Recomended pass through the study plan

Name of the pass: Specialization Electrical Drives - Passage through study

Faculty/Institute/Others: Faculty of Electrical Engineering

Department:

Pass through the study plan: Electrical Engineering, Power Engineering and Management - Electrical Drives

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master combined

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assesment, Z - assesment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

List of courses of this pass:

Code	Name of the course	Completion	Credits
BD0M16FIL	Philosophy 2	Z,ZK	5
BD0M16HVT	History of science and technology 2	Z,ZK	5
This subject traces	historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate studi	ents' interest in the	history and
traditions of the su	bject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life	and the influence	of technical
	engineers		
BD0M16PSM	Psychology	Z,ZK	5
BD0M16TEO	Theology	Z,ZK	5
This subject provid	les to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture	the basic theologic	disciplines
are gone through. T	he subject is determined not only to believer students who want to know the reliable theologic grounding but also above all to ones wh	o want to get know	Christianity
	- religion from which graws our civilization up		

BD1M13ASS Solar Systems Applications The aim of the course is to deepen the knowledge of the properties of semiconductor materials and structures that are important for a deeper uncomponents technology. BD1M13EKP Ecology and materials Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspeelectronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult of electrical waste. BD1M13JAS1 Quality and Reliability Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. A BD1M13VSE Power components in electrical engineering Power semiconductor device (diodes, BJTs, thyristors, MOSFETs and IGBTs) and integraed structures (modules). Structures, function, character.	Z,ZK cts of protective system cult operating environment Z,ZK eliability as a part of qu types of warm and columethods and tools joined	5 ns used in ent. Disposal
BD1M13EKP Ecology and materials Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspee electronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficient of electrical waste. BD1M13JAS1 Quality and Reliability Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. A BD1M13VSE Power components in electrical engineering	Z,ZK cts of protective system cult operating environment Z,ZK eliability as a part of qu types of warm and columethods and tools joined	5 ns used in ent. Disposal
BD1M13EKP Ecology and materials Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspet electronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult of electrical waste. BD1M13JAS1 Quality and Reliability Terminology and definitions from the area of quality and reliability and their control, philosophy of quality, systems of quality control in the world. Reliability of components and systems, calculation of reliability using composition and decomposition. and using a method of a list. Basic statistical materials control, managerial tools for quality control. Techniques FMEA and QFFD, house of quality. Capability of a process. Taguchi loss function. A BD1M13VSE Power components in electrical engineering	cts of protective system ult operating environments Z,ZK eliability as a part of querypes of warm and colorethods and tools joined	ns used in ent. Disposal

		d standbys. d with quality
Power semiconductor device (diodes, BJTs, thyristors, MOSFETs and IGBTs) and integraed structures (modules). Structures, function, characte	Z,ZK	5
components of powet electronic. Connection of devices in parallel and in series.	eristics and parameters	, Passive
BD1M14DEP Digital Control of Electric Drives	Z,ZK	5
The course deals with basics blocks of control computer for electric drive. It is also discussed the issue of discretization drive control and software a developing and debugging control program for electric drive.		s needed for
BD1M14EPT1 Electric Drives and Traction	Z,ZK	5
The course focuses on the principles of designing electric drives with AC motors in different ways and different types of load, reliability, design for exp purposes and the necessary technical documentation. Students learn the basics of electric traction drives for trams in public transport systems, e systems of hybrid cars and electric vehicles.		•
BD1M14ESP Electric Machinery and Apparatus	Z,ZK	5
The course is focused on contact and solid-state switching devices in LV networks. Basic topologies AC switches and stress of their components, sy		miconductor
levices and their protection circuits, testing electrical devices. The course also deals with the general theory of electrical machines. Magnetic field. transformer efficiency, voltage drop. Transients - switch to the network, a short circuit. Mathematical model of synchronous and asynchronous manded and synchronous machine, starting and speed control. Influence of harmonic magnetic field. Single-phase induction motor. Work synchronous machine on a capacity.	achines. A rotating mag	netic field.
BD1M14MDS1 Modeling of Dynamical Systems	Z.ZK	5
The course deals with combining knowledge of the dynamics of rigid bodies, fluid mechanics, aerodynamics, gas dynamics and thermodynamics in of dynamic systems. Seminars are focused on assembling of numeric models in Matlab / Simulink.	the compilation of nonli	near models
BD1M14REP Control and Regulation of Electric Drives	Z,ZK	5
The course is focused to introduction to the problems of the theory of continuous control of electrical drives and power converters. During the sem		e basics of
feedback control, transmission system, determining the stability of the system, including controller types and methods o		
BD1M14SSE Machinery and Structures of Power Plants	Z,ZK	5
he aim of the course is to acquaint students with forms of energy transformation in power plants, describing the function of power facilities, their struc BD1M14TVM Theory and Application of Power Converters	Z,ZK	5
Theory and Application of Power Converters The course focuses on typical applications of power semiconductor converters on their sizing, switching and protection of power semiconductor converters and modern trends in their application in electric drives	converters. It also sumn	narizes the
BD1M15ELS Electrical Light	Z,ZK	5
BD1M15IAP Engineering Applications	Z,ZK	5
BD1M15PPE1 Elements and Operation of Electrical Power Systems	Z,ZK	5
BD1M15PRE1 Transmission and Distribution of Electricity	Z,ZK	5
BD1M15TVN High Voltage Engineering	Z,ZK	5
BD1M16EKE1 Economy of Power Industry	Z,ZK	5
Fundamentals of financing of power companies. Cost structure of power generation and distribution. Prices and tariff systems for power, heat and Examples of economic evaluation and investment appraisal of the typical project in power sector. Renewable energy sources, externalities. Energy Liberalization and power market development.	d gas production and d	istribution.
BD1M16EUE1 Economy of Energy Use	Z,ZK	5
Organization and energy management of company, buildings or energy systems. Energy need and consumption, energy balance. Energy charact energy sources. Energy audit and feasibility study, optimization of energy management of energy systems. Prices and tariffs, economy		-
BD1MPROJ Individual project Independent work in the form of a project. A student will choose a topic from a list of topics specified by branch department. The project will be described by branch department. The project will be described by branch department.	Z efended within the fram	5 nework of a
BDIP25 Diploma Thesis	Z	25
Independent final comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his be specified by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the com	s or her branch of stud	y, which will
BEZM Safety in Electrical Engineering for a master's degree	Z	0
The course provides for students of all programs periodic training guidelines for health and occupational safety and gives knowledge of electrical Students receive indispensable qualification according to the current Directive of the Dean.	hazard of given branc	h of study.
