### Recomended pass through the study plan

# Name of the pass: Specialization Management of Power Engineering and Electrotechnics - Passage through study

Faculty/Institute/Others: Faculty of Electrical Engineering

Department:

Pass through the study plan: Electrical Engineering, Power Engineering and Management - Management of

Power Eng. and Electr.

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

#### Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

## List of courses of this pass:

Code	Name of the course	Completion	Credits			
A003TV	Physical Education	Z	2			
B0M16FIL		Z,ZK	5			
B0M16HSD1	History of economy and social studies	Z,ZK	5			
This subject deals	This subject deals with the history of the Czech society in the 19th - 21th centuries. It follows the forming of the Czech political representation, its aims and achieved results as well					
	the social and cultural development and coexistence of the various ethnical groups in the Czech countries.					

-			
-	History of science and technology 2	Z,ZK	5
traditions of the sub	historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate student	nts' interest in th	e history and
traditions of the suc	oject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life a	and the influence	e of technical
DOMAGDOM	engineers Developed a la maria	7 71/	
B0M16PSM	Psychology	Z,ZK	5
B0M16TEO	Theology	Z,ZK	5
	les to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture th he subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who	-	-
are gone through. I	re subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones who - religion from which graws our civilization up.	want to get kno	w Christianity
B1M13JAS1	Quality and Reliability	Z,ZK	6
	إ Jefinitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliabil		_
	e area of reliability, basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby, types		
	nents and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical method		
control, mai	nagerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. Audits.	Statistical inspe	ction.
B1M14SSE	Machinery and Structures of Power Plants	Z,ZK	5
The aim of the cours	se is to acquaint students with forms of energy transformation in power plants, describing the function of power facilities, their structure, p	roperties and ch	aracteristics
B1M15ETT	Electrical Heat	Z,ZK	5
B1M15IAP	Engineering Applications	Z,ZK	5
B1M15PPE1	Elements and Operation of Electrical Power Systems	Z,ZK	5
B1M16CTR1	Controlling	Z,ZK	5
l l	se is to present Management Control as a modern approach to Management of Enterprise, based on the Process and Activity Based		l l
innovative changes	by the application of Project Management principles. The focus is on the integrative potential of Management Control in the Management	nent of Enterpris	se and on the
key role played by	Project Management. Special attention is paid to technical-financial integration and its impact. The emphasis is on Project Management	ent of innovation	processes,
which guarantee the	he company not merely to survive, but also to achieve high performance. The computerized models are used for presentation key prin	ciples, procedu	res and also
	key links between the controlled entities and used managerial tools.		1
B1M16DES	Power Transport Systems	Z,ZK	5
The course is focus	ed on economical aspects of design and operation of various technical systems for various energy forms. That is road, railway and shi	•	olid and liquid

System approacl	h and decision making, Decision models, Games theory, Decision making under uncertainty and risk, Decisions with multiple objective Expert systems, Cluster analysis	es, Stochastic pro	gramming,
B1M16OVY	Operations Research	Z,ZK	5
Art of modeling a	nd elements of decision models, Linear programming, Transportation problem, Integer linear programming, Introduction to graphs the Dynamic programming, Monte Carlo simulation, Project management (CPM, PERT).	ory, Nonlinear pro	gramming,
B1M16RES	Development of Energy Systems	Z,ZK	5
In this subject the	ne basic questions of power stations design is solved. This design is discussed from viewpoint of ecology and level of used technolog	y. Special focus is	on future
importance of cla	issical and renewable energy resources. These kinds of energy resources are considered as the most important factor of future develo	opment of approp	riate power
in	dustry systems. The subject provides overview of practical application of modern technologies to guarantee the development of energ	etic systems.	
B1M16STA	Statistical methods in economics	Z,ZK	5
Basic Concepts. S	tatistical series. Assortment. Distributions of frequencies. One-dimensional descriptive characteristics. Measures of variables, coefficie	ent of skewness, o	coefficient of
excess. Points est	imates of basic characteristics. Interval estimates of basic characteristics. Hypothesis testing of basic characteristics. Individual indexs	number. Aggrega	ative indexs.
Variable-structu	re indexs. Multifactor indexs . Correlation and regression, Basic Concepts. Measurement of dependence intensity. Time series, concep	ots, qualities. Chro	nological
	average . Time series - trends and extrapolation.		
B1MPROJ	Individual project	Z	5
Independent wor	k in the form of a project. A student will choose a topic from a list of topics specified by branch department. The project will be defend	ed within the fram	ework of a
	subject.		
BDIP25	Diploma Thesis	Z	25
Independent final	comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or h	er branch of stud	y, which will
be specified	by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the compreh	ensive final exami	nation.
BEZM	Safety in Electrical Engineering for a master's degree	Z	0
The course prov	ides for students of all programs periodic training guidelines for health and occupational safety and gives knowledge of electrical haza	ard of given branc	n of study.
	Students receive indispensable qualification according to the current Directive of the Dean.
