CACIUSIVO
B6B32KAB	Cryptography and Information Security	Z,ZK	5
	curity course provides a complete source of information on the field of security of information systems and information technologies. The		_
society is created	d, transferred, stored in electronic form so information security is very important part of it. Technical background for information security	ity is provided by o	cryptology.
B6B32PSI	Computer Networks	Z,ZK	5
B6B32SOS	Network Operating Systems	Z,ZK	5
	systems, Linux, Unix. Administration and network tools, managing and administration of documentation. The graduates will be informed		nception and
	procedures in operating systems administration (UNIX) and gain the basic facility in operating systems configuration based on the x 8		
B6B32ST2	Advanced Networking Technologies	Z,ZK	5
B6B32TKS	Telecommunications Networks	Z,ZK	5
B6B36DSA	Data Structures and Algorithms	Z,ZK	6
B6B36EAR	Enterprise Architectures	KZ	5
	an overview of enterprise system architectures, focusing on Spring and Java EE. Students will become familiar with the most common		
related design patt	terns. In particular, the focus will be put on the principles of inversion control, dependency injection and Java Bean lifecycle. Pairs of s enterprise application as their semestral work.	students will prepa	ire a simple

section of the course divided into two lectures and two workshops each day. Students will acquire the practical principles in the acquisition and processing of multimedia content while they use several different types of instruments at the application level and at the level of simple code. All students will apply the knowledge gained within the last day dedicated to composition rules within a Web project. After completing the course, students will carry out their own independent project and after its submission will be assessed.

ı	DODOSZVVA	Foundations of Web Applications	_ ∠,∠r\) S

The subject is focussing on the creation and maintenance of web presentations. It covers the creation of data structures (HTML), graphical design (CSS), and dynamics on the client side (Javascript). The course continues with server-side dynamics programmed in PHP 7 language. The students will learn how to handle forms and how to create a simple web application. The subject ends with an oral and written exam.

The purpose of the safety course is to give the students basic knowledge of electrical equipment and installation as to avoid danger arising from operation of it. This introductory course contains fundamentals of Safety Electrical Engineering. In this way the students receive qualification of instructed person that enables them to work on electrical equipment.

contains tandamentals of early from an engineering in the way the statement forms of the first o

The guidelines were worked out based on The Training Scheme for Health and Occupational Safety designed for employees and students of the Czech Technical University in Prague, which was provided by the Rector's Office of the CTU. Safety is considered one of the basic duties of all employees and students. The knowledge of Health and Occupational Safety regulations forms an integral and permanent part of qualification requirements. This program is obligatory.
