Recomended pass through the study plan

Name of the pass: Specialization Technological Systems - Passage through study

Faculty/Institute/Others: Faculty of Electrical Engineering Department: Pass through the study plan: Electrical Engineering, Power Engineering and Management - Technological Systems

Branch of study guranteed by the department: Welcome page

Guarantor of the study branch:

Program of study: Electrical Engineering, Power Engineering and Management

Type of study: Follow-up master full-time

Note on the pass:

Coding of roles of courses and groups of courses:

P - compulsory courses of the program, PO - compulsory courses of the branch, Z - compulsory courses, S - compulsory elective courses, PV - compulsory elective courses, F - elective specialized courses, V - elective courses, T - physical training courses

Coding of ways of completion of courses (KZ/Z/ZK) and coding of semesters (Z/L):

KZ - graded assessment, Z - assessment, ZK - examination, L - summer semester, Z - winter semester

Number of semester: 1

Code	Name of the course / Name of the group of courses (in case of groups of courses the list of codes of their members) Tutors, authors and guarantors (gar.)	Completion	Credits	Scope	Semester	Role

List of courses of this pass:

Code	Name of the course	Completion	Credits		
BDIP25	Diploma Thesis	Z	25		
Independent final comprehensive work for the Master's degree study programme. A student will choose a topic from a range of topics related to his or her branch of study, which will					
be specified by branch department or branch departments. The diploma thesis will be defended in front of the board of examiners for the comprehensive final examination.					
BE0M16FIL	Philosophy 2	Z,ZK	5		

BE0M16HSD1 History of economy and social studies	Z,ZK	5
This subject deals with the history of the Czech society in the 19th - 21th centuries. It follows the forming of the Czech political representation, its aims a	nd achieved results	s as well as
the social and cultural development and coexistence of the various ethnical groups in the Czech countries.		
BE0M16HVT History of science and technology 2	Z,ZK	5
This subject traces historical developments in electrical engineering branches in the world and in the Czech Lands. Its ultimate goal is to stimulate stude	ents' interest in the	history and
traditions of the subject, while highlighting the developments in technical education and professional organizations, the process of shaping scientific life	and the influence of	of technical
engineers	7 714	
BE0M16PSM Psychology	Z,ZK	5
BEOM16TEO Theology	Z,ZK	4
I his subject provides to students the basic orientation in christian theology and requires no special previous education. After short philosophic lecture t	ne basic theologic (disciplines Christianity
- religion from which graws our civilization up	5 want to get know v	Crinsuariny
BE1M13AE7 Application of Electrochemical Sources	7 7K	5
After a brief introduction to chemical reactions commonly present in electrochemical sources, the technologies and manufacturing of commonplace accu	ا سریے imulator batteries a	nd primary
cells are discussed in detail. In the course, there is presented the current state of the field of batteries for different types of applications - electromobilit	, stationary backup	systems
and energetics. Emphasis is also placed on the trends in simultaneously using of battery storage for balancing network characteristics, especially in	combination with th	ne RES.
BE1M13ASS Solar Systems Application	Z,ZK	5
Solar energy. Photovoltaic phenomena. Photovoltaic cells and modules and their characteristics. Photovoltaic systems and their applications. Photo-therm	nal phenomena.Pho	oto-thermal
power stations. Significance, economic and environmental aspects of solar energy exploitation.		
BE1M13EKP Ecology and Materials	Z,ZK	5
Electrical Technology from the perspective of ecology. Environmental assessment of the various types of surface protection. Environmental aspects of	protective systems	s used in
electronics. Environmental impacts of electrical production. Ekodesign proposal of the electrical product. Principles of the proposal product for a difficult op	erating environmer	nt. Disposal
	7 714	
BE1M13JAS1 Quality and Reliability	Z,ZK	6
definitions from the area of reliability basic distributions used in reliability and their basic characteristics. Back-up using a warm and cold standby types	nity as a part of qua	ality. Basic
Reliability of components and systems, calculation of reliability using composition and decomposition, and using a method of a list. Basic statistical metho	ds and tools joined	with quality
control, managerial tools for guality control. Techniques FMEA and QFFD, house of guality. Capability of a process. Taguchi loss function. Audits	Statistical inspecti	on.
BE1M13MAD Control methods and testing in electrotechnology	7 7K	5
The course follows the needs of electrical production and research. It discussed diagnostic of materials and measurements of material properties, include	ing measurement o	of important
parameters of production and work environment. The subject also includes testing safe function of products and evaluating the obta	ined data.	
BE1M13SVS Simulation of Production Sytems	Z,ZK	5
The course is focused at methods of static and dynamic models of processes and systems forming. Basic types of models are described and characteri	zed. Models are bu	ilt up using
an analytical way on the basis of knowledge of relationships between parameters, or using an experimental way. Factorial experiments for qualitative varia	bles are presented	. Computer
aided generation of mathematical models and simulation of dynamic behavior of processes and systems are described. Basic methods of component r	nodels compilation,	assembly
of a complete model are presented. The application on computer modeling and simulation of electrical, thermal and mechanical systems in power electric	cal engineering cor	npletes the
PE4M42)/CE	7 71/	<i>_</i>
BE INITS VSE POWER COMPONENTS IN Electrical engineering Power semiconductor device (diodes Bits thyristors MOSEETs and IGBTs) and integraed structures (modules) Structures function, characteristic	∠,∠N	Dassiva
components of power electronic. Connection of devices in parallel and in series	s and parameters,	1 033100
BE1M14ESP Electric Machinery and Apparatus	7 7K	5
The course is focused on contact and solid-state switching devices in LV networks. Basic topologies AC switches and stress of their components, system	is with modern serr	niconductor
devices and their protection circuits, testing electrical devices. The course also deals with the general theory of electrical machines. Magnetic field. Fund	amentals of commu	utation. The
transformer efficiency, voltage drop. Transients - switch to the network, a short circuit. Mathematical model of synchronous and asynchronous machine	es. A rotating magn	etic field.
Induction machine, starting and speed control. Influence of harmonic magnetic field. Single-phase induction motor. Work synchronous machine on a network	/ork. Torque, stabilit	ty, overload
capacity.		
BE1M14MDS1 Modeling of Dynamical Systems	Z,ZK	5
The course deals with combining knowledge of the dynamics of rigid bodies, fluid mechanics, aerodynamics, gas dynamics and thermodynamics in the co	ompilation of nonlin	ear models
DE 4144 400E	7 71/	
BE IMI455E MIACONNERY and Structures of Power Plants	Z,ZK	C
PE1M14TV/M Theory and Application of Dower Convertors		E
DE TIVIT4TVIVI The course focuses on twoical applications of power semiconductor converters on their sizing, switching and protection of power semiconductor converters	∠,∠N rters_It also summa	J arizes the
basics of modulation and control strategies of power semiconductor converters and modern trends in their application in electric drives and	other applications.	
BE1M15ELS Electrical Light	7 7K	5
The aim of the course is to make students acquainted with most frequent applications of optical radiation and with theoretical and practical principles of	resolving lighting s	vstems for
indoor and outdoor areas, respecting necessary visual performance with emphasis on energy efficiency solutions and aspects of healt		
BE1M15IAP Engineering Applications	h and safety.	
The aim of the course is to get an overview of solving basic mathematical problems occurring in engineering practice using computer all	h and safety.	5
	h and safety. Z,ZK gebra systems	5
BE1M15PPE1 Elements and Operation of Electrical Power Systems	h and safety. Z,ZK gebra systems Z,ZK	5
BE1M15PPE1 Elements and Operation of Electrical Power Systems The course introduces basic technical principles of electricity transmission and distribution. There are explained parameters of power systems key elements	h and safety. Z,ZK gebra systems Z,ZK eents, steady states	5 5 s, transient
BE1M15PPE1 Elements and Operation of Electrical Power Systems The course introduces basic technical principles of electricity transmission and distribution. There are explained parameters of power systems key elem and failure phenomena, main principles of dimensioning and protecting, power quality and its control and electrical machines characteristic	h and safety. Z,ZK gebra systems Z,ZK ents, steady states is and utilization.	5 5 s, transient

BE1M16EKE1	Economy of Power Industry	Z,ZK	5			
Fundamentals of financing of power companies. Cost st	ructure of power generation and distribution. Prices and tariff systems for power, heat and gas	production and di	stribution.			
Examples of economic evaluation and investment appr	aisal of the typical project in power sector. Renewable energy sources, externalities. Energy po	olicy and energy la	w in CR.			
	Liberalization and power market development.					
BE1M16EUE1	Economy of Energy Use	Z,ZK	5			
Organization and energy management of company, buildings or energy systems. Energy need and consumption, energy balance. Energy characterization of aggregate, secondary						
energy sources. Energy audit and feasibility study, optimization of energy management of energy systems. Prices and tariffs, economy and financial analysis.						
BE1MPROJ	Individual project Z 5					
Independent work in the form of a project. A student will choose a topic from a list of topics specified by branch department. The project will be defended within the framework of a						
	subject.					
BEEZM Safet	ty in Electrical Engineering for a master's degree	Z	0			
The course provides for students of all programs periodic training guidelines for health and occupational safety and gives knowledge of electrical hazard of given branch of study.						
Students receive indispensable qualification according to the current Directive of the Dean.
